Marketing Scheme on Peer-to-Peer (P2P) Communication Software Anticipating 4G Steffen

Dubiel,2004-11-04 Inhaltsangabe:Abstract: This diploma thesis paper is, after contemplating the current state of ITC / telco's shift towards commoditisation and challenges in facing the upcoming overall mobile / wireless development (beyond 3G, B3G, / 4G) aimed at prosperously resolving a marketing proposition on a quite ingenious Siemens mobile P2P communication solution, named Siemens Anyw@re PocketSERVent, by virtue of the marketers' generic means, the Product-marketing mix dedicated to fundamental questions of product, price, promotion, place (P4). Strategic marketing and ITC business as well as down-to-earth / operational themes will get propelled. The chief emphasis is put on surging virtualisation related to product / svce / property and, as usually less exposed, the shift towards intangible values, foremost customer relationship and momentum of the hi-tech. brand (perception). The intend is to supply a big yet detailed P2P, 3G / B3G and wireless picture to the marketer (even accountant) as well as applied marketing / pricing issues to the S/W developer or mobile techn. expert. After a brief overview (ch. 1), chapter 2 is about introducing the main points rel. peer-to-peer (P2P) it's rather social impacts, technological mindset and ongoing research, as well as contemporary benefits. The intention is to free both the subject and evaluation from hype or byzantine aspects; to present P2P's potential as well as existent contributions to corporations aware of bus. value from IT, paralleling the fashion well-known IT players dominate e.g. Web services. Chapter 3 prepares a general understanding of present-day and forthcoming ITC leitmotivs, more precisely, for why ITC, esp. 3G innovations, have been disappointing. Analysing soft product and service (svce / svc.) innovations is upon hard value; at the dawn of this decade's decentralisation / mobilisation and virtualisation following results and side effects of globalisation the tractate's author is going to constantly question whether proven and established marketing practice can answer the train of virtual i.e. through-and-through digital products, value chains, organisations or business and / or value creation communities. Nevertheless ch. 3's focal point is the wireless or mobile wireless, resp., upgrowth (convergence rel. mobile IP, P2P, B3G / 4G). At beginning of the new millennium telcos are forced to get out of the industrial age's proprietary hardware and services. Less because of customer's [...]

The Reluctant Road Warrior Dan P. Bullard, 2016-02-05 Ever dream of traveling the world for fun

and profit? Do you imagine tropical islands, palm trees, white sandy beaches, friendly natives and slow, quiet days with the occasional phone call or email? Forget about it. A job that requires travel can be one of the most frustrating, arduous, lonely and downright dangerous ways to make a living. Crazy customers, unfamiliar food (if you want to call it that), filth, disease, insane drivers, increasingly difficult air travel and the occasional guided missile attack make the Road Warrior life a living hell. Then, once you get there you have to do your job! What if they won't let you leave? Can you plan a cunning escape without getting caught and dragged back to the salt mines? But at least the money is good and someone else is paying the bill. If you are clever you can live a pretty good life on someone else's dime, as long as you don't fudge the expense report and get fired for ripping off the company.
