Mobile Computing, Applications, and Services Petros Zerfos, Rebecca Montanari, Thomas Phan, 2010-06-08 This proceedings volume includes the full research papers presented at the First International Conference on Mobile Computing, Applications, and Services (MobiCASE) held in San Diego, California, during October 26-29, 2009. It was sponsored by ICST and held in conjunction with the First Workshop on Innovative Mobile User Interactivity (WIMUI). MobiCASE highlights state-of-the-art academic and industry research work in - main topics above the OSI transport layer with an emphasis on complete end-to-end systems and their components. Its vision is largely influenced by what we see in the consumer space today: high-end mobile phones, high-bandwidth wireless networks, novel consumer and enterprise mobile applications, scalable software infrastructures, and of course an increasingly larger user base that is moving towards an almost a-mobile lifestyle. This year's program spanned a wide range of research that explored new features, algorithms, and infrastructure related to mobile platforms. We received submissions from many countries around the world with a high number from Europe and Asia in addition to the many from North America. Each paper received at least three independent reviews from our Technical Program Committee members during the Spring of 2009, with final results coming out in July. As a result of the review process, we selected 15 high-quality papers and complemented them with six invited submissions from leading researchers, reaching the final count of 21 papers in the program.

The book covers various topics of interest, including, but not limited to: •Robotics, Control, Mechatronics and Automation•Vision, Image, and Signal Processing•Artificial Intelligence and Computer Applications•Electronic Design and Applications•Biomedical, Bioengineering and Applications•RF, Antenna Applications and Telecommunication Systems•Power Systems, High Voltage and Renewable Energy•Electrical Machines, Drives and Power Electronics•Devices, Circuits and Embedded Systems•Sensors and Sensing Techniques

Assistive Technology in Special Education Joan L. Green, 2014 This second edition of Assistive Technology in Special Education provides families, teachers, and therapists an update on how to use the latest technologies to help individuals who struggle with communication, literacy, and learning.

Untold Stories Nancy Hansen, Roy Hanes, Diane Driedger, 2018-04-18 This long-awaited reader explores the history of Canadian people with disabilities from Confederation to current day. This edited collection focuses on Canadians with mental, physical, and cognitive disabilities, and discusses their lives, work, and influence on public policy. Organized by time period, the 23 chapters in this collection are authored by a diverse group of scholars who discuss the untold histories of

Canadians with disabilities—Canadians who influenced science and technology, law, education, healthcare, and social justice. Selected chapters discuss disabilities among Indigenous women; the importance of community inclusion; the ubiquity of stairs in the Montreal metro; and the ethics of disability research. This volume is a terrific resource for students and anyone interested in disability studies, history, sociology, social work, geography, and education. *Untold Stories: A Canadian Disability History Reader* offers an exceptional presentation of influential people with various disabilities who brought about social change and helped to make Canada more accessible.

Equal Educational Opportunity Project Series: Equal educational opportunity and nondiscrimination for students with disabilities, federal enforcement of section 504 United States Commission on Civil Rights, 1997

Equal Educational Opportunity Project Series United States Commission on Civil Rights, 1997

Equal Educational Opportunity and Nondiscrimination for Students with Disabilities, 1997 This report focuses on issues relating to the development of individualized education programs for and placement of students who are classified as having mental retardation, learning disabilities, behavioral disabilities, or serious emotional disturbances. The U.S. Commission on Civil Rights examined present-day barriers and inequities that deny students with these types of disabilities an equal opportunity to participate in educational programs. The report analyzes and evaluates the Office for Civil Rights' (OCR) implementation, compliance, and enforcement efforts for Section 504 of the Rehabilitation Act. It discusses other Federal disability laws, such as the Individuals with Disabilities Education Act (IDEA), and Title II of the Americans with Disabilities Act, to the extent that they relate to Section 504.

Teaching Students with Special Needs using Google Workspace for Education and Related Products John F. O'Sullivan ,2022-09-10 Learn about teaching special needs students with Google Workspace for Education and related products. Teachers need to integrate Google products specifically designed for special needs students. This includes assistive technology and leveraging universal design for learning to teach engaging lessons. The book is intended for educators who teach special needs students and want to bridge the gap between lessons, teaching, technology, and easy access to assistive technology. You learn about technology to engage, remove barriers, and meet educational goals. Understanding the technology is not enough; learn to leverage, integrate, and create structured lessons with engaging technology. Learn about Google Workspace, assistive technologies, technology integration with Google Workspace extensions, add-ons, and technology on the internet to help you meet your goals. The book points out the most critical aspects of technology, explains why you should use technology, gives time-saving tips, and advises avoiding common pitfalls. But most of all, have fun with creative lessons.

