The Delights of Peg Solitaire John Beasley,2021

Penrose Tiles to Trapdoor Ciphers...and the Return of Dr. Matrix Martin Gardner,2020-10-06 Martin Gardner's Mathematical Games columns in Scientific American inspired and entertained several generations of mathematicians and scientists. Gardner in his crystal-clear prose illuminated corners of mathematics, especially recreational mathematics, that most people had no idea existed. His playful spirit and inquisitive nature invite the reader into an exploration of beautiful mathematical ideas along with him. These columns were both a revelation and a gift when he wrote them; no one-before Gardner--had written about mathematics like this. They continue to be a marvel. This volume was originally published in 1989 and contains columns from published 1976-1978. This 1997 MAA edition contains three new columns written specifically for this volume including the resurrection of the lamented Dr. Matrix.

The Girlfriend Curse Valerie Frankel,2009-10-13 It's uncanny! Within six months of breaking up with her, Peg Silver's ex-lovers always meet and marry the women of their dreams. Even worse than being the eternal bridesmaid, she's the last girlfriend, the one who awakens in a guy the knowledge of what he's always wanted in a relationship ... and it's never with Peg. Obviously, a major lifestyle change is seriously called for, which is why the distraught interior landscape designer says good-bye to Manhattan and late-night lattes with pal Nina, and hello to a farmhouse on ten acres in tiny, backwater Manshire, Vermont, hoping to meet the ultimate, all-organic country man (without too much facial hair) to keep her warm in those frosty New England

winters. Instead, Peg finds herself at Inward Bound -- a proactive adult-education retreat for the hapless and hopelessly lovelorn -- to try to lift her dreaded girlfriend curse. A steamy (and expressly forbidden) dalliance with gorgeous woman-eater Ray probably isn't going to help cure her. But some romantic insight could arise from her attraction to Linus, Inward Bound's sexy, scruffy, smart and still-single founder. Perhaps there is a secret to be unearthed in the crunchy Green Mountains, one that will magically transform Peg Silver from the Perpetual Also Ran to the Big Winner in love.

The Information James Gleick, 2011-03-01 From the bestselling author of the acclaimed *Chaos* and *Genius* comes a thoughtful and provocative exploration of the big ideas of the modern era: Information, communication, and information theory. Acclaimed science writer James Gleick presents an eye-opening vision of how our relationship to information has transformed the very nature of human consciousness. A fascinating intellectual journey through the history of communication and information, from the language of Africa's talking drums to the invention of written alphabets; from the electronic transmission of code to the origins of information theory, into the new information age and the current deluge of news, tweets, images, and blogs. Along the way, Gleick profiles key innovators, including Charles Babbage, Ada Lovelace, Samuel Morse, and Claude Shannon, and reveals how our understanding of information is transforming not only how we look at the world, but how we live. *The Final Frontier*man James Campbell, 2007-11-01 The inspiration for *The Last Alaskans*—the hit documentary series now on the Discovery+—James Campbell's inimitable insider account of a family's nomadic life in the unshaped Arctic wilderness "is an icily gripping, intimate profile that stands up

well beside Krakauer's classic [Into the Wild], and it stands too, as a kind of testament to the rough beauty of improbably wild dreams" (Men's Journal). Hundreds of hardy people have tried to carve a living in the Alaskan bush, but few have succeeded as consistently as Heimo Korth. Originally from Wisconsin, Heimo traveled to the Arctic wilderness in his twenties. Now, more than three decades later, Heimo lives with his wife and two daughters approximately 200 miles from civilization—a sustainable, nomadic life bounded by the migrating caribou, the dangers of swollen rivers, and by the very exigencies of daily existence. In *The Final Frontierman*, Heimo's cousin James Campbell chronicles the Korth family's amazing experience, their adventures, and the tragedy that continues to shape their lives. With a deft voice and in spectacular, at times unimaginable detail, Campbell invites us into Heimo's heartland and home. The Korths wait patiently for a small plane to deliver their provisions, listen to distant chatter on the radio, and go sledding at 44 degrees below zero—all the while cultivating the hard-learned survival skills that stand between them and a terrible fate. Awe-inspiring and memorable, *The Final Frontierman* reads like a rustic version of the American Dream and reveals for the first time a life undreamed by most of us: amid encroaching environmental pressures, apart from the herd, and alone in a stunning wilderness that for now, at least, remains the final frontier.

