Building Mobile Apps at Scale Gergely Orosz,2021-04-06 While there is a lot of appreciation for backend and distributed systems challenges, there tends to be less empathy for why mobile development is hard when done at scale. This book collects challenges engineers face when building iOS and Android apps at scale, and common ways to tackle these. By scale, we mean having numbers of users in the millions and being built by large engineering teams. For mobile engineers, this book is a blueprint for modern app engineering approaches. For non-mobile engineers and managers, it is a resource with which to build empathy and appreciation for the complexity of world-class mobile engineering. The book covers iOS and Android mobile app challenges on these dimensions: Challenges due to the unique nature of mobile applications compared to the web, and to the backend. App complexity challenges. How do you deal with increasingly complicated navigation patterns? What about non-deterministic event combinations? How do you localize across several languages, and how do you scale your automated and manual tests? Challenges due to large engineering teams. The larger the mobile team, the more challenging it becomes to ensure a consistent architecture. If your company builds multiple apps, how do you balance not rewriting everything from scratch while moving at a fast pace, over waiting on centralized teams? Cross-platform approaches. The tooling to build mobile apps keeps changing. New languages, frameworks, and approaches that all promise to address the pain points of mobile engineering keep appearing. But which approach should you choose? Flutter, React Native, Cordova? Native apps? Reuse business logic written in Kotlin, C#, C++ or other languages? What engineering approaches do world-class mobile engineering teams choose in non-functional aspects like code quality, compliance, privacy, compliance, or with experimentation, performance, or app size?

**Building Mobile Experiences** Frank Bentley,Edward Barrett,2012-09-14 Methods for new mobile experiences, from concept creation to prototyping to commercialization.

Its data-driven strategies and battle tested techniques will make you a master of mobile-and improve your non-mobile design, too!

**Tap** Anindya Ghose,2017-04-14 How the smartphone can become a personal concierge (not a stalker) in the mobile marketing revolution of smarter companies, value-seeking consumers, and curated offers. Consumers create a data trail by tapping their phones; businesses can tap into this trail to harness the power of the more than three trillion dollar mobile economy. According to Anindya Ghose, a global authority on the mobile economy, this two-way exchange can benefit both customers and businesses. In Tap, Ghose welcomes us to the mobile economy of smartphones, smarter companies, and value-seeking consumers. Drawing on his extensive research in the United States, Europe, and Asia, and on a variety of real-world examples from companies including Alibaba, China Mobile, Coke, Facebook, SK Telecom, Telefónica, and Travelocity, Ghose describes some intriguingly contradictory consumer behavior: people seek spontaneity, but they are predictable; they find advertising annoying, but they fear missing out; they value their privacy, but they increasingly use personal data as currency. When mobile advertising is done well, Ghose argues, the smartphone plays the role of a personal concierge—a butler, not a stalker. Ghose identifies nine forces that shape consumer behavior, including time, crowdedness, trajectory, and weather, and he examines these how these forces operate, separately and in combination. With Tap, he highlights the true influence mobile wields over shoppers, the behavioral and economic motivations behind that influence, and the lucrative opportunities it represents. In a world of artificial intelligence, augmented and virtual reality, wearable technologies, smart homes, and the Internet of Things, the future of the mobile economy seems limitless.

*The Work-Family Interface* Sampson Lee Blair,Josip Obradović,2018-10-29 This volume focuses upon the complex nature of the work-family interface, and how families around the globe deal with the inherent dilemmas therein. Chapters examine how work affects families in both overt and discrete manners, as well as how family life, in turn, affects paid employment.

**Transforming Social Work Practice** Jan Fook,Bob Pease,2016-01-08 Transforming Social Work Practice shows that postmodern theory offers new strategies for social workers concerned with political action and social justice. It explores ways of developing practice frameworks, paradigms and principles which take advantage of the perspectives offered by postmodern theory without totally abandoning the values of modernity and the Enlightenment project of human emancipation. Case studies demonstrate how these perspectives can be applied to practice.

**Ethnomethodology at Work** Mark Rouncefield,Peter Tolmie,2016-04-22 Bringing together one of the most important bodies of research into people's working practices, this volume outlines the specific character of the ethnomethodological approach to work, providing an introduction to the key conceptual resources ethnomethodology has drawn upon in its studies, and a set of substantive chapters that examine how people work from a foundational perspective. With contributions from leading experts in the field, including Graham Button, John Hughes and Wes Sharrock, Ethnomethodology at Work explores the contribution that ethnomethodological studies continue to make to our understanding of the ways in which people actually accomplish work from day to day. As such, it will appeal not only to those working in the areas of ethnomethodology and conversation analysis, but also to those with interests in the sociology of work and organisations.

