Advances in Information, Communication and Cybersecurity Yassine Maleh, Mamoun Alazab, Noredine Gherabi, Lo'ai Tawalbeh, Ahmed A. Abd El-Latif, 2022-01-12 This book gathers the proceedings of the International Conference on Information, Communication and Cybersecurity, held on November 10–11, 2021, in Khouribga, Morocco. The conference was jointly coorganized by The National School of Applied Sciences of Sultan Moulay Slimane University, Morocco, and Charles Darwin University, Australia. This book provides an opportunity to account for state-of-the-art works, future trends impacting information technology, communications, and cybersecurity, focusing on elucidating the challenges, opportunities, and inter-dependencies that are just around the corner. This book is helpful for students and researchers as well as practitioners. ICI2C 2021 was devoted to advances in smart information technologies, communication, and cybersecurity. It was considered a meeting point for researchers and practitioners to implement advanced information technologies into various

industries. There were 159 paper submissions from 24 countries. Each submission was reviewed by at least three chairs or PC members. We accepted 54 regular papers (34\%). Unfortunately, due to limitations of conference topics and edited volumes, the Program Committee was forced to reject some interesting papers, which did not satisfy these topics or publisher requirements. We would like to thank all authors and reviewers for their work and valuable contributions. The friendly and welcoming attitude of conference supporters and contributors made this event a success!

Instead of distracting you with unnecessary application code, the first twelve chapters will teach you about C# language constructs and many of the .NET libraries through simple console applications. In later chapters, having mastered the basics, you'll then build practical applications and services using ASP.NET Core, the Model-View-Controller (MVC) pattern, and Blazor. What you will learn Build rich web experiences using Blazor, Razor Pages, the Model-View-Controller (MVC) pattern, and other features of ASP.NET Core Build your own types with object-oriented programming Write, test, and debug functions Query and manipulate data using LINQ Integrate and update databases in your apps using Entity Framework Core, Microsoft SQL Server, and SQLite Build and consume powerful services using the latest technologies, including gRPC and GraphQL Build cross-platform apps using XAML Who this book is for Designed for both beginners and C# and .NET programmers who have worked with C# in the past and want to catch up with the changes made in the past few years, this book doesn't need you to have any C# or .NET experience. However, you should have a general understanding of programming before you jump in.

The Inquisition of Climate Science James Lawrence Powell, 2011 Modern science is under the greatest and most successful attack in recent

history. An industry of denial, abetted by news media and info-tainment broadcasters, has duped the American public into rejecting an overwhelming body of rigorously vetted scientific evidence showing that human-caused, carbon-based emissions are linked to warming the Earth. The Inquisition of Climate Science is the first book to comprehensively take on the climate science denial movement and the deniers themselves, exposing their lack of credentials, their extensive industry funding, and their failure to provide any alternative theory to explain the observed evidence of warming. In this book, readers meet the most prominent deniers while dissecting their credentials, arguments, and lack of objectivity. James Lawrence Powell exhibits deniers' wide variety of deceptive rhetorical techniques, many stretching back to ancient Greece. Carefully researched, fully referenced, and compellingly written, his book clearly proves the evidence of global warming is real.

Our Own Weather Edwin Campbell Martin, 1913

Economic Value of Weather and Climate Forecasts

Richard W. Katz, Allan H. Murphy, 1997 Weather and climate extremes can significantly impact the economics of a region. This book examines how weather and climate forecasts can be used to mitigate the impact of the weather on the economy. Interdisciplinary in scope, it explores the meteorological, economic, psychological, and statistical aspects to weather prediction. The contributors encompass forecasts over a wide range of temporal scales, from weather over the next few hours to the climate months or seasons ahead, and

address the impact of these forecasts on human behaviour. *Economic Value of Weather and Climate Forecasts* seeks to determine the economic benefits of existing weather forecasting systems and the incremental benefits of improving these systems, and will be an interesting and essential reference for economists, statisticians, and meteorologists.

