Studying Mobile Media Larissa Hjorth, Jean Burgess, Ingrid Richardson, 2012-04-23 The iPhone represents an important moment in both the short history of mobile media and the long history of cultural technologies. Like the Walkman of the 1980s, it marks a juncture in which notions about identity, individualism, lifestyle and sociality require rearticulation. This book explores not only the iPhone's particular characteristics, uses and affects, but also how the iPhone moment functions as a barometer for broader patterns of change. In the iPhone moment, this study considers the convergent trajectories in the evolution of digital and mobile culture, and their implications for future scholarship. Through the lens of the iPhone—as a symbol, culture and a set of material practices around contemporary convergent mobile media—the essays collected here explore the most productive theoretical and methodological approaches for grasping media practice, consumer culture and networked communication in the twenty-first century.

Keeping Up with Emerging Technologies Nicole Hennig, 2017-06-21 The acceleration of technological change demands that today's information professionals and educators

not only be constantly acquiring new knowledge and skills, but also that they cultivate the ability to make sound judgments on which technologies to embrace. Today's librarians and information specialists know it's imperative that they keep up with new technologies. But not all technologies are equally important, either within the library setting or to library patrons. So how does one decide which ones to pursue and integrate into services? In the uphill battle to stay current with new and emerging technologies, deciding which ones to pursue and integrate into services is a major challenge. A secondary problem is simply finding the time to consider the question. Readers of *Keeping Up with Emerging Technologies* will learn all of the best practices and skills to keep up with new technologies and to analyze the ability of specific technologies to meet recognized user needs—all in this single source. You'll learn the best ways to gather information about new technologies and user needs, to evaluate and analyze information, to curate technology information for others, to set up experiments and evaluate the results, and to present your findings to persuade decision-makers. Written by the former head of user experience at MIT's library system, this guidebook serves information professionals, educators, education technology specialists, and anyone with emerging technology or innovation in their job titles. It will also be useful for library administrators and those who manage these positions as well as for students seeking a technology-oriented or curriculum-design career path in libraries.
