*This Messy Mobile Life: How a Mola Can Help Globally Mobile Families Create a Life by Design* Mariam N. Ottimofiore, 2019-04-11 Do your family dinners happen in more than one language? Do you celebrate Christmas and Eid? Do you and your family feel at home in more than one country? If so, then you may be a MOLA Family and yes, this multicultural, multilingual, mobile life can get a little 'messy.' In South America, a mola is a shirt made from intricately stitched layers of patterns and cloth. Worn with pride, it represents who you are - inside and out. Mariam Ottimofiore presents a mola as the perfect metaphor for globally mobile families living between cultures, countries, languages, nationalities, identities and homes, who find their story hard to articulate. She has created the MOLA tool to help global families design and show their stories to the world. This is your 'life by design.' Pakistan-born Mariam is a writer, researcher and expatriate family specialist who grew up and lived in nine countries. Her husband is German/Italian and together they have raised their children in Europe, Southeast Asia, the Middle East and Africa. Raw, honest, inspiring and uplifting, *This Messy Mobile Life* comprises personal reflection, expert advice and survey research to help you take your global family from mess to mola.

Envisioning Future Academic Library Services Sue McKnight, 2010 Edited by a thought leader with an international reputation, it brings together renowned authors from across the globe who are breaking traditional moulds and boundaries in a way that will have a profound impact on the way libraries and library services are conceptualized in the years to come. They represent the key links in the knowledge chain: authors, publishers, academics, community knowledge creators, librarians and institutions; the student perspective is also provided.

Getting Started with Transmedia Storytelling Robert Pratten, 2015 This book is a guide to developing cross-platform and pervasive entertainment. Whether you're a seasoned pro or a complete newbie, this book is filled with tips and insights in multi-platform interactive storytelling.

**Spiritual Freedom in the Brahma Sutras** Carol Pitts, Les Morgan, 2012-07-19 This book examines major theories about spiritual freedom and their implications as presented in the Brahma Sutras, a major philosophical work in Indian tradition. The sutras are examined with regard to the views of major commentators and their connection with other Indian philosophical texts. Contents includes 1) an introduction to the Brahma Sutras, 2) a review of English translations, 3) a review of basic concepts in Indian philosophy, with emphasis on the importance of Brahman, Liberation, and Maya in the Upanishads, 4) comparison of how different commentators have understood the Brahma Sutras, 5) modern interpretations of the Brahma Sutras, including Dr. Ramamurti Mishra (Brahmananda Sarasvati). This is a facsimile edition of a Master of Arts dissertation submitted in 1976.

**Getting Things Done** David Allen, 2015-03-17 The book *Lifehack* calls *The Bible* of business and personal productivity. A completely revised and updated edition of the blockbuster bestseller from 'the personal productivity guru'—Fast Company Since it was first published almost fifteen years ago, David Allen's *Getting Things Done* has become one of the most influential business books of its era, and the ultimate book on personal organization. "GTD" is now shorthand for an entire way of approaching professional and personal tasks, and has spawned an entire culture of websites, organizational tools, seminars, and offshoots. Allen has rewritten the book from start to finish, tweaking his classic text with important perspectives on the new workplace, and adding material that will make the book fresh and relevant for years to come. This new edition of *Getting Things Done* will be welcomed not only by its hundreds of thousands of existing fans but also by a whole new generation eager to adopt its proven principles.

Absolute Power Audrey Chase, Barbara Ann Wright, Claire Jackson, Emily Kay Singer, JD Glass, Jude McLaughlin, Leia Weathington, Mari Kurisato, A. Merc Rustad, Missouri Vaun, Susan Smith, Tristan J. Tarwater, 2016-12-26 So what is evil? What makes a person a "villain?" Is it intent to harm...or is it something deeper than that? Each one of the thirteen authors in this amazing collection has taken a completely different approach to answering this

question. They have gone above and beyond expressing the idea of evil and supervillainy. They get to the bottom of why villains are the way they are, and what they hope to gain from it. These are dangerous women wielding Absolute Power... and they'll be glad to let you know exactly why you should fear them.

