The Chicago Guide to College Science Teaching Terry McGlynn,2020-11-09 Higher education is a strange beast. Teaching is a critical skill for scientists in academia, yet one that is barely touched upon in their professional training—despite being a substantial part of their career. This book is a practical guide for anyone teaching STEM-related academic disciplines at the college level, from graduate students teaching lab sections and newly appointed faculty to well-seasoned professors in want of fresh ideas. Terry McGlynn’s straightforward, no-nonsense approach avoids off-putting pedagogical jargon and enables instructors to become true ambassadors for science. For years, McGlynn has been addressing the need for practical and accessible advice for college science teachers through his popular blog Small Pond Science. Now he has gathered this advice as an easy read—one that can be ingested and put to use on short deadline. Readers will learn about topics ranging from creating a syllabus and developing grading rubrics to mastering online teaching and ensuring safety during lab and fieldwork. The book also offers advice on cultivating productive relationships with students, teaching assistants, and colleagues.

Leveraging Mobile Media Valerie Feldmann,2006-03-30 Mobile communications and next generation wireless networks emerge as new distribution channels for the media. This development offers exciting new opportunities for media companies: the mobile communication system creates new usage contexts for media content and services; the social use of mobile communications suggests that identity representation in social networks, impulsive access to trusted media brands, and micro-coordination emerge as new sources of value creation in the media industries. In the light of this background, this book takes two different viewpoints on the development of mobile media: from a competitive strategy point of view it analyzes the extension of cross-media strategies and the emergence of cross-network strategies; from a public policy point of view it develops demands and requirements for an innovation policy that fosters innovation in mobile media markets.

Artists' Multiples, 1935–2000 Stephen Bury,2001 The artist's multiple is perhaps the art of the twentieth century. If in the nineteenth century art could be seen as distinct from products of industry, in the early twentieth century industry could confidently project itself as art. The artist's multiple, in its delight in reproducibility, industrial fabrication, and new processes and materials, exemplifies this trend. Stephen Bury explores the historical background of the multiple, examining its relationship to the jeu d' esprit of the artist's studio, the readymade, constructivism, the store and the everyday. It looks at the work of Marcel Duchamp, George Maciunas, Joseph Beuys and Felix Gonzalez-Torres as well as contemporary practice, such as 'The Multiple Store'.An illustrated and chronologically arranged catalogue of over 800 multiples produced between 1935 and 2000 provides a wide selection of different approaches by artists to the medium. A chronology, glossary and detailed bibliography are also included.
