Liquidated Karen Ho, 2009-07-13 Financial collapses—whether of the junk bond market, the Internet bubble, or the highly leveraged housing market—are often explained as the inevitable result of market cycles: What goes up must come down. In *Liquidated*, Karen Ho punctures the aura of the abstract, all-powerful market to show how financial markets, and particularly booms and busts, are constructed. Through an in-depth investigation into the everyday experiences and ideologies of Wall Street investment bankers, Ho describes how a financially dominant but highly unstable market system is understood, justified, and produced through the restructuring of corporations and the larger economy. Ho, who worked at an investment bank herself, argues that bankers' approaches to financial markets and corporate America are inseparable from the structures and strategies of their workplaces. Her ethnographic analysis of those workplaces is filled with the voices of stressed first-year associates, overworked and alienated analysts, undergraduates eager to be hired, and seasoned managing directors. Recruited from elite universities as “the best and the brightest,” investment bankers are socialized into a world of high risk and high reward. They are paid handsomely, with the understanding that they may be let go at any time. Their workplace culture and networks of privilege create the perception that job insecurity builds character, and employee liquidity results in smart, efficient business. Based on this culture of liquidity and compensation practices tied to profligate deal-making, Wall Street investment bankers reshape corporate America in their own image. Their mission is the creation of shareholder value, but Ho demonstrates that their practices and assumptions often produce crises instead. By connecting the values and actions of investment bankers to the construction of markets and the restructuring of U.S. corporations, *Liquidated* reveals the particular culture of Wall Street often obscured by triumphalist readings of capitalist globalization.

Speech Act Theory and Pragmatics John Searle, F. Kiefer, M. Bierwisch, 2012-12-06 In the study of language, as in any other systematic study, there is no neutral terminology. Every technical term is an expression of the assumptions and theoretical presuppositions of its users; and in this introduction, we want to clarify some of the issues that have surrounded the assumptions behind the use of the two terms speech acts and pragmatics. The notion of a speech act is fairly well understood. The theory of speech acts starts with the assumption that the minimal unit of human communication is not a sentence or other expression, but rather the performance of certain kinds of acts, such as making statements, asking questions, giving orders, describing, explaining, apologizing, thanking, congratulating, etc. Characteristically, a speaker performs one or more of these acts by uttering a sentence or sentences; but the act itself is not to be confused with a sentence or other expression uttered in its performance. Such types of acts as those exemplified above are called, following Austin, illocutionary acts, and they are standardly contrasted in the literature with certain other types of acts such as perlocutionary acts and propositional acts. Perlocutionary acts have to do with those effects which our utterances have on hearers which go beyond the hearer's understanding of the utterance. Such acts as convincing, persuading, annoying, amusing, and frightening are all cases of perlocutionary acts.

Powerful Prose R. L. Victoria Pöhls, Mariane Utudji, 2021-10-31 What makes a reading experience »powerful«? This volume brings together literary scholars, linguists, and empirical researchers who tackle the question by investigating the effects and reader responses generated by selected extracts of literary prose. The twelve contributions theorize this widely-used, but to date insufficiently studied notion, and provide insights into the therefore still mysterious-seeming power of literary fiction. The collection explores a variety of stylistic as well as readerly and psychological features responsible for short- and long-term effects - topics of great interest to those interested or specialized in literary studies and narratology, (cognitive) stylistics, empirical literary studies and reader response theory.

Heidegger and the Jews Donatella Di Cesare, 2018-08-23 Philosophers have long struggled to reconcile Martin Heidegger's involvement in Nazism with his status as one of the greatest thinkers of the twentieth century. The recent publication of his *Black Notebooks* has reignited fierce debate on the subject. These thousand-odd pages of jotted observations profoundly challenge our image of the quiet philosopher's exile in the Black Forest, revealing the shocking extent of his anti-Semitism for the first time. For much of the philosophical community, the *Black Notebooks* have been either used to discredit Heidegger or seen as a bibliographical detail irrelevant to his thought. Yet, in this new book, renowned philosopher Donatella Di Cesare argues that Heidegger's metaphysical anti-Semitism was a central part of his philosophical project. Within the context of the Nuremberg race laws, Heidegger felt compelled to define Jewishness and its relationship to his concept of Being. Di Cesare shows that Heidegger saw the Jews as the agents of a modernity that had disfigured the spirit of the West. In a deeply disturbing extrapolation, he presented the Holocaust as both a means for the purification of Being and the Jews' own self-destruction: a process of death on an industrialized scale that was the logical conclusion of the acceleration in technology they themselves had brought about. Situating Heidegger's anti-Semitism firmly within the context of his thought, this groundbreaking work will be essential reading for students and scholars of philosophy and history as well as the many readers interested in Heidegger's life, work, and legacy.

The Earlier Egyptian Passive Andréas Stauder, 2014 The study concerns passive voice in Earlier Egyptian (Old and Middle Egyptian combined), providing a text-based description of the relevant forms and constructions, and of their functions in discourse. It is argued that the passive is not merely a symmetrical pendant to the active, but a complex domain of its own, morphologically, semantically, and in terms of its discourse functions. This is manifest for example in the morphological types of inflectional passives, the productivity of subjectless passive constructions of various sorts, or the interaction of the passive with stative/resultative voice. Passive voice further interacts with aspect: in the unaccomplished, the passive has fewer forms than the active, while in the accomplished a reverse situation is observed. The two inflectional passives in the accomplished-the perfective V-passive (the 'sDm(w)=f') and the T-passive of the sDm.n=f (the sDm.n.t=f)-are thus shown to contrast with one another in principled semantic, not syntactic, ways. Major changes affecting passive voice during the history of Earlier Egyptian are discussed: the loss of the prospective V-passive, the spread of T-passives over the perfective V-passive in various environments, and the rise of an 'impersonal' subject pronoun.tw out of an

inflectional passive marker. The last, a rare change and an instance of de-grammaticalization, is analyzed in details in terms of the processes involved and of the particular intra-linguistic situation that made it possible. Broadening the perspective, relevant elements of the Semitic background are evoked.

Structural-Functional Studies in English Grammar Mike Hannay, Gerard J. Steen, 2007-03-29 This collection presents a number of studies in the lexico-grammar of English which focus on the one hand on close reading of language in context and on the other hand on current functional theoretical concerns. The various contributions represent distinct functionalist models of language, including Functional Grammar and Functional Discourse Grammar, Systemic-Functional Grammar, Role and Reference Grammar, Cognitive Grammar and Construction Grammar. Taken together, however, they typify current work being conducted from the grammatical perspective within the functionalist enterprise, emphasizing on the relation between structure and usage. A fundamental goal of the enterprise is to identify linguistic structures which are constrained by specific features of use, or which actually encode specific features of use, as many of the contributions here show.
