The Datafication of Education Juliane Jarke, Andreas Breiter, 2020-05-21 This book attends to the transformation of processes and practices in education, relating to its increasing digitisation and datafication. The introduction of new means to measure, capture, describe and represent social life in numbers has not only transformed the ways in which teaching and learning are organised, but also the ways in which future generations (will) construct reality with and through data. Contributions consider data practices that span across different countries, educational fields and governance levels, ranging from early childhood education, to schools, universities, educational technology providers, to educational policy making and governance. The book demonstrates how digital data not only support decision making, but also fundamentally change the organisation of learning and teaching, and how these transformation processes can have partly ambivalent consequences, such as new possibilities for participation, but also the monitoring and emergence/manifestation of inequalities. Focusing on how data can drive decision making in education and learning, this book will be of interest to those studying both educational technology and educational policy making. The chapters in this book were originally published in *Learning, Media and Technology*. Chapter 4 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

Digital Transformation in Cloud Computing Alibaba Cloud Intelligence GTS, 2022-06-13 With the rapid development of cloud computing and digital transformation, well-designed cloud-based architecture is always in urgent need. Illustrated by project cases from the Chinese technology company Alibaba, this book elaborates how to design a cloud-based application system and build them on the cloud. Cloud computing is far from being just a resource provider; it offers database, storage and container services that can help to leverage key advantages for business growth. Based on this notion, authors from the Alibaba Cloud Global Technology Services introduce

new concepts and cutting-edge technology in the field, including cloud-native, high-availability and disaster tolerance design on cloud, business middle office, data middle office, and enterprise digital transformation. Resting upon Alibaba's years of practice and achievements in the field of cloud technology, the volume also elucidates the methodology and practice solutions of digital construction, including methodology, product tools, technical processes, architecture design, cloud application capacity assessment and optimization, etc. The book will appeal to researchers, students, and especially IT practitioners, professionals, and managers interested in cloud computing, digital transformation, cloud migration, business middle office, data middle office, as well as the Alibaba Cloud itself.

Customization 4.0 Stephan Hankammer, Kjeld Nielsen, Frank T. Piller, Günther Schuh, Ning Wang, 2018-06-20 This proceedings volume presents the latest research from the worldwide mass customization & personalization (MCP) community bringing together new thoughts and results from various disciplines within the field. The chapters are based on papers from the MCPC 2017. The book showcases research and practice from authors that see MCP as an opportunity to extend or even revolutionize current business models. The current trends of Industrie 4.0, digital manufacturing, and the rise of smart products allow for a fresh perspective on MCP: Customization 4.0. The book places a new set of values in the centre of the debate: a world with finite resources, global population growth, and exacerbating climate change needs smart thinking to engage the most effective capabilities and resources. It discusses how Customization 4.0 fosters sustainable development and creates shared value for companies, customers, consumers, and the society as a whole. The chapters of this book are contributed by a wide range of specialists, offering cutting-edge research, as well as insightful advances in industrial practice in key areas. The MCPC 2017 has a strong focus on real life MCP applications, and this proceedings volume reflects this. MCP strategies aim to profit from the fact that people are different. Their objective is to turn customer heterogeneities into opportunities, hence addressing "long tail" business models. The objective of MCP is to provide goods and services that best serve individual customers' needs with near mass production efficiency. This proceedings volume highlights the interdisciplinary work of thought leaders, technology developers, and researchers with corporate entrepreneurs putting these strategies into practice. A History of Psychiatry Edward Shorter, 1998-03-03 PPPP . . . To compress 200 years of psychiatric theory and practice into a compelling and coherent narrative is a fine achievement . . . . What strikes the reader [most] are Shorter's storytelling skills, his ability to conjure up the personalities of the psychiatrists who shaped the discipline and the conditions under which they and their patients lived.--Ray Monk The Mail on Sunday magazine, U.K. An opinionated, anecdote-rich history. . . . While psychiatrists may quibble, and Freudians and other psychoanalysts will surely squawk, those without a vested interest will be thoroughly entertained and certainly enlightened.--Kirkus Reviews. Shorter tells his story with immense panache, narrative clarity, and genuinely deep erudition.--Roy Porter Wellcome Institute for the History of Medicine. In A History of Psychiatry, Edward Shorter shows us the harsh, farcical, and inspiring realities of society's changing attitudes toward and attempts to deal with its mentally ill and the efforts of generations of scientists and physicians to ease their suffering. He paints vivid portraits of psychiatry's leading historical figures and pulls no punches in assessing their roles in advancing or sidetracking our understanding of the origins of mental illness. Shorter also identifies the scientific and cultural factors that shaped the development of psychiatry. He reveals the forces behind the unparalleled sophistication of psychiatry in Germany during the eighteenth and nineteenth centuries as well as the emergence of the United States as the world capital of psychoanalysis. This engagingly written, thoroughly researched, and fiercely partisan account is compelling reading for anyone with a personal, intellectual, or professional interest in psychiatry.
