**Former Yugoslav Republic of Macedonia**

International Monetary Fund. European  
Dept., 2015-09-03 This Selected Issues paper  
analyzes export competitiveness in the Former  
Yugoslav Republic of Macedonia (FYR Macedonia).  
Export performance in FYR Macedonia has been  
strong over the last decade, critically  
contributing to overall growth. Exports have been  
re-oriented toward new products with higher  
technological content, allowing for the build-up  
of revealed comparative advantages in these  
products. The analysis based on Constant Market  
Share analysis shows that the overall  
competitiveness gap of FYR Macedonia with respect  
to other emerging European countries has narrowed.  
There appears to be significant room for quality  
improvement, including for the most successful  
export products. Although the contribution of  
exports to GDP growth has been significant,  
spillover into the domestic tradable sector from  
the foreign investment led export sector remains  
limited so far.

**Exchange Rate Choices of Microstates** Patrick  
Imam, 2010 In this paper we first explain why most  
microstates (countries with less than 2 million  
inhabitants) have gained independence only in the  
last 30 years. Despite the higher costs and risks  
microstates face, their ability to better  
accommodate local preferences combined with a more  
integrated world economy probably explains why the  
benefits of independence have risen. We explain  
why microstates at independence have chosen either  
dollarization, currency board arrangements, or  
fixed exchange rates rather than more flexible  
forms of exchange rate systems. We then, using the

Geweke-Hajvassiliou-Keane multivariate normal simulator, model empirically the determinants of each of the different fixed exchange rate regimes in microstates and analyze the policy implications.

**Eastern Europe** Steve Fallon, Peter Carney, 2001 Covering Albania, Bosnia, Bulgaria, Croatia, the Czech Republic, Hungary, Macedonia, Poland, Romania, Slovakia, Slovenia and Yugoslavia, this classic guide was the first to provide the vital, practical information necessary for independent travel in these countries. This edition contains over 150 detailed maps of countries, regions, cities, villages, updated historical and political background notes, useful words and phrases in 10 languages and details on border crossings, visas and local currencies.

Mediterranean Europe Janet Austin, 2001 Contains information on: the best places to eat and stay on any budget; a language guide with useful words and phrases in 12 essential languages; all the transport options, from high-speed rail in France to island-hopping in the Aegean; and the nitty-gritty on visas, borders and converting dirhams to drachmas.

**Floating Exchange Rates in Developing Countries** Peter J. Quirk, 1987-05-15 In recent years, an increasing number of developing countries have adopted market-determined floating exchange rates. This development has represented a significant step forward in the evolution toward exchange rate flexibility that has taken place in the developing country group since the adoption of generalized floating by industrial countries in 1973.

**Former Yugoslav Republic of Macedonia**

International Monetary Fund, 2012-06-08 This

Selected Issues Paper assesses Macedonia's public debt markets and presents recommendations for their further development. Macedonia's domestic debt market is in the early stages of development and is small by regional standards. The paper also analyzes the main causes of euroization in Macedonia. It discusses the nature of monetary policy in Macedonia where despite an exchange rate peg owing to imperfect capital mobility, there exists some degree of autonomy in the conduct of monetary policy in the short term.

*Albania* International Monetary Fund. European Dept.,2014-03-19 This 2013 Article IV Consultation for Albania focuses on economic developments and policies that have led to weakening and imbalance of the economy. It highlights that high nonperforming loans (NPLs) are constraining credit growth, and weak external drivers are preventing a sustained reduction in external imbalances. Reduction in NPLs would safeguard financial stability and help release credit supply constraints by lowering bank risk aversion. The authorities have requested a three-year arrangement with proposed access equivalent to SDR 295.42 million.

*bookdown* Yihui Xie,2016-12-12 bookdown:

Authoring Books and Technical Documents with R Markdown presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The bookdown package inherits the simplicity of syntax and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can number and cross-reference these elements with bookdown. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for examples in this book, but bookdown is not only for books or R. Most features introduced in this book also apply to other types

of publications: journal papers, reports, dissertations, course handouts, study notes, and even novels. You do not have to use R, either. Other choices of computing languages include Python, C, C++, SQL, Bash, Stan, JavaScript, and so on, although R is best supported. You can also leave out computing, for example, to write a fiction. This book itself is an example of publishing with bookdown and R Markdown, and its source is fully available on GitHub.
