**UN Millennium Development Library: Innovation** UN Millennium Project,2013-06-17 The Millennium Development Goals, adopted at the UN Millennium Summit in 2000, are the world's targets for dramatically reducing extreme poverty in its many dimensions by 2015 income poverty, hunger, disease, exclusion, lack of infrastructure and shelter while promoting gender equality, education, health and environmental sustainability. These bold goals can be met in all parts of the world if nations follow through on their commitments to work together to meet them. Achieving the Millennium Development Goals offers the prospect of a more secure, just, and prosperous world for all. The UN Millennium Project was commissioned by United Nations Secretary-General Kofi Annan to develop a practical plan of action to meet the Millennium Development Goals. As an independent advisory body directed by Professor Jeffrey D. Sachs, the UN Millennium Project submitted its recommendations to the UN Secretary General in January 2005. The core of the UN Millennium Project's work has been carried out by 10 thematic Task Forces comprising more than 250 experts from around the world, including scientists, development practitioners, parliamentarians, policymakers, and representatives from civil society, UN agencies, the World Bank, the IMF, and the private sector. This report argues that meeting the Millennium Development Goals will require a substantial reorientation of development policies to focus on key sources of economic growth, particularly the use of scientific and technological knowledge and related institutional adjustments. It outlines key areas for policy action, including focusing on platform or generic technologies; defining infrastructure services as a foundation for technology; improving higher education in science and placing universities at the center of local development; spurring entrepreneurial activities; improving the policy environment; and focusing on areas of under-funded research for development.

**The Broadband Millennium: Communication Technologies and Markets** Don Flourney,2004 This book focuses on future markets for broadband products and services, as well as the infrastructure under development that is intended to make those markets more readily attainable and manageable. But it also takes on a more ambitious agenda. Its analysis shows how advanced technologies are facilitating the transition to a new world information and economic order in which much larger percentages of end users have a greater chance of getting what they want.

*Hustle Harder, Hustle Smarter* Curtis "50 Cent" Jackson,2020-04-28 NEW YORK TIMES BESTSELLER For the first time, Curtis “50 Cent” Jackson opens up about his amazing comeback—from tragic personal loss to thriving businessman and cable’s highest-paid executive—in this unique self-help guide, his first since his blockbuster New York Times bestseller *The 50th Law*. In his early twenties Curtis Jackson, known as 50 Cent rose to the heights of fame and power in the cutthroat music business. A decade ago the multi-platinum selling rap artist decided to pivot. His ability to adapt to change was demonstrated when he became the executive producer and star of *Power*, a high-octane, gripping crime drama centered around a drug kingpin’s family. The series quickly became “appointment” television, leading to Jackson inking a four-year, \$150 million contract with the Starz network—the most lucrative deal in premium cable history. Now, in his most personal book, Jackson shakes up the self-help category with his unique, cutting-edge lessons and hard-earned advice on embracing change. Where *The 50th Law* tells readers “fear nothing and you shall succeed,” *Hustle Harder, Hustle Smarter* builds on this message, combining it with Jackson’s street smarts and hard-learned corporate savvy to help readers successfully achieve their own comeback—and to learn to flow with the changes that disrupt their own lives.

Neither have performance characteristics been achieved to compete with the existing combustion engine, though the efficiency and durability of hydrogen fuel cells are improving. This publication highlights the uncertainties involved in making choices about hydrogen and fuel cells in planning the development policies on national energy, environment and transport sector.--Publisher's description.

*The 2030 Spike* Colin Mason,2013-06-17 The clock is relentlessly ticking! Our world teeters on a knife-edge between a peaceful and prosperous future for all, and a dark winter of death and destruction that threatens to smother the light of civilization. Within 30 years, in the 2030 decade, six powerful 'drivers' will converge with unprecedented force in a statistical spike that could tear humanity apart and plunge the world into a new Dark Age. Depleted fuel supplies, massive population growth, poverty, global climate change, famine, growing water shortages and international lawlessness are on a crash course with potentially catastrophic consequences. In the face of both doomsaying and denial over the state of our world, Colin Mason cuts through the rhetoric and reams of conflicting data to muster the evidence to illustrate a broad picture of the world as it is, and our possible futures. Ultimately his message is clear; we must act decisively, collectively and immediately to alter the trajectory of humanity away from catastrophe. Offering over 100 priorities for immediate action, *The 2030 Spike* serves as a guidebook for humanity through the treacherous minefields and wastelands ahead to a bright, peaceful and prosperous future in which all humans have the opportunity to thrive and build a better civilization. *Kissing in Manhattan* David Schickler,2002-08-27 Hilarious, sexy, and deeply tender, *Kissing in Manhattan* was one of the most celebrated debuts in recent years. Acclaimed author David Schickler's collection of linked stories follows a troupe of love-hungry urbanites through a charmed metropolis and into the Preemption--a mythic Manhattan apartment building. The Preemption sets the stage for a romantic fantasy as exuberant, dark, and dazzling as the city it occupies. Behind closed doors, the paths of an improbable cast of tenants--a seductive perfume heiress; a crabby, misunderstood actor; a preternaturally sharp-sighted priest--tangle and cross, while a perilous love triangle builds around three characters: James Branch, a shy young accountant with an unusual love for the Preemption's antique elevator, and a strange destiny... Patrick Rigg, a Wall Street lothario who soothes his pain

