The Complete Book of Ferns Mobee Weinstein, 2020-01-14 The Complete Book of Ferns is filled with botanical information, indoor and outdoor growing and care information, details on propagation, display ideas, and even craft projects. This gorgeous book is authored by Mobee Weinstein, the Foreman of Gardeners at the New York Botanical Garden in the Bronx and a veteran guest on the Martha Stewart Living TV show and other media outlets. Houseplants in general are in ascendance, but no category is hotter than ferns. From the otherworldly Staghorns—mounted like antler trophies in homes throughout the world—to the classic Boston Ferns and newer varieties like Crispy Wave, ferns are definitely back in fashion. And to no one's surprise. After all, ferns are among the very oldest plants on the planet, with a long and storied history. There are tens of thousands of known varieties of ferns. In the Victorian Era, ferns created an absolute craze for more than 50 years. They re-emerged as integral home décor accessories in the '50s and '60s, and who didn't spend time in a Fern Bar back in the '80s? And they are back again. This comprehensive reference starts its examination of

ferns 400 million years ago, when the first species of this group of spore-reproducing plants appeared on Earth, exploring their evolution and eventual incorporation into human culture, including the powers associated with them and their practical and ornamental uses. Then, after an exploration of fern botany—its parts, how it grows, its variability in size and form, habitats, propagation, etc.—you'll learn how to green your indoor and outdoor environments with ferns. Every aspect of fern care is covered: potting/planting, watering, fertilizing, pest and disease control, and more. With this knowledge absorbed, explore creative planting projects, like terrariums, vertical gardens (living walls), mixed tabletop gardens, and moss baskets. To make your survey of ferns complete, create pressed fern art, fabric wall hangings with chlorophyll-stained designs, cyanotypes, and hand-made fern-decorated paper. In the end, you will understand why this ancient plant class continues to be all the rage.

Sea Ports and Sea Power Lynn Harris, 2016-12-14 This volume represents a more Africanist approach to the framework of maritime landscapes and challenges of adapting international heritage policy such as the UNESCO convention. While the concept of a maritime landscape is very broad, a

more focused thematic strategy draws together a number of case studies in South Africa, Namibia, Tanzania, and Nigeria with a common thread. Specifically, the contributors address the sub-theme of sea ports and sea power as part of understanding the African maritime landscape. Sea ports and surrounds are dynamic centers of maritime culture supporting a rich diversity of cultural groups and economic activities. Strategic locations along the African coastline have associations with indigenous maritime communities and trade centers, colonial power struggles and skirmishes, establishment of naval bases and operations, and World War I and II engagements.

Technologies for Interactive Digital Storytelling and Entertainment Stefan Göbel, Ulrike Spierling, Anja Hoffmann, Ido Iurgel, Oliver Schneider, Johanna Dechau, Axel Feix, 2004-06-11 Interactive Digital Storytelling has evolved as a prospering research topic banding together formerly disjointed disciplines stemming from the arts and humanities as well as computer science. It's tied up with the notion of storytelling as an effective means for the communication of knowledge and social values since the existence of humankind. It also builds a bridge between current academic trends

investigating and formalizing computer games, and developments towards the experience-based design of human-media interaction in general. In Darmstadt, a first national workshop on Digital Storytelling was organized by ZGDV e.V. in 2000, which at that time gave an impression about the breadth of this new research field for computer graphics (DISTEL 2000). An international follow-up was planned: the 1st International Conference on Technologies for Interactive Digital Storytelling and Entertainment (TIDSE 2003). Taking place in March 2003, it showed a more focussed range of research specifically on concepts and first prototypes for automated storytelling and autonomous characters, including modelling of emotions and the user experience. At TIDSE 2004, an established and still-growing community of researchers gathered together to exchange results and visions. This confirms the construction of a series of European conferences on the topic – together with the International Conference on Virtual Storytelling, ICVS (conducted in 2001 and 2003 in France) – which will be further cultivated.

