*Electronic Government* Roland Traunmüller, Klaus Lenk, 2003-08-02 In defining the state of the art

of E-Government, EGOV 2002 was aimed at breaking new ground in the development of innovative solutions in this important field of the emerging Information Society. To promote this aim, the EGOV conference brought together professionals from all over the globe. In order to obtain a rich picture of the state of the art, the subject matter was dealt with in various ways: drawing experiences from case studies, investigating the outcome from projects, and discussing frameworks and guidelines. The large number of contributions and their breadth testify to a particularly vivid discussion, in which many new and fascinating strands are only beginning to emerge. This begs the question where we are heading in the field of E-Government. It is the intention of the introduction provided by the editors to concentrate the wealth of expertise presented into some statements about the future development of E-Government.

## Knowledge Management in Electronic Government

Maria A. Wimmer, 2003-08-03 The importance of Knowledge Management (KM) is increasingly recognized in business and public sector domains. The latter is particularly suitable for KM implementations since it deals with information and knowledge resources at a large scale: much of the work of public authorities deals with the elaboration of data, information and knowledge on citizens, businesses, society, markets, the environment, law, politics, etc. Even most products of public administration and government work are delivered in the shape of information and knowledge themselves. This especially applies to policies, management, and the regulation and monitoring of society, markets and the environment. Governments expect advanced support from KM concepts and tools to exploit these huge knowledge and information resources in an efficient way. Not only does the trend towards a knowledge society call for KM solutions, but current e government developments also significantly influence the public sector. Ample access to remote information and knowledge resources is needed in order to facilitate: Citizen and businesses oriented service delivery, including one stop service provision; interorganizational co operation between governmental agencies; cross border support for complex administrative decision making; e government integration of dislocated information and knowledge sources into a fabric of global virtual knowledge.

Voices from the Classroom: A Celebration of Learning Vana Chiou, Lotte Geunis, Oliver Holz, Nesrin Oruç Ertürk, Fiona Shelton, 2021 *Voices from the Classroom* illustrates that teachers have a leading voice in the policies that impact their students and the profession of teaching. The aim is to provide a rich and broad view of the impact of inquiry in the classrooms, from primary to higher education, and to provide a window into the perspective of teachers. *Voices from the Classroom* allows us to advance this mission by identifying and then turning educators' ideas into action. The publication includes chapters on issues ranging from dyslexic students' geospatial abilities to teachers' differential behaviours related, student characteristics and the experiences of refugees with bullying in the educational space. All the contributions published in this book emerged from real classrooms: our teachers and researchers conducted their research by drawing on their experience as educators. We believe that these insights into everyday classrooms, and the issues affecting them, are crucial to making teaching and learning better. We hope they can help drive real, positive change for students and teachers.

### **Critical Thinking** Dirk Jahn, Michael

Cursio, 2024-01-10 Judgment and critical faculties are central concerns of many Western educational programs. However, the promotion of critical thinking requires specifically developed and didactically coherent concepts. This book therefore attempts to provide a philosophically and empirically sound as well as application-oriented introduction to the concept and didactics of critical thinking. Especially the higher education space is defined by critically questioning knowledge and practice and thereby producing new insights. Against the background of this task horizon, the theoretical foundations of critical thinking as well as didactic practice strategies for its promotion are conveyed in a low-threshold manner within the framework of the introductory volume, which can be adapted across subjects.

### **Elements of Controversy** Barton C.

Hacker, 1994-01-01 Unforgettable congressional hearings in 1978 revealed that fallout from American nuclear weapons testing in the 1950s had overexposed hundreds of soldiers and other citizens to radiation. Faith in governmental integrity was shaken, and many people have assumed that such overexposure caused great damage. Yet important questions remain--the most controversial being: did the radiation overexposure in fact cause the cancers and birth defects for which it has been blamed? Elements of Controversy is the result of a decade of exhaustive research in AEC documentary records and the full clinical and epidemiological literature on radiation effects.

More concerned with uncovering the historical story than with assigning blame, Barton Hacker concludes that every precaution was taken by the AEC to avoid harming test participants or bystanders. And, he points out, the biomedical literature suggests that these precautions worked. Yet top officials in Washington--for whom the success of nuclear weapons was of overriding importance--had asserted that testing involved no risks at all. Discrepancies between unverifiable government claims and the revelations that some actual risk was present explain the origins and angry persistence of the controversies, Hacker argues. The Department of Energy delayed publication of Hacker's study for five years, and while his controversial book is sure to draw objections from both sides of the radiation-hazard debates, it will provide a much-needed guide to understanding their polemics. **How to Get to the Top of Google Search** Richard Conway, 2019-03-05 Anyone trying to sell anything wants potential customers to be able to find them straight away when searching online. This book tells them how. It has been written by a professional search engine consultant. Richard Conway started his company, Pure SEO, in 2009 with just \$200 to spend on a single web page. From there, mostly using digital marketing, he has expanded the business to four offices in New Zealand and Australia. Pure SEO has been listed by Deloitte in the fastest-growing 500 tech companies in the Asia Pacific region for the past five years. This practical guide cuts through the misinformation and sets the record straight on what actions you need to take, so searchers will find your product quickly and easily. It covers keywords, website content and structure, mobile search and optimisation, loading speed of your website and how that affects searches, planning content to make it easily searchable, tracking tools and much much more. With Australasian-focused statistics and insights, as well as advice about how these two markets differ, the book is an authoritative and accessible 'how to' resource. Case studies and Q&A sections provide real-life dos and don'ts. As well as actionable advice and 'red flags' to avoid, the book also looks ahead to consider the future of search marketing.

**Moon Living Abroad New Zealand** Michelle Waitzman, 2016-01-12 Author and educator Michelle Waitzman first visited New Zealand in 1998—and she's been hooked ever since. Now a New Zealand

*Mobile World* Lynne Hamill, 2005-07-13 This book brings together the perspectives of key researchers to explore lessons on social shaping, examining what can be learned from the adoption of mobile devices that can be applied to other, newer, digital technologies. Forecasting the impact of new technology is always difficult. Occasionally demand is underestimated, but more often it is overestimated, & at great cost. Digital technology is unlike anything that has gone before, making it particularly difficult to understand its implications for businesses, public services & society in general. By looking at what has happened in the past & now, & offering methods of using this knowledge to look forward, this book

will contribute to reducing expensive forecasting errors in the future. Key reading for all those involved with the future of mobile communications, this book is a valuable resource, particularly for advanced undergraduates & postgraduates on Mobile Technology courses, practitioners, & researchers working in mobile communications, CSCW & HCI.