*Engineering a Better Future* Eswaran Subrahmanian, Toluwalogo Odumosu, Jeffrey Y. Tsao, 2018-11-12 This open access book examines how the social sciences can be integrated into the praxis of engineering and science, presenting unique perspectives on the interplay between engineering and social science. Motivated by the report by the Commission on Humanities and Social Sciences of the American Association of Arts and Sciences, which emphasizes the importance of social sciences and Humanities in technical fields, the essays and papers collected in this book were presented at the NSF-funded workshop 'Engineering a Better Future: Interplay between Engineering, Social Sciences and Innovation', which brought together a singular collection of people, topics and disciplines. The book is split into three parts: A. Meeting at the Middle: Challenges to educating at the boundaries covers experiments in combining engineering education and the social sciences; B. Engineers Shaping Human Affairs: Investigating the interaction between social sciences and engineering, including the cult of innovation, politics of engineering, engineering design and future of societies; and C. Engineering the Engineers: Investigates thinking about design with papers on the art and science of science and engineering practice.

*Human-Computer Interaction - INTERACT 2009* Tom Gross, Jan Gulliksen, Paula Kotzé, Lars Oestreicher, Philippe Palanque, Raquel Oliveira Prates, Marco Winckler, 2009-08-06 INTERACT 2009 was the 12th of a series of INTERACT international conferences supported by the IFIP Technical Committee 13 on Human-Computer Interaction. This year, INTERACT was held in Uppsala (Sweden), organized by the Swedish Interdisciplinary Interest Group for Human-Computer Interaction (STIMDI) in cooperation with the Department of Information Technology at Uppsala University. Like its predecessors, INTERACT 2009 highlighted, both to the academic and to the industrial world, the importance of the human-computer interaction (HCI) area and its most recent breakthroughs on current applications. Both experienced HCI researchers and professionals, as well as newcomers to the HCI field, interested in designing or evaluating interactive software, developing new interaction technologies, or investigating overarching theories of HCI, found in INTERACT 2009 a great forum for communication with people of similar interests, to encourage collaboration and to learn. INTERACT 2009 had Research and Practice as its special theme. The reason we selected this theme is that the research within the field has drifted away from the practical applicability of its results and that the HCI practice has come to disregard the knowledge and development within the academic community.

*Digital Capital* Sora Park, 2017-11-10 This book describes and understands the many factors that influence a person's behavior towards digital technologies, and how that affects the person's potential to benefit from digital society. The ability to adapt to these new technological environments - and the extent to which an individual embraces them - has become critical to an individual's well-being and quality of life, the underlying assumption being that only by effectively engaging with digital technologies can the user accrue benefits from the experience. By introducing the concept "digital capital," which refers to the conditions that determine how people access, use, and engage with digital technology, Park examines how the digital ecosystem of the user leads to new forms of digital inequality. Using numerous empirical studies on internet users and non-users, as well as recommending small localized solutions to the big global problem, a critical and alternative perspective of the digital divide is provided.

**New Mega Trends** S. Singh, 2012-09-28 YOUR GUIDE TO A FULFILLING BUSINESS AND PERSONAL FUTURE Based on research by one of the world's largest growth-consulting companies, New Mega Trends identifies the ten most important global trends that will define our future, including business models, smart technology, connectivity and convergence and radical social trends. New Mega Trends will give you the tools to not only

identify and evaluate these game-changing trends, but also help you to translate them into market opportunities for your everyday business and personal life. How will we travel to work in the cities of the future? Will Zero be the new big thing? How will we stay connected in the Mega Trends World? Will our Wellness and Well-Being top business agenda? If you are a leader with a corporate vision, or a strategic planner within your organization, or just plain curious about your future, New Mega Trends will provide you with stimulating stories, startling facts and thought-provoking case studies that will not only inform your future but entertain you today.

