Fiona Rae Terry R. Myers, 2021-09 ELEMENTE DER ENERGIE UND KOMPLEXITÄT Fiona Rae (geb. 1963 in Hongkong, lebt und arbeitet in London) wurde mit ihrer abstrakten Malerei einem breiten Publikum mit der Teilnahme an der legendären Ausstellung Freeze 1988 in den Londoner Docklands bekannt. Sie war damit eine der frühen Vertreterinnen der Young British Artists, die nicht nur die britische Kunstwelt verändern sollten. Ausgehend von einer konzeptuellen Auseinandersetzung mit den Fragestellungen und Möglichkeiten der abstrakten Malerei sind Raes unverkennbare Arbeiten bis heute herausragend und wegweisend. 2011 wurde sie als eine der ersten Frauen als Professorin für Malerei an die Royal Academy berufen. Der Katalog zeigt erstmals die wichtigsten Bilder aus dieser Zeit, die Row Paintings. Sie markieren den Beginn des international beachteten Werks der Künstlerin. Terry R. Myers würdigt in seinem Essay die Bedeutung der Row Paintings in historischem Zusammenhang sowie im aktuellen Diskurs der Malerei.

Reconciliation, Civil Society, and the Politics of Memory Birgit Schwellung, 2014-10-31 How did civil society function as a locus for reconciliation initiatives since the beginning of the 20th century? The essays in this volume challenge the conventional understanding of reconciliation as a benign state-driven process. They explore how a range of civil society actors - from Turkish intellectuals apologizing for the Armenian Genocide to religious organizations working towards the improvement of Franco-German relations - have confronted and coped with the past. These studies offer a critical perspective on local and transnational reconciliation acts by questioning the extent to which speech became an alternative to silence, remembrance to forgetting, engagement to oblivion.

A Grammar of Neo-Aramaic Geoffrey Khan,2015-11-02 Being direct descendants of the Aramaic spoken by the Jews in antiquity, the still spoken Jewish Neo-Aramaic dialects of Kurdistan deserve special and vivid interest. Geoffrey Khan's A Grammar of Neo-Aramaic is a unique record of one of these dialects, now on the verge of extinction. This volume, the result of extensive fieldwork, contains a description of the dialect spoken by the Jews from the region of Arbel (Iraqi Kurdistan), together with a transcription of recorded texts and a glossary. The grammar consists of sections on phonology, morphology and syntax, preceded by an introductory chapter examining the position of this dialect in relation to the other known Neo-Aramaic dialects. The transcribed texts record folktales and accounts of customs, traditions and experiences of the Jews of Kurdistan.

A Political History of the Editions of Marx and Engels's "German ideology Manuscripts" Terrell Carver,Daniel Blank,2014-12-17 Since the 1920s, scholars have promoted a set of manuscripts, long abandoned by Marx and Engels, to canonical status in book form as The German Ideology, and in particular its 'first chapter,' known as 'I. Feuerbach.' Part one of this revolutionary study relates in detail the political history through which these manuscripts were editorially fabricated into editions and translations, so that they could represent an important exposition of Marx's 'theory of history.' Part two presents a wholly-original view of the so-called 'Feuerbach' manuscripts in a page-by-page English-language rendition of these discontinuous fragments. By including the hitherto devalued corrections that each author made in draft, the new text invites the reader into a unique laboratory for their collaborative work. An 'Analytical Introduction' shows how Marx's and Engels's thinking developed in duologue as they altered individual words and phrases on these 'left-over' polemical pages.

Speech Act Theory and Pragmatics John Searle, F. Kiefer, M. Bierwisch, 2012-12-06 In the study of language, as in any other systematic study, there is no neutral terminology. Every technical term is an expression of the assumptions and theoretical presuppositions of its users; and in this introduction, we want to clarify some of the issues that have surrounded the assumptions behind the use of the two terms speech acts and pragmatics. The notion of a speech act is fairly well understood. The theory of speech acts starts with the assumption that the minimal unit of human communication is not a sentence or other expression, but rather the performance of certain kinds of acts, such as making statements, asking questions, giving orders, describing, explaining, apologizing, thanking, congratulating, etc. Characteristically, a speaker performs one or more of these acts by uttering a sentence or sentences; but the act itself is not to be confused with a sentence or other expression uttered in its performance. Such types of acts as those exemplified above are called, following Austin, illocutionary acts, and they are standardly contrasted in the literature with certain other types of acts such as perlocutionary acts and propositional acts. Perlocutionary acts have to do with those effects which our utterances have on hearers which go beyond the hearer's understanding of the utterance. Such acts as convincing, persuading, annoying, amusing, and frightening are all cases of perlocutionary acts.

