Overload Erin L. Kelly,Phyllis Moen,2021-10-05 Contemporary ways of working are not working, even for professionals and managers in what used to be considered good jobs. Companies are responding to global competition and pressure from financial markets by adopting management practices and staffing strategies that push workers to do more and more with less and less. New technologies facilitate always-on availability, normalizing 24/7 job expectations. This new intensity spawns chronic stress in the form of overload - feelings of too much to do and too little time to do it. Kelly and Moen argue this way of working is both unhealthy and unsustainable. Employees burn out, quit, or lack the time or energy to bring their best contributions to their jobs. Organizations lose out along with individuals, families, and communities. This book moves beyond familiar tropes about 'work-life balance' to argue that the problem lies not in the effort to 'balance' but in the very nature of contemporary work. Overload harms workers of all genders, ages, and life stages as well as the bottom lines of corporations. What can be done? Kelly and Moen draw on five years of research, including a major field experiment, in a Fortune 500 firm to describe a new approach to making work more sane and sustainable. The initiative, called STAR, prompts imaginative yet feasible changes (or work redesigns) that improve employees' health, wellbeing, and ability to manage both their personal and their work lives. They find the firm also benefits through increased job satisfaction and reduced turnover

Alien Ocean Stefan Helmreich,2023-09-01 Alien Ocean immerses readers in worlds being newly explored by marine biologists, worlds usually out of sight and reach: the deep sea, the microscopic realm, and oceans beyond national boundaries. Working alongside scientists at sea and in labs in Monterey Bay, Hawai'i, the Woods Hole Oceanographic Institution, and the Sargasso Sea and at undersea volcanoes in the eastern Pacific, Stefan Helmreich charts how revolutions in genomics, bioinformatics, and remote sensing have pressed marine biologists to see the sea as animated by its smallest inhabitants: marine microbes. Thriving in astonishingly extreme conditions, such microbes have become key figures in scientific and public debates about the origin of life, climate change, biotechnology, and even the possibility of life on other worlds.

Heisenberg in the Atomic Age Cathryn Carson,2010-01-11 The end of the Second World War opened a new era for science in public life. Heisenberg in the Atomic Age explores the transformations of science's public presence in the postwar Federal Republic of Germany. It shows how Heisenberg's philosophical commentaries, circulating in the mass media, secured his role as science's public philosopher, and it reflects on his policy engagements and public political stands, which helped redefine the relationship between science and the state. With deep archival grounding, the book tracks Heisenberg's interactions with intellectuals from Heidegger to Habermas and political leaders from Adenauer to Brandt. It also traces his evolving statements about his wartime research on nuclear fission for the National Socialist regime. Working between the history of science and German history, the book's central theme is the place of scientific rationality in public life - after the atomic bomb, in the wake of the Third Reich.

Leadership in Higher Education Francis L. Lawrence,2011-12-31 In this collection of interviews, presidents and chancellors of some of America's most respected universities candidly reflect on their experiences during the decade leading up to the twenty-first century and immediately following it. This was a time of change and uncertainty, when opportunities for achievement and potential for failure made their role uncommonly challenging, and success called for considerable determination, integrity, foresight, skill, and courage.The American higher education system, often characterized as the best in the world, is distinguished for its scholarship as well as its accessibility. Its indispensable role as an engine for individual and societal economic advancement has made universities the targets of media interest, critical examination, and political manipulation. Higher education has become the passport to the American dream, and the percentage of those going to college has increased, challenging individual institutions and systems to accommodate growing numbers of aspiring students while searching for solutions to problems of inadequate college preparation and inadequate financial assistance for low-income students. Despite their increasing importance to the nation, the region, and their communities, public and private universities have seen states reduce their support to their state systems of higher education, shifting the responsibility to individuals and institutions.Leadership in Higher Education traces the careers of thirteen women and men who have presided over a total of twenty universities or university systems and three national organizations of higher education: Robert Berdahl, Myles Brand, Molly Corbett Broad, John T. Casteen III, Mary Sue Coleman, Norman C. Francis, Nils Hasselmo, Shirley Ann Jackson, Shirley Strum Kenny, William English Kirwan, Francis L. Lawrence, Charles M. Vest, and David Ward.

