The Bicycling Big Book of Training Danielle Kosecki, Editors of Bicycling Magazine, 2015-02-24 The Bicycling Big Book of Training is an encouraging, focused training book that will speak to beginner and intermediate cyclists without making them feel like novices. It covers all the information the reader needs to begin an effective training regimen. The book is divided into five sections that are then broken into miniguides for various cycling training disciplines. Cyclists will learn about how the body becomes fit and how that fitness translates to on-the-bike performance, while discovering the components of a successful training plan, including nutrition. Furthermore, riding disciplines such as road racing, endurance events, cyclocross, mountain biking, and track are discussed at length so readers can figure out which activities are right for them. The Bicycling Big Book of Training is an excellent guide for anyone who wants to learn more about cycling and take their performance to the next level.

Assessing Urban Forest Effects and Values, 2007 An analysis of trees in New York City reveals that this city has about 5.2 million trees with canopies that cover 20.9 percent of the area. The most common tree species are tree of heaven, black cherry, and sweetgum. The urban forest currently stores about 1.35 million tons of carbon valued at \$24.9 million. In addition, these trees remove about 42,300 tons of carbon per year (\$779,000 per year) and about 2,202 tons of air pollution per year (\$10.6 million per year). The structural, or compensatory, value is estimated at \$5.2 billion. Information on the structure and functions of the urban forest can be used to improve and augment support for urban forest management programs and to integrate urban forests within plans to improve environmental quality in the New York City area.

Mega Stubborn Paul Kerr, 2015-09-09 Multiple sclerosis is the commonest chronic nerve disorder that occurs in young adults. It is characterised by progressive disability. The features of the disease include weakness, sensory disturbance, pain, and impairment of balance. Paul's book tells the story of the impact of the diagnosis of Multiple Sclerosis on a young fit man. It chronicles his determination to realise his potential in life by utilising his personal strengths and drawing on the ethos of 'smiling through adversity' that was instilled during his training as a Royal Marines Commando. I hope that his book will serve as an inspiration to all, but in particular to those who are challenged by multiple sclerosis or other chronic disease in early adult life. Sir Ranulph Fiennes
