*Smartphone Filmmaking* Max Schleser, 2021-08-26 Mobile, smartphone and pocket filmmaking is a global phenomenon with distinctive festivals, filmmakers and creatives that are defining an original film form. *Smartphone Filmmaking: Theory and Practice* explores diverse approaches towards smartphone filmmaking and interviews an overview of the international smartphone filmmaking community. Interviews with smartphone filmmakers, entrepreneurs, creative technologists, storytellers, educators and smartphone film festival directors provide a source of inspiration and insights for professionals, emerging filmmakers and rookies who would like to join this creative community. While not every story might be appropriate to be realized with a mobile device or smartphone, if working with communities, capturing locations or working in the domain of personal or first-person filmmaking, the smartphone or mobile device should be considered as the camera of choice. The mobile specificity is expressed through accessibility, mobility and its intimate and immediate qualities. These smartphone filmmaking-specific

characteristics and personal forms of crafting experiences contribute to a formation of new storytelling approaches. Stylistic developments of vertical video and collaborative processes in smartphone filmmaking are evolving into hybrid formats that resonate in other film forms. This book not only develops a framework for the analysis of smartphone filmmaking but also reviews contemporary scholarship and directions within the creative arts and the creative industries. *Smartphone Filmmaking: Theory and Practice* initiates a conversation on current trends and discusses its impact on adjacent disciplines and recent developments in emerging media and screen production, such as Mobile XR (extended reality).

**Constructing Music** Teresa M. Nakra, 2024-01-23 Why does music exert such a strong pull on us? How does it work? Traditional courses in music fundamentals give students a basic understanding of the building blocks of music and how to put them together to make a result that produces an intended effect. Constructing Music: Musical

Explorations in Creative Coding takes students a step further: through a series of step-by-step tutorials and lessons, author Teresa M. Nakra presents a new method for teaching music fundamentals that foregrounds creative coding practices and builds upon the computing skills that today's students already possess. By encouraging experimentation with computer code, this book gives students tools to actively investigate, simulate, and engage with the structure of music, ultimately leading to greater understanding about the processes that underlie music's power over us. Designed to support computer-based learning in tonal harmony, musicianship, and music theory, *Constructing Music* avoids the lens of Western music notation and instead explains music content through analogies with toy bricks and references ideas from creative technology, engineering, and design. Students also engage directly with the components of musical structure using editable short code patches developed in Max, a visual coding environment for interactive music, audio, and media. Dozens of patches accompany the book and allow readers to play with the building blocks of sound, reinforcing each topic by tinkering, modifying, and creating their own versions of the material. Each chapter explains core music theory concepts in detail and supports every description through code simulations, progressing through the topics with increasing complexity. In the final chapter, Nakra explores the questions and theories that emerge from the lessons, considering the role of music as a proto-form of AI and its impacts on emotion, wellness, and creativity.

Burton, 2021-02-02 Students are drawn to mobile technologies such as iPads and smartphones because of the sheer endless possibilities of the digital worlds they hold. But

Countering voices that see digital technologies as a threat to traditional forms of music making and music education, this collection explores the many ways in which hand-held devices can be used to promote student learning and provides teachers with guidance on making them a vital presence in their own classrooms. *Creative Music Making at Your Fingertips* features 11 chapters by music education scholars and practitioners that provide tried-and-true strategies for using mobile devices in a variety of contexts, from general music education to ensembles and from K-12 to college classrooms. Drawing on their own experiences with bringing mobile devices and different music apps into the classroom, contributors show how these technologies can be turned into tools for teaching performance, improvisation, and composition. Their practical advice on how pedagogy and mobile technologies can be aligned to increase students' creative engagement with music and help them realize their musical potential makes this book an invaluable resource for music educators who want to be at the forefront of pedagogical transformations made possible by 21st-century technologies.

In *OuterSpeares: Shakespeare, Intermedia, and the Limits of Adaptation*, noted scholars of Shakespeare and new media consider the ways in which various media affect how we understand Shakespeare and his works. Daniel Fischlin and his collaborators explore a wide selection of adaptations that occupy the space between and across traditional genres — what artist Dick Higgins calls "intermedia" — ranging from adaptations that use social networking, cloud computing, and mobile devices to the many handicrafts branded and sold in connection with the Bard. With essays on YouTube and iTunes, as well as radio, television, and film, *OuterSpeares* is the first book to examine the full spectrum of past and present adaptations, and one that offers a unique perspective on the transcultural and transdisciplinary aspects of Shakespeare in the contemporary world.