Ferns Mini Mobee Weinstein, 2020-09 Part of the Cool Springs Press mini series of garden-related

books, *Ferns mini* offers the same inspirational and useful content as *The Complete Book of Ferns* in a smaller, giftable format. Filled with botanical information, indoor and outdoor growing and care information, details on propagation, display ideas, and even craft projects, this book is a small but complete tribute to the mighty fern. From the classic Boston Fern to newer varieties like trendy Crispy Wave, ferns are back in fashion and in demand for both indoor and outdoor planting. Among the very oldest plants on the planet, ferns have a long and storied history and there are thousands of known varieties globally. Authored by Mobee Weinstein, the Foreman of Gardens at the New York Botanical Garden in Brooklyn and a veteran guest on the Martha Stewart Living TV show and other media outlets, the book covers everything from the powers associated with ferns to their practical and ornamental uses. Every aspect of fern care is covered: potting/planting, watering, fertilizing, pest and disease control, and more. Also included are fun and creative planting projects, like terrariums, vertical gardens (living walls), mixed tabletop gardens, and moss baskets, as well as pressed fern art, fabric wall hangings with chlorophyll-stained designs, cyanotypes, and hand-made fern-decorated paper. In

this beautiful little book, learn why this great, ancient plant class continues to capture our attention.

Nigeria Lizzie Williams, 2008 Despite its negative image, for travelers with an open mind and friendly demeanor Nigeria is an incredibly absorbing country in which to travel. Experience the mind-boggling chaos of Lagos, the traditional durbars, Benin bronzes and walled cities, and enjoy its single greatest quality – the warm generosity of 140 million people. Details of getting around, by bush taxi, rail, car or on foot, together with accommodations options, wildlife watching and activities, are balanced by a wealth of background information, from history (of a country dating back thousands of years) and geography to culture and the environment.

Instrument Engineers' Handbook, Volume 3 Bela G. Liptak, Halit Eren, 2016-04-19 Instrument Engineers' Handbook – Volume 3: Process Software and Digital Networks, Fourth Edition is the latest addition to an enduring collection that industrial automation (AT) professionals often refer to as the bible. First published in 1970, the entire handbook is approximately 5,000 pages, designed as standalone volumes that cover the measurement (Volume 1), control (Volume 2), and software

(Volume 3) aspects of automation. This fourth edition of the third volume provides an in-depth, state-of-the-art review of control software packages used in plant optimization, control, maintenance, and safety. Each updated volume of this renowned reference requires about ten years to prepare, so revised installments have been issued every decade, taking into account the numerous developments that occur from one publication to the next. Assessing the rapid evolution of automation and optimization in control systems used in all types of industrial plants, this book details the wired/wireless communications and software used. This includes the ever-increasing number of applications for intelligent instruments, enhanced networks, Internet use, virtual private networks, and integration of control systems with the main networks used by management, all of which operate in a linked global environment. Topics covered include: Advances in new displays, which help operators to more quickly assess and respond to plant conditions Software and networks that help monitor, control, and optimize industrial processes, to determine the efficiency, energy consumption, and profitability of operations Strategies to counteract changes in market conditions and energy and raw material costs Techniques

to fortify the safety of plant operations and the security of digital communications systems This volume explores why the holistic approach to integrating process and enterprise networks is convenient and efficient, despite associated problems involving cyber and local network security, energy conservation, and other issues. It shows how firewalls must separate the business (IT) and the operation (automation technology, or AT) domains to guarantee the safe function of all industrial plants. This book illustrates how these concerns must be addressed using effective technical solutions and proper management policies and practices. Reinforcing the fact that all industrial control systems are, in general, critically interdependent, this handbook provides a wide range of software application examples from industries including: automotive, mining, renewable energy, steel, dairy, pharmaceutical, mineral processing, oil, gas, electric power, utility, and nuclear power.

