Quick Start Guide to Dart Programming Sanjib Sinha, 2019-12-28 Get started with Dart and learn to program with this language suitable for high-performing, modern applications. You'll gain the basics and be ready to move to the next level: web and mobile apps. While you won't learn the specifics of programming web and mobile apps, you will have the foundation to take your Dart skills in that direction. This book starts with an introduction to the Dart IDE, after which you will take a look at the various components of the Dart programming language. You will look at types and variables, and get to know the significance of collections and arrays in Dart. Once you've familiarized yourself with the initial components of Dart, you will see how flow of control and looping can be achieved by using if, else, and conditional expressions. Moving on to functions and objects, you will dig deeper into the concepts of object oriented programming to gauge the importance of constructors in Dart. You will then discover more about inheritance and mixins, seeing how they contain methods for use by other classes. After gauging the importance of abstract classes and methods, you will learn more about anonymous functions such as lambdas and closures. You will then take a look at key data structures including lists and maps to aid you in organizing your information for storage and retrieval. After all this you'll move on to managing exceptions arising from executing your program. Finally, Dart programming relies heavily on libraries to perform a variety of functions. You will cover some of these packages and libraries, including dart:core and dart:math, and also build a backend server with the help of the Dart core libraries. What You Will Learn Use variables and conditionals in DartWork with arrays and collections Apply flow control and loopingExplore data structures and their useHandle exceptionsUse Dart packages and libraries to build a backend server Who This Book Is For Those new to Dart programming who aim to get a quick introduction to its concepts and programming principles. Readers with no coding experience can also take advantage of this book.

Kinematic Labs with Mobile Devices Jason M. Kinser, 2015-07-01 As technology advances, education has expanded from the classroom into other formats including online delivery, flipped classrooms and hybrid delivery. Congruent with these is the need for alternative formats for laboratory experiences. This explosion in technology has also placed in the hands of a majority of students a sensor suite tucked neatly into their smartphones or smart tablets. The popularity of these devices provides a new avenue for the non-traditional kinematic lab experience. This book addresses this issue by providing 13 labs spanning the common topics in the first semester of university-level physics. Each lab is designed to use only the student's

smartphone, laptop and items easily found in big-box stores or a hobby shop. Each lab contains theory, set-up instructions and basic analysis techniques. All of these labs can be performed outside of the traditional university lab setting and initial costs averaging less than \$8 per student, per lab, excluding the smartphone and laptop.

The Outrageous and Completely Untrue History of the Sport of Darts Paul Seigel, 2010-06-25 More than anyone, Dartoid has found a way to capture the spirit of the ever-evolving sport of darts – from its roots amidst the smoke and camaraderie of the pub to the spotlight of the professional stage where darts is a business and the very best can earn hundreds of thousands of dollars a year. 2008 – The Year in Darts is a good read, a solid history, and certain to bring many smiles along the way. UK Darts tournament results Nigel Boeg, 2019-05-11 This book provides details of the dart tournament results within the UK. The tournaments are located in England, Northern Ireland, Republic of Ireland, Scotland and Wales. Besides tournament results, there are useful links to various dart websites for County darts, links to country's dart associations, dart manufacturers and a bibliography of books and magazines published on darts.

Benelux Darts Tournament Results Nigel Boeg, 2019-06-16 This book has been compiled to provide details of tournament winners and runners up on Benelux tournaments – Belgium, Netherlands, and Luxembourg. Every effort has been used to identify winners and runners up of tournaments and in some cases there will be results “missing”. If these can be identified they will be included in another edition of this book in the future. There maybe errors with names being misspelt and that ladies surnames may have changed but I've put in an enormous time and effort to correctly record the results of the tournaments. There are probably other tournaments that have been played in these countries but I've only been able to identify these ones. Research that has been completed for this book is to provide the reader and dart enthusiast information on books and links to web sites of dart manufacturers, Professional Bodies and Organisations, dart stores, and Country Darts Organisations. This is not a comprehensive list but it begins the work of collating details of darts into one place instead of being scattered around the World Wide Web across many sites and publications.
