The Advanced TEXbook David Salomon,2012-12-06 Why is 'lEX so hard to use? is the most frequent comment/complaint made by (frustrated) 'lEX users. The answer: Because it is programmable (has many features commonly found in programming languages), because it pays attention to detail, and because its creator has developed it for his own use (perhaps also his administrative assistant's) and not for general use. The material presented here is a direct result of this complaint and is an attempt to make it easier for inexperienced users to get the kind of high-quality typesetting that is possible with 'lEX. The material is based on classes taught since 1985, and on the author's personal experience with 'lEX, which includes writing three books and numerous articles, handouts, and letters. Both introductory and advanced material is included here. There are many examples as well as a detailed discussion of topics, such as \ valign and \emergencystretch, that are only briefly touched upon in The TpJXbook. Chapter 20 describes the macros used to typeset this book; it also lists the METAFONT programs for the special characters used.

The LaTeX Companion Frank Mittelbach,Michel Goossens,Johannes Braams,David Carlisle,Chris Rowley,Christine Detig,Joachim Schrod,2004 Provides information on the tools and techniques to transform LaTeX sources into Web formats for electronic publication and to transform Web sources into LaTeX documents for optimal printing.

IBM OS Assembler Language Donna N. Tabler,Ruth Ashley,Judi N. Fernandez,1986 Using a real-world, practical approach to the material, the third volume in this series covers subroutines, subprograms, macros and tables. Like its predecessors in this series, this self-teaching guide has a programmed-instruction format with objectives, exercises, reviews and applications questions. The book provides important information on coding generalized subroutines, passing data to generalized subroutines, copying source codes, assembling and linking subprograms, defining macros, controlling macro expansions, using an index register, programming for the sorted loading routine etc..
