Resuscitation of a Hanged Man Denis Johnson,1991-03-05 Resuscitation of a Hanged Man is Denis Johnson's most fully realized novel to date, an enthralling and shattering reading experience, which probes the mysteries of faith, hope and love.

Lightning Fred Stenson,2010 The award-winning Western epic by one of Canada's greatest living writers (David Adams Richards) Lightning takes up where Fred Stenson's Giller-nominated and much-honoured novel, *The Trade*, left off. It is 1881, and the fur trade has been forced to make room for another economy. Seven thousand cattle are crossing the border from Montana into newly named Alberta. The openrange ranch era, Canadian style, is about to begin. Doc Windham, a Texan, is one of the cowboys trailing the herd.

The Clinton Wars Sidney Blumenthal,2003 From his first day in the White House until long after his appearance as the only presidential aide ever to testify in an impeachment trial, Blumenthal participated in nearly all the battles of the Clinton years..

The Man Who Saws Us in Half Ron Houchin,2013-10-09 Through silence and song, death and rebirth, a sense of wonder pervades every minute of our lives. In *The Man Who Saws Us in Half*, Ron Houchin explores this idea from the first curiosities of childhood to the gradual skepticism that comes with age and the weight of practical concerns. In the whimsical poem *The Lion That Finds You Asleep in His Dream*, the sleeping figure relives the magical allure of youth, offered both gratuitously and ubiquitously: The moon's still high in its arc, / and you know / you spilled from this lion's heart. With his unique and colloquial voice, Houchin allows the reader to experience familiar subjects anew, to admire the surrounding world with rekindled appreciation and awe.

Black Sunshine Ninie Hammon,2014-06-07 Some secrets won't stay buried with the corpses ... not even under a mountain. Ever since a rescue team dragged an unconscious Will Gribbins from the rubble of the explosion that killed twenty-seven miners in the Harlan #7 Coal Mine, shame, guilt, and fear have gnawed at Will's soul. What happened down in the dark of the mine after the explosion has dogged him for decades and reduced him to a homeless, under-the-bridge drunk. But now Will has finally stopped running. Clinging desperately to the precepts of a twelve-step program, he comes home to the mountains to seek impossible forgiveness, and to confess what he did—only to discover that the truth about what really happened that day in a mile-deep hole under Black Mountain lies in the magical coal statues carved by a handicapped boy. But his return has lit a fuse that could explode into murder. With painstaking research, Ninie Hammon has created a dark, dangerous world, accurate to the smallest detail. If you love gut-wrenching suspense coupled with a dusting of “the unexplainable,” step into the forever night of Black Sunshine’s coal mines. But don’t go too deep or stay too long. Or you might meet the mother of all terrors—being buried alive, gasping for breath until there’s no air left.

Protests, Pandemic, and Security Predicaments Wei-chin Lee,2023-06-27 This book examines how Asian countries have responded to urgent challenges against a backdrop of climactic political developments, as well as the effects of issue linkage in policy making. Chapters are arranged according to localities but interlinked through their thematic and critical analyses. The section on Hong Kong focuses on the theme of protests, highlighting its intersection with identity and generational shifts in addition to legal, political and economic changes before and after the adoption of Hong Kong National Security Law. The section examining Taiwan’s policies discusses electoral calculations, identity reconstruction, cross-Straits stalemate and alliance maneuvers within USA-China-Taiwan triangular international relations, providing an overview of its domestic and external policies. Through their analysis, the authors here determine that China has emphasized the prerogatives of history, culture and territorial sovereignty in its dealings with the Hong Kong protests and Taiwan, and that cross-Straits analysis must be deliberated and ultimately determined within the USA-China-Taiwan triangular framework. In the final section, authors examine the USA’s role and policy in dealing with both sides of the Taiwan Strait. Hegemonic power transition has been a primary concern in both countries with the USA’s hegemonic status facing daunting challenges from China, increasingly perceived as an ascending revisionist power waiting to overtake the USA in the future.

Canary in the Coal Mine Madelyn Rosenberg,2013-04-12 Bitty is a canary whose courage more than makes up for his diminutive size. Of course, as a miner bird who detects deadly gas leaks in a West Virginia coal mine during the Depression, he is used to facing danger. Tired of perilous working conditions, he escapes and hops a coal train to the state capital to seek help in improving the plights of miners and their canaries. In the tradition of E.B. White, George Selden, and Beverly Cleary's *Ralph S. Mouse*, Madelyn Rosenberg has written a singular novel full of unforgettable characters.

Contaminants in the Environment Aristeo Renzoni,Niccolo Mattei,Lorena Lari,Cristina Fossi,1994-08-10 This book provides a broad, interdisciplinary assessment of the hazards presented by direct and indirect environmental contaminants to humans. It explores disparate aspects of risk assessment ranging from molecular mechanisms to the practical and administrative issues of environmental management. The book's first three sections focus on principles relevant to living organisms in general, the fourth addresses the question of risks to human health, while the final section considers issues relevant to both human and natural environments.

Taylor's Ark Jody Lynn Nye,2016-09-05 “Exciting . . . enjoyable space adventure . . . fun and well-crafted, with a heroine you’ll enjoy rooting for!” —Aboriginal Science Fiction Dr. Shona Taylor, a specialist in environmental medicine, discovers that a mysterious epidemic is killing the entire population of colony worlds. With the help of her special menagerie, including a cat that can detect environmental hazards, a dog whose system can synthesize vaccines, and an intelligent alien named Chirwl, Shona is determined to stop the epidemic in its tracks, but the people causing the epidemic have set her up to take the blame, spreading the rumor that she is an Angel of Death. Can she find a cure before the disease kills again and puts her and her menagerie in danger?

