Breathing in Bodhi – the General Awareness/ Comprehension book – Life Skills/ Level 2 for the avid readers Disha Experts,2017-09-01 The paradigm shift in the field of education focuses on the development of life skills, attitudes and values. This was the prime focus which made us divide this series into two themes: LIFE SKILLS and ATTITUDES & VALUES. Each theme strongly voices out in three levels - beginners, the avid readers and the experts making it a six book series. The book Breathing in Bodhi - the General Awareness/ Comprehension book - Life Skills/ Level 2 for the avid readers is the second of the three books based on the Life Skills theme. • The book contains 30 fascinating stories about People, Places, Events, Ideas and Issues. The stories are further based on Life Skills - 10 each on Thinking, Social and Emotional Skills. • The book aims at enhancing the comprehension skills along with augmenting the general awareness of children leading to the development of the precious Life Skills. • The book is an honest attempt to trigger the young minds to think, explore and relate to the world around them. It makes them THINK, COMPREHEND AND ANALYZE. The articles given for the comprehension purpose are actually in sync to the real world. • Each story has been elaborately discussed and is analysed by the following tools: • Wordsmith - aims at developing the vocabulary and contextual usage of words. • Finding the Fact - aims at developing the comprehension skills • Extra Inning - gives an opportunity to the reader to explore the extra information related to the story. • Reality Check - a platform to create opinions about the various issues related to the story. • Only when the reader is in a position to generate thoughts/ opinions about a given situation/ issue then only he is in a position to provide a real solution model. • This series is a must have for people who not only want to build in their reading habit and develop their vocabulary but also want to enroot an eye for comprehending, analyzing and transforming their approach from problem finders towards becoming PROBLEM SOLVERS by reinforcing the power of Life Skills.

Find cell phones' area online by cell tower triangulation utilizing LAC (Location Area Code) and Celled from PC, iphone or Androide phone. Cell tower triangulation utilizes the LAC and Cellid to focus the position of a cellular smartphone. With information from no less than three cell towers, this strategy can ascertain a handset's area exactly. Each one base station covers a certain region, the more cell towers in your general vicinity, the more precise result it delivers. So the thickness of cell towers decides the precision. For the most part, the thickness is higher in the urban zones particularly at downtown. While in country territories, where there are less cell towers, the result is less precise. Health Systems Resilience Index: A Sub-National Analysis of India's COVID-19 Response Debosmita Sarkar,Soumya Bhowmick,Renita D'Souza,Oommen C. Kurian,2022-07-22 India's COVID-19 battle will be told and retold in the coming years, inspiring both praise for what the country has achieved, and critique for its shortfalls. As India's story continues to unfold, two strands will mould the various assessments. First is India's aggregate performance as a developing economy: It marshalled its meagre resources to respond to the exponential threat of the virus, and was determined, too, to be part of global solutions to this scourge, such as the manufacture and supply of life-saving vaccines. The second, and perhaps even more important story is on ground-zero: In its cities and villages, India's success or failure would be a factor of the leadership and stewardship of Prime

Minister Narendra Modi and his team in responding to the crisis, and the commitment of the chief ministers and state functionaries to beef up their health systems and save lives. Whichever way the India story is told, there are certain truths that cannot be hidden: We need to invest more in our health systems, and acknowledge the stellar role of our frontline workers and formal and informal health sector personnel, as well as India's prowess in certain segments of the medical and health industry. In this context, it becomes interesting to see how in the country's federal structure (where health is a State subject), the sub-national units—i.e., states and union territories (UTs)—have performed. The present work, Health Systems Resilience Index: A Sub-National Analysis of India's COVID-19 Response, provides answers to that question. It builds on an earlier report published by the Observer Research Foundation in May 2020. That report, State of the States: Two Months of the Pandemic, evaluated India's initial response to the pandemic shortly after the crisis was officially named by the World Health Organization (WHO). Two years since then, this report attempts a more ambitious goal: to devise a unique Resilience Index for the health systems of India's states and UTs.

The 2015 Brookings Financial and Digital Inclusion Project Report John Villasenor,Darrell West,Robin Lewis,2015-10-06 The 2015 Brookings Financial and Digital Inclusion Project (FDIP) Report and Scorecard evaluate access to and usage of affordable financial services across 21 geographically and economically diverse countries. The 2015 FDIP Report and Scorecard seek to answer a set of fundamental questions about today's global financial inclusion efforts, including: 1) Do country commitments make a difference in progress toward financial inclusion?; 2) To what extent do mobile and other digital technologies advance financial inclusion?; and 3) What legal, policy, and regulatory approaches promote financial inclusion? John D. Villasenor, Darrell M. West, and Robin J. Lewis analyzed the financial inclusion landscape in Afghanistan, Bangladesh, Brazil, Chile, Colombia, Ethiopia, India, Indonesia, Kenya, Malawi, Mexico, Nigeria, Pakistan, Peru, the Philippines, Rwanda, South Africa, Tanzania, Turkey, Uganda, and Zambia. Countries received scores and rankings based on 33 indicators spanning four dimensions: country commitment, mobile capacity, regulatory environment, and adoption of traditional and digital financial services. The authors' analysis provides several takeaways with respect to expanding financial inclusion across diverse cultural, economic, and political contexts: · Country commitment is fundamental. · Movement toward digital financial services will accelerate financial inclusion. · Geography generally matters less than policy, legal, and regulatory changes, although some regional trends in terms of financial services provision are evident. · Central banks, ministries of finance, ministries of communications, banks, nonbank financial providers, and mobile network operators play major roles in achieving greater financial inclusion. · Full financial inclusion cannot be achieved without addressing the financial inclusion gender gap. This year's Report and Scorecard are the first of a series of publications intended to provide policymakers, the private sector, nongovernmental organizations, and the general public with information that can help improve financial

inclusion in these countries and around the world.

