Data Mining Mobile Devices Jesus Mena,2013-06-18
With today's consumers spending more time on their
mobiles than on their PCs, new methods of empirical
stochastic modeling have emerged that can provide
marketers with detailed information about the products,
content, and services their customers desire. Data Mining
Mobile Devices defines the collection of machine-sensed
environmental data pertaining to human social behavior. It
explains how the integration of data mining and machine
learning can enable the modeling of conversation context,
proximity sensing, and geospatial location throughout large
communities of mobile users. Examines the construction
and leveraging of mobile sites Describes how to use mobile
apps to gather key data about consumers' behavior and
preferences Discusses mobile mobs, which can be
differentiated as distinct marketplaces—including Apple®,
Google®, Facebook®, Amazon®, and Twitter® Provides

detailed coverage of mobile analytics via clustering, text, and classification AI software and techniques Mobile devices serve as detailed diaries of a person, continuously and intimately broadcasting where, how, when, and what products, services, and content your consumers desire. The future is mobile—data mining starts and stops in consumers' pockets. Describing how to analyze Wi-Fi and GPS data from websites and apps, the book explains how to model mined data through the use of artificial intelligence software. It also discusses the monetization of mobile devices' desires and preferences that can lead to the triangulated marketing of content, products, or services to billions of consumers—in a relevant, anonymous, and personal manner.

*Methods of Using Geoinformation Technologies in
Mining Engineers' Training* Svitlana Hryshchenko,Vladimir
Morkun,Serhiy Semerikov,2018-10-23 Mining engineers or
engineers of mining operations are today engaged in
mining iron, nonferrous, rare metals, manganese and
uranium ores, coal and other nonmetallic minerals. In the
current environment, mining enterprises' sustainability has
become a priority and calls for conducting mining
operations according to accepted emission limit values and
radiation and environmental safety provisions, among other
guidelines. This book highlights the problem of ensuring a
future mining engineer's environmental competence.

Advanced Data Mining and Applications Xue

Li,Osmar R. Zaiane,Zhanhuai Li,2006-07-27 Here are the
proceedings of the 2nd International Conference on
Advanced Data Mining and Applications, ADMA 2006, held
in Xi'an, China, August 2006. The book presents 41 revised
full papers and 74 revised short papers together with 4
invited papers. The papers are organized in topical sections
on association rules, classification, clustering, novel
algorithms, multimedia mining, sequential data mining and
time series mining, web mining, biomedical mining,
advanced applications, and more.

*Mining Over Air: Wireless Communication Networks
Analytics* Ye Ouyang,Mantian Hu,Alexis Huet,Zhongyuan

Li,2018-07-27 This book introduces the concepts, applications and development of data science in the telecommunications industry by focusing on advanced machine learning and data mining methodologies in the wireless networks domain. Mining Over Air describes the problems and their solutions for wireless network performance and quality, device quality readiness and returns analytics, wireless resource usage profiling, network traffic anomaly detection, intelligence-based self-organizing networks, telecom marketing, social influence, and other important applications in the telecom industry. Written by authors who study big data analytics in wireless networks and telecommunication markets from both industrial and academic perspectives, the book targets the pain points in telecommunication networks and markets through big data. Designed for both practitioners and researchers, the book explores the intersection between the development of new engineering technology and uses data from the industry to understand consumer behavior. It combines engineering savvy with insights about human behavior. Engineers will understand how the data generated from the technology can be used to understand the consumer behavior and social scientists will get a better understanding of the data generation process.