**Sociological Social Work** Priscilla Dunk-West,Fiona Verity,2016-04-01 Sociological social work is a lifelong social work practice which is animated by a sociological perspective. Social workers 'shorthand' orientations such as 'strengths perspective', 'task centred' or 'humanistic' (to name but a few), as a way to identify their philosophical and theoretical approaches in professional life. Whilst some texts have examined sociology for social work, this text instead proposes that sociological social work is a legitimate and theoretically rich orientation, and this book demonstrates what sociological social work looks like in our rapidly changing world. This text will equip students and practitioners with a way to think sociologically, not just while they are studying, but as an ever present reference for making sense of social work purpose and how this is realised in a transforming world. This follows an established tradition in social work literature, but this book elevates and names the importance of this approach, which we argue is critically needed if social work is to achieve its agenda in transformative social, political economic and environmental contexts. The current landscape in which we live is one that is characterised by rapid changes which have implications for the life experiences of

those with whom social workers work, social justice advocacy agendas, and for fulfilling the purpose of social work more generally. This book is essential reading for those looking to keep up with these changes.

**Passion for Work** Robert J. Vallerand, Nathalie Houlfort, 2019-05-31 Passion is a pervasive concept in the work domain. Workers aspire to be passionate in the hope of finding meaning and satisfaction from their professional life, while employers dream of passionate employees who will ensure organizational performance. Does passion for work matter? Does passion invariably bring about the anticipated positive outcomes or is there a darker side to passion for work that can also lead to negative outcomes for individuals and organizations? The goal of this book is to address these issues. This volume reviews major theories of work passion, focusing specifically on the dominant theory: the Dualistic Model of Passion. This theory distinguishes between two types of passion-harmonious and obsessive- and their associated determinants and consequences. This volume provides a comprehensive understanding of passion for work by addressing the origin of the concept and its theoretical issues: how can passion for work be developed, what are the consequences to be expected at the individual and organizational levels, and how can passion for work shed new light on contemporary issues in the workplace. *Passion for Work: Theory, Research, and Applications* synthesizes a vast body of existing research in the area, provides insights into new and exciting research avenues, and explores how passion for work can be cultivated in work settings in order to fulfill both workers' and employers' hopes for a productive and satisfying work life.

**Faculty Work and the Public Good** Genevieve G. Shaker, 2015-04-28 At a time when faculty roles are under great scrutiny and faculty work itself has an uncertain future, this book offers a new approach to examining academic professionalism. This collection of essays applies a philanthropic lens to contemporary debates and considers academic work completed out of a moral responsibility to the public good. It provides a counterpoint to narrow conceptions of appropriate faculty work as limited to the production of credit hours and research dollars and offers evidence that faculty can have a wider role both within and beyond the "ivory tower." By examining faculty members' many contributions, not only to students but to society-at-large, *Faculty Work and the Public Good* provides an alternate perspective on America's colleges and universities that will help preserve and expand professorial contributions to the public good. Although not all faculty are philanthropically inclined, highlighting those who are will help preserve valuable aspects of faculty work and encourage more such contributions to society. This volume is an essential read for higher education policymakers, trustees, and administrators; students and scholars of higher education and philanthropy; and individual faculty concerned about their profession. Contributors: Ann E. Austin, J. Herman Blake, Dwight F. Burlingame, Denise Mott DeZolt, Sean Gehrke, Audrey J. Jaeger, Adrianna Kezar, Jia G. Liang, Elizabeth Lynn, Michael Moody, Emily L. Moore, Thomas F. Nelson-Laird, Jason F. Perkins, William M. Plater, Gary Rhoades, R. Eugene Rice, John Saltmarsh, Lorilee R. Sandmann, Paul Shaker, Marty Sulek, William G. Tierney, Richard C. Turner "The contributors to this volume provide unique insights into this under-appreciated but significant dimension of academic work and culture." –Jack H. Schuster, professor emeritus, education and public policy, senior research fellow, Claremont Graduate University "Provides a powerful rationale for broadening the definition of what are the valued contributions faculty members can make to their institutions, disciplines, and the public at large" –Judith M. Gappa, professor emerita, Purdue University

Critical Clinical Social Work: Counterstorying for Social Justice Catrina Brown, Judy E. MacDonald, 2020-05-29 This edited collection offers an original critical clinical approach to social work practice, written by social work educators from the School of Social Work at Dalhousie University and their collaborators. It provides a Canadian perspective on the diverse issues social workers encounter in the field, highlighting the practical application of feminist, narrative, anti-racist, and postcolonial frameworks. With the aim of producing counterstories that participate in social resistance, this volume focuses on integrating critical theory with direct clinical practice. Through the use of case studies, the contributors tackle a range of substantive issues including ethics, working with complex trauma, men's use of violence, substance use among women and girls, Indigenous social work praxis, critical child welfare approaches, counterstorying experiences of (dis)Ability, and animal-informed social work practice.