by seducing beautiful women, carrying a gun, and attending the nightly sermons of a foreboding priest... Rally McWilliams, a fetching, hopeful young writer who roams the city at night, searching for the soulmate she believes in but can't find... Charged with joy and a deadly sense of humor, Kissing in Manhattan is a daring new writer's vision of a world where men and women, good and evil, love and sex, meet, battle, and embrace on every street corner.

Vehicle Propulsion Systems Lino Guzzella, Antonio Sciarretta, 2005-12-06 In this book the longitudinal behavior of road vehicles is analyzed. The main emphasis is on the analysis and minimization of the fuel and energy consumption. Most approaches to this problem enhance the complexity of the vehicle system by adding components such as electrical motors or storage devices. Such a complex system can only be designed by means of mathematical models. This text gives an introduction to the modeling and optimization problems typically encountered when designing new propulsion systems for passenger cars. It is intended for persons interested in the analysis and optimization of classical and novel vehicle propulsion systems. Its focus lies on the control-oriented mathematical description of the physical processes and on the model-based optimization of the system structure and of the supervisory control algorithms. This text has evolved from a lecture series at ETH Zurich. Prerequisites are general engineering topics and a first course in optimal control theory.

**Action Park** Andy Mulvihill, Jake Rossen, 2020-06-30 Citizen Kane does Adventureland. —The Washington Post The outlandish, hilarious, terrifying, and almost impossible-to-believe story of the legendary, dangerous amusement park where millions were entertained and almost as many bruises were sustained, told through the eyes of the founder's son. Often called Accident Park, Class Action Park, or Traction Park, Action Park was an American icon. Entertaining more than a million people a year in the 1980s, the New Jersey-based amusement playland placed no limits on danger or fun, a monument to the anything-goes spirit of the era that left guests in control of their own adventures--sometimes with tragic results. Though it closed its doors in 1996 after nearly twenty years, it has remained a subject of constant fascination ever since, an establishment completely anathema to our modern culture of rules and safety. Action Park is the first-ever unvarnished look at the history of this DIY Disneyland, as seen through the eyes of Andy Mulvihill, the son of the park's idiosyncratic founder, Gene Mulvihill. From his early days testing precarious rides to working his way up to chief lifeguard of the infamous Wave Pool to later helping run the whole park, Andy's story is equal parts hilarious and moving, chronicling the life and death of a uniquely American attraction, a wet and wild 1980s adolescence, and a son's struggle to understand his father's quixotic quest to become the Walt Disney of New Jersey. Packing in all of the excitement of a day at Action Park, this is destined to be one of the most unforgettable memoirs of the year.

**Ishiro Honda** Steve Ryfle, 2018-04-10 "An appreciation of Japanese fantasy-film history through the eyes of a filmmaker whose name is obscure but populism remains influential." —Chicago Tribune Ishiro Honda, arguably the most internationally successful Japanese director of his generation, made an unmatched succession of science fiction films that were commercial hits worldwide. From the atomic allegory of Godzilla and the beguiling charms of Mothra to the tragic mystery of Matango and the disaster and spectacle of Rodan, The Mysterians, King Kong vs. Godzilla, Honda's films reflected postwar Japan's anxieties and incorporated fantastical special effects, a formula that created an enduring pop culture phenomenon. Now, in the first full account of this overlooked director's life and career, Steve Ryfle and Ed Godziszewski shed new light on Honda's work and the experiences that shaped it—including his days as a reluctant Japanese soldier, witnessing the aftermath of Hiroshima, and his lifelong friendship with Akira Kurosawa. The book features close analysis of Honda's films (including, for the first time, his rarely seen dramas, comedies, and war films) and draws on previously untapped documents and interviews to explore how creative, economic, and industrial factors impacted his career. Fans of Godzilla and tokusatsu (special effects) film, and of Japanese film in general, will welcome this in-depth study of a highly influential director who occupies a uniquely important position in science fiction and fantasy cinema, as well as world cinema. "Provides the reader with a lasting sense of the man—his temperament, values, philosophies, dreams, and disappointments?behind some of cinema's most beloved characters." —Film Comment