Saucer Stephen Coonts,2003-01-20 Stephen Coonts has earned an extraordinary worldwide reputation with his military thrillers featuring Jake Grafton, one of the most popular and recognizable characters in contemporary suspense fiction. In this exhilarating departure, Coonts takes readers on an imaginative journey into space that is as suspenseful as any of his other stories . . . When Rip Cantrell, a seismic survey worker in the Sahara, spots a glint of reflected light in the distance, he investigates-and finds a piece of metal apparently entombed in the sandstone. Before long, Rip and his colleagues uncover a flying saucer that has been resting there for 140,000 years. Their discovery doesn't remain a secret for long. The U.S. airforce sends a UFO investigation team, which arrives just minutes before a team sent by an Australian billionaire to steal the saucer's secrets. Before either side can outwit the other, the Libyan military arrives. Meanwhile, Rip has been checking out the saucer. With the help of a beautiful ex-Air Force test pilot Charley Pine, Rip flies the saucer away, embarking on a fantastic journey into space and around the world, keeping just ahead of those who want the saucer for themselves. *Saucer* is a dazzling flying story and an action-filled look at what might have been...and what might be.

The Electrification of Russia, 1880-1926 Jonathan Coopersmith,2016-11-01 The Electrification of Russia, 1880-1926 is the first full account of the widespread adoption of electricity in Russia, from the beginning in the 1880s to its early years as a state technology under Soviet rule. Jonathan Coopersmith has mined the archives for both the tsarist and the Soviet periods to examine a crucial element in the modernization of Russia. Coopersmith shows how the Communist Party forged an alliance with engineers to harness the socially transformative power of this science-based enterprise. A centralized plan of electrification triumphed, to the benefit of the Communist Party and the detriment of local governments and the electrical engineers. Coopersmith’s narrative of how this came to be elucidates the deep-seated and chronic conflict between the utopianism of Soviet ideology and the reality of Soviet politics and economics.

Feeling Fat, Fuzzy, or Frazzled? Richard Shames,Karilee Shames,2005-07-07 For the 33 million Americans who feel sluggish, spacey, and stressed out daily, *Feeling Fat, Fuzzy, or Frazzled?* is the first book to address the delicate balance among the thyroid, adrenal, and reproductive glands—which can make the day-to-day difference between feeling awful and feeling good. Long-term, if left untreated, this imbalance can cause heart disease, diabetes, arthritis, infertility, and severe menopause. Authored by an expert physician/nurse

team, the book offers readers: an innovative program to identify their particular hormone-related metabolic disorder; a “5-day jumpstart program” to help alleviate weight gain, low energy, or frayed nerves fast; and a long-term plan to achieve optimal health.

Crime of Privilege Walter Walker,2013 Pitted against a powerful family when he reopens the scandalous case of a young woman's unsolved murder, George Becket is forced to confront a haunting mistake from his own past while outmaneuvering wealth-driven corruption.

Reinventing HRM Ronald J. Burke,Cary L. Cooper,2006-08-21 The human resources (HR) field is in a time of format and self-reflection. This significant text directly addresses the reasons why human resource management has not received its due. It asks: What can be done about this? Why is it critical to continued organizational performance and innovation? What are its benefits? The authors review the most current thinking on HR initiatives associated with organizational performance and investigate how the field will need to mobilize in new ways to meet the demand of this period of time. With contributions from key thinkers, this is one of the most important books on HRM available.

Hope's Horizon Chip Ward,2013-04-10 At a time of widespread environmental pessimism, Hope's Horizon goes on an inspirational offensive. In this entertaining and thought-provoking book, author Chip Ward tells of his travels among a new generation of activists who are moving beyond defensive environmental struggles and advocating pioneering, proactive strategies for healing the land. Chip Ward's three-year odyssey took him behind the scenes of efforts to reconnect fragmented habitats and re-wild the North American continent; the campaign to drain Lake Powell and restore Glen Canyon to its natural state; and the struggle to keep nuclear waste off Western Shoshone ancestral lands and, ultimately, to abolish all nuclear power and weapons. These movements, and the practical visionaries leading them, challenge readers with a new paradigm in which land is used in a spirit of collaboration with natural systems rather than domination of them. Broad in its sweep, Hope's Horizon uses its topical subjects as springboards for exploring how we can redefine our place in the world while restoring damaged habitats, replenishing lost diversity, and abandoning harmful technologies. Lively, literate, and free of the grimness that characterizes so much environmental writing, Hope's Horizon will change the way readers see the world. It makes complicated concepts and issues accessible, and wild ideas compelling. And while the book's starting point is a hard-nosed indictment of humanity's failed stewardship of the earth, the stories that follow tell of catalytic optimism and ecological wisdom in the face of self-destructive habit and blind pride.

The Working Leader Leonard R. Sayles,2010-05-11 The goal: To be a leader who has an agenda, knows the system inside out, is comfortable with fluidity, and recognizes that the parts do not always fit into an integrated whole. Schooled to oversee fixed, almost unvarying routines, managers today are unprepared to manage the conflicts in modern work flow relationships. Sayles shows with vivid case studies how middle managers with an in-depth understanding of the organization can resolve the inherent contradictions and ambiguities among design, sales, and manufacturing.

Granny D's American Century Doris Haddock,Dennis Michael Burke,2012 The life of Doris Haddock, known to millions as Granny D, from her young adulthood in Boston during the Great Depression to her last decade as a galvanizing figure of populist politics