My Sister's Keeper Jodi Picoult, 2009-05-19 Anna is not sick, but she might as well be. By age 13, she has undergone countless surgeries, transfusions, and shots so that her older sister Kate can somehow fight the leukemia that has plagued her since childhood.

The Grid Book Hannah B Higgins, 2009-01-23 Ten grids that changed the world: the emergence and evolution of the most prominent visual structure in Western culture. Emblematic of modernity, the grid is the underlying form of everything from skyscrapers and office cubicles to paintings by Mondrian and a

piece of computer code. And yet, as Hannah Higgins makes clear in this engaging and evocative book, the grid has a history that long predates modernity; it is the most prominent visual structure in Western culture. In *The Grid Book*, Higgins examines the history of ten grids that changed the world: the brick, the tablet, the gridiron city plan, the map, musical notation, the ledger, the screen, moveable type, the manufactured box, and the net. Charting the evolution of each grid, from the Paleolithic brick of ancient Mesopotamia through the virtual connections of the Internet, Higgins demonstrates that once a grid is invented, it may bend, crumble, or shatter, but its organizing principle never disappears. The appearance of each grid was a watershed event. Brick, tablet, and city gridiron made possible sturdy housing, the standardization of language, and urban development. Maps, musical notation, financial ledgers, and moveable type promoted the organization of space, music, and time, international trade, and mass literacy. The screen of perspective painting heralded the science of the modern period, classical mechanics, and the screen arts, while the standardization of space made possible by the manufactured box suggested the purified box forms of industrial architecture and visual art. The net, the most ancient grid, made its first appearance in Stone Age Finland; today, the loose but clearly articulated networks of the World Wide Web suggest that we are in the middle of an emergent grid that is reshaping the world, as grids do, in its image.

Acute Stroke Management in the Era of Thrombectomy Edgar

A. Samaniego, David Hasan, 2019-06-22 This book contains a compilation of the revolution of mechanical thrombectomy (MT) in the treatment of strokes. The initial chapters summarize information about the best medical management of acute ischemic stroke, imaging modalities and patient selection for MT. The book then focuses on the nuances of MT, providing detailed information about the best approaches for anesthesia during MT, access, intra-arterial thrombolysis, recent devices and catheters and technical pitfalls of MT. A specific chapter is dedicated to MT in the venous system. This is followed by a chapter about the most common complications of MT and post-procedural care of these patients. The last chapter covers different aspects of acute stroke care and MT in the developing world. The authors of this book comprise of a multidisciplinary group of world experts in the field and were encouraged to include teaching cases to deliver a book with a practical approach. *Acute Stroke Management in the Era of Thrombectomy* is intended for all healthcare providers who care for patients with stroke; with special emphasis for the proceduralists who are interested in technical tips to improve outcomes and minimize complications.

The Challenge Alan Drake,2023-12-28 God invites you to cast your cares on Him, because He cares for you (1 Peter 5:7). It is

natural to seek first to meet our own needs and the needs of our family members, but God invites us to make an exchange. He invites us to cast our concerns on Him, and He promises to care for us better than we could take care of ourselves. In exchange, He desires for us to take on His concerns, His priorities, and seek His Kingdom first.

Aesthetics of Interaction in Digital Art Katja

Kwastek, 2015-08-21 An art-historical perspective on interactive media art that provides theoretical and methodological tools for understanding and analyzing digital art. Since the 1960s, artworks that involve the participation of the spectator have received extensive scholarly attention. Yet interactive artworks using digital media still present a challenge for academic art history. In this book, Katja Kwastek argues that the particular aesthetic experience enabled by these new media works can open up new perspectives for our understanding of art and media alike. Kwastek, herself an art historian, offers a set of theoretical and methodological tools that are suitable for understanding and analyzing not only new media art but also other contemporary art forms. Addressing both the theoretician and the practitioner, Kwastek provides an introduction to the history and the terminology of interactive art, a theory of the aesthetics of interaction, and exemplary case studies of interactive media art. Kwastek lays the historical and theoretical groundwork and then develops an aesthetics of interaction, discussing such aspects as real space and data space, temporal structures, instrumental and phenomenal perspectives, and the relationship between materiality and interpretability. Finally, she applies her theory to specific works of interactive media art, including narratives in virtual and real space, interactive installations, and performance—with case studies of works by Olia Lialina, Susanne Berkenheger, Stefan Schemat, Teri Rueb, Lynn Hershman, Agnes Hegedüs, Tmema, David Rokeby, Sonia Cillari, and Blast Theory.
