Andersen,2023-03-14 A perennial self-help favorite, updated to speak powerfully to contemporary readers and with a foreword by Eckhart Tolle Before there was The Law of Attraction or The Secret, there was The Magic in Your Mind by U. In clear, crisp, invigorating language, Andersen offers a liberating message for anyone seeking to improve and understand their life. Mind Reading as a Cultural Practice Laurens Schlicht, Carla Seemann, Christian Kassung, 2020-04-04 This book provides a genealogical perspective on various forms of mind reading in different settings. We understand mind reading in a broad sense as the twentieth-century attempt to generate knowledge of what people held in their minds – with a focus on scientifically-based governmental practices. This volume considers the techniques of mind reading within a wider perspective of discussions about technological innovation within neuroscience, the juridical system, “occult” practices and discourses within the wider field of parapsychology and magical beliefs. The authors address the practice of, and discourses on, mind reading as they form part of the consolidation of modern governmental techniques. The collected contributions explore the question of how these techniques have been epistemically formed, institutionalized, practiced, discussed, and how they have been used to shape forms of subjectivities – collectively through human consciousness or individually through the criminal, deviant, or spiritual subject. The first part of this book focuses on the technologies and media of mind reading, while the second part addresses practices of mind reading as they have been used within the juridical sphere. The volume is of interest to a broad scholarly readership dealing with topics in interdisciplinary fields such as the history of science, history of knowledge, cultural studies, and techniques of subjectivization.

Sleights of Mind Susana Martinez-Conde, Stephen L. Macknik, Sandra Blakeslee, 2011-02-03 What can magic tell us about ourselves and our daily lives? If you subtly change the subject during an uncomfortable conversation, did you know you're using attentional 'misdirection', a core technique of magic? And if you've ever bought an expensive item you'd sworn never to buy, you were probably unaware that the salesperson was, like an accomplished magician, a master at creating the 'illusion of choice'. Leading neuroscientists Stephen Macknik and Susana Martinez-Conde meet with magicians from all over the world to explain how the magician's art sheds light on consciousness, memory, attention, and belief. As the founders of the new discipline of NeuroMagic, they combine cutting-edge scientific research with startling insights into the tricks of the magic trade. By understanding how magic manipulates the processes in our brains, we can better understand how we work - in fields from law and education to marketing, health and psychology - for good and for ill.