The Dynamics of Persuasion Richard M. Perloff, 2016-12-19 The Dynamics of Persuasion has been a staple resource for teaching persuasion for nearly two decades. Author Richard M. Perloff speaks to students in a style that is engaging and informational, explaining key theories and research as well as providing timely and relevant examples. The companion website includes materials for both students and instructors and expanding the pedagogical utilities. The sixth edition includes: updated theoretical and applied research in a variety of areas, including framing, inoculation, and self-affirmation; new studies of health campaigns; expanded coverage of social media marketing; enhanced discussion of the Elaboration Likelihood Model in light of continued research and new applications to everyday persuasion. The fundamentals of the book – emphasis on theory, clear-cut explanation of findings, in-depth discussion of persuasion processes and effects, and easy-to-follow real-world applications – continue in the sixth edition.

The Age of Spiritual Machines Ray Kurzweil, 2000-01-01 Ray Kurzweil is the inventor of the most innovative and compelling technology of our era, an international authority on artificial intelligence, and one of our greatest living visionaries. Now he offers a framework for envisioning the twenty-first century--an age in which the marriage of human sensitivity and artificial intelligence fundamentally alters and improves the way we live. Kurzweil's prophetic blueprint for the future takes us through the advances that inexorably result in computers exceeding the memory capacity and computational ability of the human brain by the year 2020 (with human-level capabilities not far behind); in relationships with automated personalities who will be our teachers, companions, and lovers; and in information fed straight into our brains along direct neural pathways. Optimistic and challenging, thought-provoking and engaging, *The Age of Spiritual Machines* is the ultimate guide on our road into the next century.

Heidegger and the Jews Donatella Di Cesare, 2018-08-23 Philosophers have long struggled to reconcile Martin Heidegger's involvement in Nazism with his status as one of the greatest thinkers of the twentieth century. The recent publication of his *Black Notebooks* has reignited fierce debate on the subject. These thousand-odd pages of jotted observations profoundly challenge our image of the quiet philosopher's exile in the Black Forest, revealing the shocking extent of his anti-Semitism for the first time. For much of the philosophical community, the *Black Notebooks* have been either used to discredit Heidegger or seen as a bibliographical detail irrelevant to his thought. Yet, in this new book, renowned philosopher Donatella Di Cesare argues that Heidegger's metaphysical anti-Semitism was a

central part of his philosophical project. Within the context of the Nuremberg race laws, Heidegger felt compelled to define Jewishness and its relationship to his concept of Being. Di Cesare shows that Heidegger saw the Jews as the agents of a modernity that had disfigured the spirit of the West. In a deeply disturbing extrapolation, he presented the Holocaust as both a means for the purification of Being and the Jews' own self-destruction: a process of death on an industrialized scale that was the logical conclusion of the acceleration in technology they themselves had brought about. Situating Heidegger's anti-Semitism firmly within the context of his thought, this groundbreaking work will be essential reading for students and scholars of philosophy and history as well as the many readers interested in Heidegger's life, work, and legacy.

The Hypothetical Species Michael Charles Tobias, Jane Gray Morrison, 2019-03-28 This book is a provocative and invigorating real-time exploration of the future of human evolution by two of the world's leading interdisciplinary ecologists – Michael Charles Tobias and Jane Gray Morrison. Steeped in a rich multitude of the sciences and humanities, the book enshrines an elegant narrative that is highly empathetic, personal, scientifically wide-ranging and original. It focuses on the geo-positioning of the human Self and its corresponding species. The book's overarching viewpoints and poignant through-story examine and powerfully challenge concepts associated historically with assertions of human superiority over all other life forms. Ultimately, *The Hypothetical Species: Variables of Human Evolution* is a deeply considered treatise on the ecological and psychological state of humanity and her options – both within, and outside the rubrics of evolutionary research – for survival. This important work is beautifully presented with nearly 200 diverse illustrations, and is introduced with a foreword by famed paleobiologist, Dr. Melanie DeVore.

Sketching for Architecture + Interior Design Stephanie Travis, 2015-07-20 The debate surrounding hand drawing versus computer-generated imagery has become a hot topic. Having grown up with computers, today's interior design and architecture students are extremely adept at creating computer imagery, but often lack confidence in their freehand sketching skills, or do not know how to sketch at all. Sketching, and the careful observation that it entails, is essential for the successful development of the next generation of designers. Forty-five step-by-step exercises take the student from the simple three-dimensional forms of furniture, to interiors, to complex building exteriors, and cityscapes. Technical topics covered include tools, line weights, perspective, proportion, composition, shading, serial views, and context. Exercises are illustrated with beautiful sketches specially created by the author. *Sketching for Architecture + Interior Design* is an indispensable and practical guide for students wishing to master the art of looking and sketching.