Transformative Social Work Practice Erik M.P. Schott, Eugenia L. Weiss, 2015-08-24 *Transformative Social Work Practice* presents an innovative and integrative approach towards critically reflective practice with an interweaving of micro, mezzo, and macro applications to real world demands. The authors explore issues commonly addressed by social workers, including health, mental health, addictions, schools, and family and community violence, while challenging assumptions and promoting ethically-driven, evidence-based practice perspectives to advocate for social justice and reduce disparities. The book is about redefining social work practice to meet the current and complex needs of diverse and vulnerable individuals, families, and communities in order to enhance their strengths in an era of unprecedented technological growth, globalization, and change.

*Mobile Media* Jo Groebel, Eli M. Noam, Valerie Feldmann, 2006-08-15 The proliferation of mobile media in recent years is an international phenomenon, with billions of devices sold annually. Mobile communications are now moving beyond individualized voice to mass media content--text, voice, sound, images, and even video. This will create new types of content that allow media companies and users to interact in new ways. There is a strong interest from the media and telecom industries in what manner of applications and content can be distributed in that fashion, and at what cost. To answer these questions, the book provides 18 chapters from internationally renowned authors. They identify likely types of content such as news, entertainment, peer-to-peer, and location-specific information; evaluate the economics, business models, and payment mechanisms necessary to support these media; and cover policy dimensions such as copyright, competitiveness, and access rights for content providers. This volume takes the reader through the various elements that need to be considered in the development of third generation (3G) content, and explains pitfalls and barriers. The result is a volume of interest to business professionals, academics, and policy makers. The book is international in focus and a glossary of terms is provided. There are few publications available which give an overview of this rapidly changing field.

**European Social Work – A Compendium** Fabian Kessl, Walter Lorenz, Hans-Uwe Otto, Sue White, 2019-11-25 The publication takes account of the fundamental developments transforming social work in Europe at the beginning of the 21st century. A European standard of social work has already emerged, but models for future European social work are absent. Therefore the compendium gives an overview of the current transformation process for the first time, discusses the visible and invisible changes and

maps out where social work is positioned in the emerging post-welfare states.

*Social Work & Received Ideas* Chris Rojek, 2012-10-12 The first book to examine the language of both traditional and radical social work as forms of power. The will to help and care for people unintentionally results in new types of dependency, control and domination.

*Work from Home* Fifth Harmony, 2016-06-01 (Piano Vocal). This sheet music features an arrangement for piano and voice with guitar chord frames, with the melody presented in the right hand of the piano part as well as in the vocal line.

*Mobile Living Across Europe II* Norbert F. Schneider, Beate Collet, 2010-09-15 Job-related spatial mobility is a subject of great importance in Europe. But how mobile are the Europeans? What are the consequences of professional mobility for quality of life, family life and social relationships? For the first time these questions are analysed on the basis of the data of a large-scale European survey. This volume analyses the causes and determinants of job mobility and their individual and societal consequences in cross-national comparison.

*A World Without Work* Daniel Susskind, 2020-01-14 SHORTLISTED FOR THE FINANCIAL TIMES & MCKINSEY 2020 BUSINESS BOOK OF THE YEAR One of Fortune Best Books of the Year One of Inc. Best Business Books of the Year One of The Times (UK) Best Business Books of the Year A New York Times Book Review Editors' Choice From an Oxford economist, a visionary account of how technology will transform the world of work, and what we should do about it From mechanical looms to the combustion engine to the first computers, new technologies have always provoked panic about workers being replaced by machines. For centuries, such fears have been misplaced, and many economists maintain that they remain so today. But as Daniel Susskind demonstrates, this time really is different. Breakthroughs in artificial intelligence mean that all kinds of jobs are increasingly at risk. Drawing on almost a decade of research in the field, Susskind argues that machines no longer need to think like us in order to outperform us, as was once widely believed. As a result, more and more tasks that used to be far beyond the capability of computers – from diagnosing illnesses to drafting legal contracts, from writing news reports to composing music – are coming within their reach. The threat of technological unemployment is now real. This is not necessarily a bad thing, Susskind emphasizes. Technological progress could bring about unprecedented prosperity, solving one of humanity's oldest problems: how to make sure that everyone has enough to live on. The challenges will be to distribute this prosperity fairly, to constrain the burgeoning power of Big Tech, and to provide meaning in a world where work is no longer the center of our lives. Perceptive, pragmatic, and ultimately hopeful, *A World Without Work* shows the way.