Of Africa Wole Soyinka,2012-11-01 A member of the unique generation of African writers and intellectuals who came of age in the last days of colonialism, Wole Soyinka has witnessed the promise of independence and lived through postcolonial failure. He deeply comprehends the pressing problems of Africa, and, an irrepressible essayist and a staunch critic of the oppressive boot, he unhesitatingly speaks out. In this magnificent new work, Soyinka offers a wide-ranging inquiry into Africa's culture, religion, history, imagination, and identity. He seeks to understand how the continent's history is entwined with the histories of others, while exploring Africa's truest assets: its humanity, the quality and valuation of its own existence, and modes of managing its environment—both physical and intangible (which includes the spiritual). Fully grasping the extent of Africa's most challenging issues, Soyinka nevertheless refuses defeatism. With eloquence he analyzes problems ranging from the meaning of

the past to the threat of theocracy. He asks hard questions about racial attitudes, inter-ethnic and religious violence, the viability of nations whose boundaries were laid out by outsiders, African identity on the continent and among displaced Africans, and more. Soyinka's exploration of Africa relocates the continent in the reader's imagination and maps a course toward an African future of peace and affirmation.

The Interpreter's Third Paul Tarsleh, 2020-03-23 The book is about rulers of a world in which no buying and selling exist. It's a world in which government systems have originated to be on earth. These two systems (Money and government systems) that constitute how our world is run today continue to impose sufferings unto mankind so much so that humanity is deprived of the peace and joy that God promised humankind. Under money system, every human being is not freely receiving, while government system also tends to put humanity at loggerhead, whereas democracy/capitalism battles down communism/socialism in our world of today's activities.

Routledge Companion to Global Heritage Conservation Vinayak Bharne,Trudi

Sandmeier,2019-02-12 The act of identifying, protecting, restoring, and reusing buildings, districts, and built landscapes of historic and cultural significance is, at its best, a reflective and consequential process of urban and socio-economic reform. It has the potential to reconcile conflicting memories, meanings, and cultural tensions, bridging and expanding the perceived boundaries of multiple disciplines towards bigger aspirations of city-making and social justice. How and where do such

aspirations overlap and differ across nations and societies across the world? In places with different histories, governance structures, regulatory stringency, and populist dispositions, who are the specific players, and what are the actual processes that bring about bigger and deeper change beyond just the conservation of an architectural or urban entity of perceived value? This collection of scholarly articles by theorists, academics, and practitioners explores the global complexity, guises, and potential of heritage conservation. Going from Tokyo to Cairo, Shenzhen to Rome, and Delhi to Moscow, this volume examines a vast range of topics – indigenous habitats, urban cores, vernacular infrastructure, colonial towns, squatters, burial sites, war zones, and modern landmarks. It surfaces numerous inherent issues – water stress, deforestation, social oppression, poverty, religion, immigration, and polity, expanding the definitions of heritage conservation as both a professional discipline and socio-cultural catalyst. This book argues that the intellectual and praxis limits of heritage conservation – as the agency of reading, defining, and intervening with built heritage – can be expansive, aimed at bigger positive change beyond a specific subject or object; plural, enmeshed with multiple fields and

specializations; and empathetic, born from the actual socio-political realities of a place.

Evil Relations (formerly published as Witness) Carol Ann Lee,David Smith,2012-04-20 The chief prosecution witness in the Moors Murders trial gives his account of the case after more than four

decades of silence Despite standing as chief prosecution witness in the Moors Murders trial, David Smith was vilified by the public due to the accusations thrown at him by Myra Hindley and Ian Brady about his involvement in their crimes. Hindley's later confession that she and Brady had lied in an attempt to reduce their sentences did little to diminish the slurs against his name. For over four decades, Smith was asked by writers and film-makers to tell his story. Apart from a handful of brief interviews, he always refused. Carol Ann Lee met Smith during her research for *One of Your Own*, her critically acclaimed biography of Hindley, following which he finally agreed to reveal all. In *Evil Relations* (previously published as *Witness*), interviews, archival research and, most significantly, David Smith's own vivid memoir are fused to create an unforgettable, often harrowing account of his life before, during and after the Moors Murders. David Smith lived in rural Ireland with his wife prior to his death in May 2012. He is survived by four children and several grandchildren. Carol Ann Lee is an acclaimed biographer and has written extensively on the Holocaust. Her most recent publication, *One of Your Own*, focused on the life and death of Myra Hindley.