**Agile Information Systems** Kevin C. Desouza, 2007 The Editor, Kevin Desouza, has organized the chapters under three categories: discussion of the concept of agile information systems (i.e. defining agile information management, its attributes, antecedents, consequences, etc.) discussion of information systems within the context of agility (i.e., descriptions of agile information systems and their attributes, how to build agile information systems, etc.) discussion of organizational management issues in the context of agile information systems (i.e., how to prepare the organization for agile information systems, management of agile information systems for improved organizational performance, etc.). This is the first book to address the hot topic of agile information systems. Contributions break new ground and provide concrete applications for practice. Contributors include highly respected academics from around the world

*Being Human* Richard Harper, 2008-01-01 This report is for anyone interested in the ramifications of our digital future and in ways society must adjust to the technological changes to come. It is also for those of us who work in the field of Human-Computer Interaction and who are concerned that our research agenda stays relevant in the years to come. Produced from a forum entitled HCI 2020: Human Values in a Digital Age, held in Sanlucar la Mayor, Spain on March 15-16, 2007. Convened by Richard Harper and Abigail Sellen of Microsoft Research Cambridge, Tom Rodden of the United Kingdom's Nottingham University, and Yvonne Rogers of the Open University.

Jon Courson's Application Commentary Jon Courson, 2004-01-17 A devotional commentary that helps you gain fresh insights into the Bible and understand how you can apply God's Word to your life. Few Bible commentators simultaneously articulate both insightful spiritual truths and memorable life applications for readers who want to be relevant witnesses for Jesus Christ. Gifted Bible preacher and inspiring teacher Jon Courson effortlessly combines these elements in this easy-to-read, verse-based devotional commentary on the entire New Testament. Pastor Jon's years of immersion in God's Word, as he regularly preached from the Bible, produced faithful, valuable teaching that takes a balanced approach between a scholarly work and an encouragement for living the Christian life. His application commentaries combine the following elements in a unique blend of pertinent information and needed inspiration: Deep love for God's word Colorful cultural insights Insightful historical information Applicable topical studies Vivid illustrations and stories Humorous, practical, and inspiring life lessons Jon Courson's devotional commentaries offer thorough and comprehensive teaching along with practical, in-depth topical studies in a very readable and comfortable expositional style.

*Consuming Music Together* Kenton O'Hara, Barry Brown, 2006-01-09 Listening to, buying and sharing music is an immensely important part of everyday life. Yet recent technological developments are increasingly changing how we use and consume music. This book collects together the most recent studies of music consumption, and new developments in music technology. It combines the perspectives of both social scientists and technology designers, uncovering how new music technologies are actually being used, along with discussions of new music technologies still in development. With a specific focus on the social nature of music, the book breaks new ground in bringing together discussions of both the social and technological aspects of music use. Chapters cover topics such as the use of the iPod, music technologies which encourage social interaction in public places, and music sharing on the internet. A valuable collection for anyone concerned with the future of music technology, this book will be of particular interest to those designing new music technologies, those working in the music industry, along with students of music and new technology.

Media and Society Nicholas Carah, Eric Louw, 2015-03-27 'This is the media and society text that critical scholars have been waiting for'. - Professor Mark Andrejevic, Pomona College This book unpacks the role of the media in social, cultural and political contexts and encourages you to reflect on the power relationships that are formed as a result. Structured around the three cornerstones of media studies; production, content and participation, this is an ideal introduction to your studies in media, culture and society. The book: Evaluates recent developments in media production, industries and platforms brought about the emergence of interactive media technologies. Examines the shifting relationship between media production and consumption instigated by the rise of social and mobile media, recasting consumption as 'participation'. Explores the construction of texts and meanings via media representations, consumer culture and popular culture, as well as the relationship between politics and public relations. Assesses the debates around the creative and cultural labour involved in meaning-making. Includes a companion website featuring exercise and discussion questions, links to relevant blogs and web material, lists of further reading and free access to key journal articles.

*New Online Retailing* Gerrit Heinemann, Christoph Schwarzl, 2010-11-01 The authors describe in detail what makes today's online retailing different and provide 8 central success factors for the new generation of Internet sales. Based on internationally recognized best practices, it becomes obvious what makes online retailers successful. The authors pull together "lessons learned" from the last 10 years, and give readers a tour of the future of online selling.

