Handbook of Chinese Management Check-Teck Foo,2023-09-05 This handbook explores the theme of managing inside China and consists of chapters that communicate the major managerial concepts within the context of Mainland China. Its key emphasis is to clearly highlight the differences in the art of managing in China vs. the West, while acknowledging that these differences may be narrowing as a result of globalization. Chapters in the book elaborate on how management is affected as China experiences rapid change while some aspects of Chinese culture remain unchanged and steeped in tradition. The book goes further in exploring this complexity by juxtaposing China's

orientation towards interpersonal relations, or guanxi, with the government's emphasis on law, which is now becoming more rule-based than before. Business & Management academics and practitioners will gain useful insight into Chinese management practices and their contrast to established Western ones when they use the Handbook of Chinese Management as a reference.

Routledge Handbook of Industry and Development John Weiss, Michael Tribe, 2015-09-16 The Routledge Handbook of Industry and Development is a global overview of industrialisation. Each chapter will provide readers with contemporary insights into this this essential aspect of economic development. Industrialisation has been at the forefront of discussion on economic development since the earliest days of development economics. But over the last fifty years, the manufacturing sectors of different countries and regions have grown at strikingly different rates. In 1960 developing countries took a very small share of global manufacturing production. Today the position had changed radically with fast growth of manufacturing in many parts of what was originally the developing world, particularly in China and the rest of East Asia. On the other hand, countries in Africa and parts of Latin America have been largely left behind by this process of industrialisation. This volume aims to illuminate this uneven development and takes stock of the current issues that hinder and support industrialisation in low and middle income economies. This Handbook is a collection of chapters on different aspects of industrialisation experience in a range of countries. Key themes include, the role of manufacturing in growth, the nature of structural change at different stages of development, the role of manufacturing in employment creation, alternative options for trade and industrial policy, the key role of technology and technical change, and the impact of globalisation and the spread of global value chains and foreign direct investment on prospects for industrialisation. Several chapters discuss individual country experiences with examples from India, Mexico, South Africa and Tanzania, as well as an overview of African industrialisation. This authoritative Handbook will be a key reference source for those studying or wishing to understand contemporary economic development. Offering inspiration and direction for future research, this landmark volume will be of crucial importance to all development economics scholars and researchers.