Alliance Formation in Civil Wars Fotini Christia,2012-11-12 Some of the most brutal and long-lasting civil wars of our time involve the rapid formation and disintegration of alliances among warring groups, as well as fractionalization within them. It would be natural to suppose that warring groups form alliances based on shared identity considerations - such as Christian groups allying with Christian groups - but this is not what we see. Two groups that identify themselves as bitter foes one day, on the basis of some identity narrative, might be allies the next day and vice versa. Nor is any group, however homogeneous, safe from internal

fractionalization. Rather, looking closely at the civil wars in Afghanistan and Bosnia and testing against the broader universe of fifty-three cases of multiparty civil wars, Fotini Christia finds that the relative power distribution between and within various warring groups is the primary driving force behind alliance formation, alliance changes, group splits and internal group takeovers.

The Classification of Quasithin Groups Michael Aschbacher,Stephen D. Smith,2004 Around 1980, G. Mason announced the classification of a certain subclass of an important class of finite simple groups known as ``quasithin groups''. The classification of the finite simple groups depends upon a proof that there are no unexpected groups in this subclass. Unfortunately Mason neither completed nor published his work. In the Main Theorem of this two-part book (Volumes 111 and 112 of the AMS Mathematical Surveys and Monographs series) the authors provide a proof of a stronger theorem classifying a larger class of groups, which is independent of Mason's arguments. In particular, this allows the authors to close this last remaining gap in the proof of the classification of all finite simple groups. An important corollary of the Main Theorem provides a bridge to the program of Gorenstein, Lyons, and Solomon (AMS Mathematical Surveys and Monographs, Volume 40) which seeks to give a new, simplified proof of the classification of the finite simple groups. Part II of the work (this volume) contains the proof of the Main Theorem, and the proof of the corollary classifying quasithin groups of even type. Part I (Volume 111) contains results which are used in the proof of the Main Theorem. Some of the results are known and fairly general, but their proofs are scattered throughout the literature; others are more specialized and are proved here for the first time.

Geschichte erzählen. Strategien der Narrativierung von Vergangenheit im Mittelalter Sarah Bowden,Manfred Eikermann,Stephen Mossman,Michael Stolz,2020-11-23 Die Beiträge dieses Bandes gehen auf eine internationale Tagung zurück, die 2017 in Manchester stattgefunden hat. Sie untersuchen die Darstellung von Geschichte in der mittelalterlichen deutschen Literatur auf der Basis von aktuellen erzähltheoretischen Forschungsansätzen. Dabei wird ein breites Spektrum an Texten, Gattungen und Diskursen in den Blick genommen; als Angelpunkt für zahlreiche relevante Fragestellungen erweist sich die im 12. Jahrhundert entstandene ›Kaiserchronik‹. Geleitet von der Erkenntnis, dass Vergangenheit erst im Erzählen zu Geschichte wird, analysieren die Beiträge einschlägige narrative Strategien.

The Cognitive Penetrability of Perception John Zeimbekis,Athanassios Raftopoulos,2015-07-02 According to the cognitive penetrability hypothesis, our beliefs, desires, and possibly our emotions literally affect how we see the world. This book elucidates the nature of the cognitive penetrability and impenetrability hypotheses, assesses their plausibility, and explores their philosophical consequences. It connects the topic's multiple strands (the psychological findings, computationalist background, epistemological consequences of cognitive architecture, and recent philosophical developments) at a time when the outcome of many philosophical debates depends on knowing whether and how cognitive states can influence perception. All sixteen chapters were written especially for the book. The first chapters provide methodological and conceptual clarification of the topic and give an account of the relations between penetrability, encapsulation, modularity, and cross-modal interactions in perception. Assessments of psychological and neuroscientific evidence for cognitive penetration are given by several chapters. Most of the contributions analyse the impact of cognitive penetrability and impenetrability on specific philosophical topics: high-level perceptual contents, the epistemological consequences of penetration, nonconceptual content, the phenomenology of late perception, metacognitive feelings, and action. The book includes a comprehensive introduction which explains the history of the debate, its key technical concepts (informational encapsulation, early and late vision, the perception-cognition distinction, hard-wired perceptual processing, perceptual learning, theory-ladenness), and the debate's relevance to current topics in the philosophy of mind and perception, epistemology, and philosophy of psychology.