Proceedings of the Second International Conference on Computer and Communication Technologies Suresh Chandra Satapathy, K. Srujan Raju, Jyotsna Kumar Mandal, Vikrant Bhateja, 2015-09-04 The book is about all aspects of computing, communication, general sciences and educational research covered at the Second International Conference on Computer & Communication Technologies held during 24-26 July 2015 at Hyderabad. It hosted by CMR Technical Campus in association with Division - V (Education & Research) CSI, India. After a rigorous review only quality papers are selected and included in this book. The entire book is divided into three volumes. Three volumes cover a variety of topics which include medical imaging, networks, data mining, intelligent computing, software design, image processing, mobile computing, digital signals and speech processing, video surveillance and processing, web mining, wireless sensor networks, circuit analysis, fuzzy systems, antenna and communication systems, biomedical signal processing and applications, cloud computing, embedded systems applications and cyber security and digital forensic. The readers of these volumes will be highly benefited from the technical contents of the topics.

Take Control of Your Paperless Office, 4th Edition Joe Kissell, 2024-02-02 Digitize your documents and reduce paper clutter! Version 4.0.1, updated February 2, 2024 The paperless office doesn't have to be a myth! Turn paper into usable digital files, reducing clutter and increasing convenience. This book helps you assess your situation, develop a strategy, and learn clever

techniques for keeping more paper at bay—with detailed discussion of the hardware, software, and processes needed to get the job done. Join Joe Kissell as he helps you clear the chaos of an office overflowing with paper. With Joe's guidance you can develop a personal clean-up strategy and choose your tools, including a scanner and the software you need to perform OCR (optical character recognition). You'll also learn about devices and services for storing your digitized documents and document management apps that help you categorize, locate, and view your digital document collections. Once you have your gear in hand, Joe shows you how to convert your paper documents to digitized files and gives you ideas for how to organize your office workflow, explaining how to develop day-to-day techniques that reduce the amount of time you spend pressing buttons, launching software, and managing documents. You'll also master paper-reducing skills such as:

- Scanning or photographing documents you find while out and about—business cards, receipts, menus, flyers, and more—so you keep only digitized versions. Joe discusses a variety of mobile scanning options for iOS/iPadOS and Android.
- Creating a digitized image of your signature so you can sign and share documents digitally, rather than printing them for the sole purpose of signing them with a pen.
- Using paperless options for bills, invoices, bank statements, and the like.
- Cutting down on unwanted catalogs and junk mail.
- Switching to (mostly) paperless postal mail.
- Using your computer to send and receive faxes without a fax machine, fax modem, or separate phone line. (Amazingly, some people still need to do this even in the 21st century!) The book contains answers to numerous questions, including:
- What is a searchable PDF, and why is it key to a paperless office?
- What differentiates document scanners from other types of scanners?
- What's a book scanner?
- What if I need a mobile, portable scanner?
- What does TWAIN stand for, and should my scanner support it?
- Why do I need OCR software, and what features should I look for?
- How do I

choose a good scanner and OCR software? • How should I name and file my digitized documents? • What are my options if I need to edit a scanned PDF? • How can I automate my workflow for scanning documents? • What paper documents should I keep in physical form? • How do I use common tools to add a signature to a PDF? • How can I access my digital documents remotely? • How should I back up my important digital documents?

Essentials of Dyslexia Assessment and Intervention Nancy Mather, Barbara J. Wendling, 2024-01-10 Expert guidance on the features of dyslexia and the most effective treatment options *Essentials of Dyslexia Assessment and Intervention* allows psychologists, graduate students, reading specialists, and others to quickly acquire the knowledge and skills needed to treat individuals struggling with dyslexia. This book provides step-by-step guidance on accurately identifying, assessing, and using evidence-based interventions with individuals with dyslexia. Addressing the components that need to be considered in the assessment of dyslexia—both cognitive and academic—this book includes descriptions of the various tests used in a comprehensive dyslexia assessment along with detailed, evidence-based interventions that professionals and parents can use to help individuals struggling with dyslexia. A part of the trusted *Essentials of Psychological Assessment* series, this book features concise chapters designed to facilitate retention of key concepts with callout boxes, bullet points, and extensive illustrations. Additionally, the chapters contain questions to test your knowledge and reinforce what you have learned. This updated second edition covers essential topics for today's professionals, including genetic factors, reading instruction, technology, and dyslexia in schools. Gain an understanding of the neurological and genetic causes and risk factors of dyslexia Assess reading fluency, phonological awareness, and other markers of dyslexia Discover the latest interventions for improving reading and spelling in

individuals with dyslexia Learn to pick up on cues that help with early identification and treatment of dyslexia Providing an in-depth look at dyslexia, this straightforward book presents information that will prepare school psychologists, neuropsychologists, educational diagnosticians, special education teachers, as well as general education teachers, to recognize, assess, and provide effective treatment programs for dyslexia. The book is also a good resource for parents who are helping a child with dyslexia.