Weather Forecasting Accuracy for FAA Traffic Flow Management National Research Council, Division on Earth and Life Studies, Board on Atmospheric Sciences and Climate, Committee for a Workshop on Weather Forecasting Accuracy for FAA Traffic Control, 2003-02-27 Accurate prediction of convective storms 2- to 6-hours in advance is critical to selecting air traffic routes with minimal weather delays or diversions. This report summarizes the discussions of a workshop to explore present convective weather forecasting skill, strategies for improving that skill, ways to verify forecasts are accurate, and how to make forecasts useful to air traffic controllers, airline dispatchers, and pilots.

The Upper Paleolithic of the Central Russian Plain Olga Soffer, 2013-10-22 The Upper Paleolithic of the Central Russian Plain examines the hunter-gatherer adaptations on the Upper Paleolithic central Russian Plain. The book offers both a culture history for the area and an explanation for the changes in human adaptation. It presents what has been found at 29 major Upper Paleolithic sites occupied over a period of some 14,000 years.

The book presents details of the archaeological inventories and assemblages found at the 29 sites, together with the geography and geology of the study area. It then uses environmental data to model environmental conditions and resource distribution during the various periods of human occupation, as well as to predict optimal strategies for exploiting available resources. Subsequent chapters present the relative and chronometric dating schemes. The book also elucidates the man-land relationships, ensuing subsistence strategies, settlement types present in the archaeological record, settlement systems, and sociopolitical behavior. The text will be significant to archaeologists, paleoecologists, and anthropologists interested in hunter-gatherers and late Pleistocene adaptations.

Dr Fred's Weather Watch Fred Bortz, Marshall Shepherd, 2014-06-30 This perennial favorite is a how-to book for junior meteorologists. Dr. Fred Bortz and Dr. Marshall Shepherd (former NASA meteorologist and the 2013 President of the American Meteorological Society) show kids how to predict the weather in their own backyards - using simple, inexpensive, self-built meteorological instruments that add up to a fully operational weather station. Newly updated (2014) to include additional sources for online research.

Weather Jenny Offill, 2021-01-19 NEW YORK TIMES BESTSELLER • From the beloved author of the nationwide best seller Dept. of Speculation comes a “darkly funny and urgent” (NPR) tour de force about a family, and a nation, in crisis. Lizzie works in the library of a university where she was

once a promising graduate student. Her side hustle is answering the letters that come in to Hell and High Water, the doom-laden podcast hosted by her former mentor. At first it suits her, this chance to practice her other calling as an unofficial shrink—she has always played this role to her divorced mother and brother recovering from addiction—but soon Lizzie finds herself struggling to strike the obligatory note of hope in her responses. The reassuring rhythms of her life as a wife and mother begin to falter as her obsession with disaster psychology and people preparing for the end of the world grows. A marvelous feat of compression, a mix of great feeling and wry humor, *Weather* is an electrifying encounter with one of the most gifted writers at work today.

The Scything Handbook Ian Miller,2016-10-01 The Zen approach to mowing lawns, wacking weeds, harvesting crops, and building modern homesteader abs! Dreading the weekly law mow? Need to whack the weeds in your orchard? Cringing at the drudgery and incessant blare of the mower? Imagine instead long sweeps of an elegant scythe cutting your grass and pesky weeds in blissful, meditative

silence. That is the power of the scythe revolution sweeping North America. Written by a master of the scythe, professionally trained in Austria, and drawing deeply on research into original German texts, *The Scything Handbook* brings centuries-old scything techniques into the twenty-first century. Detailed illustrations cover scythe assembly, perfecting the stroke, blade selection, honing, peening, and aftercare, as well as background on how scythes are forged. Also covered are the basics of making hay and mulch by hand, and how to grow and harvest grains at the home and homestead scale for self-sufficiency. Scything promotes health, flexibility, mind-body connection, and a meditative contemplation of the natural world while producing beautiful lawns and luscious mulch for the modern gardener and homesteader. This is truly an heirloom tool to master. Join the scythe revolution! Ian Miller followed a career in music with a degree in Agroecology from UC Santa Cruz. During a two year stint on a biodynamic farm in Austria he learned how to scythe and delved into historic scything texts in German. He has worked for Seed Savers Exchange in Iowa and is developing a twenty-acre scythe-based homestead near Decorah, Iowa, where he grows his own grain for bread making and makes hay by hand.