Recent Advances in Internet of Things and Machine Learning Valentina E. Balas,Vijender Kumar Solanki,Raghvendra Kumar,2022-02-14 This book covers a domain that is significantly impacted by the growth of soft computing. Internet of Things (IoT)-related applications are gaining much attention with more and more devices which are getting connected, and they become the potential components of some smart applications. Thus, a global enthusiasm has sparked over various domains such as health, agriculture, energy, security, and retail. So, in this book, the main objective is to capture this multifaceted nature of IoT and machine learning in one single place. According to the contribution of each chapter, the book also provides a future direction for IoT and machine learning research. The objectives of this book are to identify different issues, suggest feasible solutions to those identified issues, and enable researchers and practitioners from both academia and industry to interact with each other regarding emerging technologies related to IoT and machine learning. In this book, we look for novel chapters that recommend new methodologies, recent advancement, system architectures, and other solutions to prevail over the limitations of IoT and machine learning.

Human-Computer Interaction and Beyond: Advances Towards Smart and Interconnected Environments (Part II) Nirmalya Thakur,B.D. Parameshachari,2022-01-05 Human-Computer Interaction and Beyond: Advances Towards Smart and Interconnected Environments is a 2-part book set which presents discoveries, innovative ideas, concepts, practical solutions, and novel applications of Human-Computer Interaction (HCI) and related disciplines such as artificial intelligence, machine learning, data mining, computer vision, and natural language processing. The book provides readers with information about HCI trends which are shaping the future of smart, interconnected urban and industrial environments. This is the second of the two volumes of the edited books. The chapters of this volume cover topics like ERP usability in educational settings, the role of AI in enhancing HCI functionality, usability of local mobile healthcare apps, analyzing the usage of social media apps and a review of HCI systems for disaster management and systems for tracking traffic safety violations. Contributions are authored by experts and scientists in the field of HCI and its interrelated disciplines from 9 different countries – Albania, China, India, Indonesia, Nigeria, Pakistan, Spain, the United Kingdom, and the United States. Human-Computer Interaction and Beyond: Advances Towards Smart and Interconnected Environments is an informative reference for scientists, researchers, and developers in both academia and industry who wish to learn, design, implement, and apply these emerging technologies in HCI in different sectors, with the goal of realizing futuristic technology-driven living and functional smart cities and environments.

Political Campaigning in Digital India Anil M. Varughese,Holli A. Semetko,2024-06-28 This book provides a conceptual toolkit to understand the changing technologies and dynamics of political campaigning in India. Examining political campaigning and party strategies across many Indian states, with special attention to regional politics, histories, cultures, social and technological contexts, the book discusses the potential impacts of campaign strategies on electoral outcomes. Political campaigning reached a tipping point with millions of social media users engaging online with family and friends, political issues, parties and candidates in India's 2019

parliamentary election. Although India's political parties had been working with consultants and professional advertising agencies for decades, by 2019, millions of first-time voters as well as older voters were microtargeted with campaign messaging by parties and their affiliates, including frequent misinformation from unknown sources supporting one party or another. Filling a key gap in political communication research on election campaigns in digital India, the chapters in this book capture how political campaigning is important for the electoral fortunes of political parties in India's diverse regions and states. This book will appeal to students, scholars, and practitioners in political communication, public administration, and political consulting, as well as anyone interested in data-driven political campaigning. It will also be an invaluable reading for those interested in South Asian studies. This book was originally published as a special issue of South Asian History and Culture.

Applications of Artificial Intelligence in COVID-19 Sachi Nandan Mohanty,Shailendra K. Saxena,Suneeta Satpathy,Jyotir Moy Chatterjee,2021-09-29 The book examines the role of artificial intelligence during the COVID-19 pandemic, including its application in i) early warnings and alerts, ii) tracking and prediction, iii) data dashboards, iv) diagnosis and prognosis, v) treatments, and cures, and vi) social control. It explores the use of artificial intelligence in the context of population screening and assessing infection risks, and presents mathematical models for epidemic prediction of COVID-19. Furthermore, the book discusses artificial intelligence-mediated diagnosis, and how machine learning can help in the development of drugs to treat the disease. Lastly, it analyzes various artificial intelligence-based models to improve the critical care of COVID-19 patients.

Aftershocks Colin Kahl,Thomas Wright,2021-08-24 Two of America's leading national security experts offer a definitive account of the global impact of COVID-19 and the political shock waves it will have on the United States and the world order in the 21st Century. "Informed by history, reporting, and a truly global perspective, this is an indispensable first draft of history and blueprint for how we can move forward." —Ben Rhodes The COVID-19 pandemic killed millions, infected hundreds of millions, and laid bare the deep vulnerabilities and inequalities of our interconnected world. The accompanying economic crash was the worst since the Great Depression, with the International Monetary Fund estimating that it will cost over $22 trillion in global wealth over the next few years. Over two decades of progress in reducing extreme poverty was erased, just in the space of a few months. Already fragile states in every corner of the globe were further hollowed out. The brewing clash between the United States and China boiled over and the worldwide contest between democracy and authoritarianism deepened. It was a truly global crisis necessitating a collective response—and yet international cooperation almost entirely broke down, with key world leaders hardly on speaking terms. Colin Kahl and Thomas Wright's Aftershocks offers a riveting and comprehensive account of one of the strangest and most consequential years on record. Drawing on interviews with officials from around the world and extensive research, the authors tell the story of how nationalism and major power rivalries constrained the response to the worst pandemic in a century. They demonstrate the myriad ways in which the crisis exposed the limits of the old international order and how the reverberations from COVID-19 will be felt for years to come.