**Mobile Learning** Norbert Pachler, Ben Bachmair, John Cook, 2009-12-15 As with television and computers before it, today's mobile technology challenges educators to respond and ensure their work is relevant to students. What's changed is that this portable, cross-contextual way of engaging with the world is driving a more proactive approach to learning on the part of young people. The first full-length authored treatment of the relationship between the centrality of technological development in daily life and its potential as a means of education, *Mobile Learning* charts the rapid emergence of new forms of mass communication and their potential for gathering, shaping, and analyzing information, studying their transformative capability and learning potential in the contexts of school and socio-cultural change. The focus is on mobile/cell phones, PDAs, and to a lesser extent gaming devices and music players, not as the next new thing but meaningfully integrated into education, without objectifying the devices or technology itself. And the book fully grounds readers by offering theoretical and conceptual models, an analytical framework for understanding the issues, recommendations for specialized resources, and practical examples of mobile learning in formal as well as informal educational settings, particularly with at-risk students. Among the topics covered: • Core issues in mobile learning • Mobile devices as educational resources • Socioeconomic approaches to mobile learning • Creating situations that promote mobile learning • Ubiquitous mobility and its implications for pedagogy • Bridging the digital divide at the policy level *Mobile Learning* is a groundbreaking volume, sure to stimulate both discussion and innovation among educational professionals interested in technology in the context of teaching and learning.

*Seamless Learning in the Age of Mobile Connectivity* Lung-Hsiang Wong, Marcelo Milrad, Marcus Specht, 2014-11-02 The book departs from the approach of related titles by focusing on describing and reflecting upon the notion of seamless learning with regard to salient characteristics of learner mobility and bridging of learning experiences across learning spaces. It is the first such work that is solely dedicated to research on and the practice of seamless learning, uniquely combining interpretations, visions, and past research on and practices in seamless learning from diversified perspectives. The book also strikes a good balance between theoretical and practical perspectives, going beyond a collection of reports on specific research projects. Instead of thick descriptions of research processes and findings, readers will find significant insights and food for thought intended to inspire further advances in the research on and practice of seamless learning.

**Spaceland** Rudy Rucker, 2003-07-04 Joe Cube is a Silicon Valley hotshot--well, a would-be hotshot anyway--hoping that the 3-D TV project he's

managing will lead to the big money IPO he's always dreamed of. On New Year's Eve, hoping to impress his wife, he sneaks home the prototype. It brings no new warmth to their cooling relationship, but it does attract someone else's attention. When Joe sees a set of lips talking to him (floating in midair) and feels the poke of a disembodied finger (inside him), it's not because of the champagne he's drunk. He has just met Momo, a woman from the All, a world of four spatial dimensions for whom our narrow world, which she calls Spaceland, is something like a rug, but one filled with motion and life. Momo has a business proposition for Joe, an offer she won't let him refuse. The upside potential becomes much clearer to him once she helps him grow a new eye (on a stalk) that can see in the fourth-dimensional directions, and he agrees. After that it's a wild ride through a million-dollar night in Las Vegas, a budding addiction to tasty purple 4-D food, a failing marriage, eye-popping excursions into the All, and encounters with Momo's foes, rubbery red critters who steal money, offer sage advice and sometimes messily explode. Joe is having the time of his life, until Momo's scheme turns out to have angles he couldn't have imagined. Suddenly the fate of all life here in Spaceland is at stake. Rudy Rucker is a past master at turning mathematical concepts into rollicking science fiction adventure, from Spacetime Donuts and White Light to The Hacker and the Ants. In the tradition of Edwin A. Abbott's classic novel, Flatland, Rucker gives us a tour of higher mathematics and visionary realities. Spaceland is Flatland on hyperdrive! At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Advances in Computer Entertainment Anton Nijholt, Teresa Romão, Dennis Reidsma, 2012-10-12 This book constitutes the refereed conference proceedings of the 9th International Conference on Advances in Computer Entertainment, ACE 2012, held in Kathmandu, Nepal, in November 2012. The 10 full paper and 19 short papers presented together with 5 papers from the special track Arts and Culture and 35 extended abstracts were carefully reviewed and selected from a total of 140 submissions in all categories. The papers cover topics across a wide spectrum of disciplines including computer science, design, arts, sociology, anthropology, psychology, and marketing. Focusing on all areas related to interactive entertainment they aim at stimulating discussion in the development of new and compelling entertainment computing and interactive art concepts and applications.