Machine Learning Projects for Mobile Applications Karthikeyan NG,2018-10-31 Bring magic to your mobile apps using TensorFlow Lite and Core ML Key FeaturesExplore machine learning using classification, analytics, and detection tasks.Work with image, text and video datasets to delve into real-world tasksBuild apps for Android and iOS using Caffe, Core ML and Tensorflow LiteBook Description Machine learning is a technique that focuses on developing computer programs that can be modified when exposed to new data. We can make use of it for our mobile applications and this book will show you how to do so. The book starts with the basics of machine learning concepts for mobile applications and how to get well equipped for further tasks. You will start by developing an app to classify age and gender using Core ML and Tensorflow Lite. You will explore neural style transfer and get familiar with how deep CNNs work. We will also take a closer look at Google's ML Kit for the Firebase SDK for mobile applications. You will learn how to detect handwritten text on mobile. You will also learn how to create your own Snapchat filter by making use of facial attributes and OpenCV. You will learn how to train your own food classification model on your mobile; all of this will be done with the help of deep learning techniques. Lastly, you will

build an image classifier on your mobile, compare its performance, and analyze the results on both mobile and cloud using TensorFlow Lite with an RCNN. By the end of this book, you will not only have mastered the concepts of machine learning but also learned how to resolve problems faced while building powerful apps on mobiles using TensorFlow Lite, Caffe2, and Core ML. What you will learn

Demystify the machine learning landscape on mobile

Age and gender detection using TensorFlow Lite and Core ML

Use ML Kit for Firebase for in-text detection, face detection, and barcode scanning

Create a digit classifier using adversarial learning

Build a cross-platform application with face filters using OpenCV

Classify food using deep CNNs and TensorFlow Lite on iOS

Who this book is for

Machine Learning Projects for Mobile Applications is for you if you are a data scientist, machine learning expert, deep learning, or AI enthusiast who fancies mastering machine learning and deep learning implementation with practical examples using TensorFlow Lite and CoreML. Basic knowledge of Python programming language would be an added advantage.

American Diabetes Association Complete Guide to Diabetes American Association, 2011-06-01 The American Diabetes Association—the nation's leading health organization supporting diabetes research, information, and advocacy—has completely revised this comprehensive home reference to provide all the information a person needs to live an active, healthy life with diabetes. Now in its fifth edition, this extensive resource contains information on the best self-care techniques and the latest medical advances. For people with diabetes, this extraordinary guide will answer any question. Topics include the latest on self-care for type 1, type 2, and gestational diabetes; new types of insulin and medications; strategies for avoiding diabetes complications; expanded sections on meal planning and nutrition; and tips on working with the health care system and insurance providers.

Liferay Portal Systems Development Jonas X Yuan, Dr.Jonas X. Yuan,2012-01-26 This book focuses on teaching by example. Every chapter provides an overview, and then dives right into hands-on examples so you can see and play with the solution in your own environment. This book is for Java developers who don't need any prior experience with Liferay portal. Although Liferay portal makes heavy use of open source frameworks, no prior experience of using these is assumed.

Making the Library Accessible for All Jane Vincent,2024-04-02 Libraries have an ethical, and usually a legal, obligation to make their services accessible to disabled patrons and employees. Making the Library Accessible for All is a single-source guide that librarians can refer to when planning, remediating, or evaluating accessibility. With a unique holistic approach, it emphasizes the perception of people with disabilities as partners in meeting a common goal rather than as a population to be “served.” Topics addressed and updated in this second edition include: Multiple interviews with librarians and other experts in the field about proven accessibility strategies for libraries, personal experiences, and cutting-edge innovations; Innovations in providing assistive digital technology, many of which are free or built into common programs; An overview of changes coming to accessibility guidelines for digital content; Up-to-date information on legislation that may affect some or all libraries; An evaluation of how the COVID pandemic has changed both library services and patron needs
