United States Code United States,2013 The United States Code is the official codification of the general and permanent laws of the United States of America. The Code was first published in 1926, and a new edition of the code has been published every six years since 1934. The 2012 edition of the Code incorporates laws enacted through the One Hundred Twelfth Congress, Second Session, the last of which was signed by the President on January 15, 2013. It does not include laws of the One Hundred Thirteenth Congress, First Session, enacted between January 2, 2013, the date it convened, and January 15, 2013. By statutory authority this edition may be cited U.S.C. 2012 ed. As adopted in 1926, the Code established prima facie the general and permanent laws of the United States. The underlying statutes reprinted in the Code remained in effect and controlled over the Code in case of any discrepancy. In 1947, Congress began enacting individual titles of the Code into positive law. When a title is enacted into positive law, the underlying statutes are repealed and the title then becomes legal evidence of the law. Currently, 26 of the 51 titles in the Code have been so enacted. These are identified in the table of titles near the beginning of each volume. The Law Revision Counsel of the House of Representatives continues to prepare legislation pursuant to 2 U.S.C. 285b to enact the remainder of the Code, on a title-by-title basis, into positive law. The 2012 edition of the Code was prepared and published under the supervision of Ralph V. Seep, Law Revision Counsel. Grateful acknowledgment is made of the contributions by all who helped in this work, particularly the staffs of the Office of the Law Revision Counsel and the Government Printing Office--Preface.

*Conflict of Interest and Medicine* Boris Hauray,Henri Boullier,Jean-Paul Gaudillière,Hélène Michel,2021-09-05 In the context of a growing criticism on the influence of the pharmaceutical industry on physicians, scientists, or politicians, Conflict of Interest and Medicine offers a comprehensive analysis of the conflict of interest in medicine anchored in the social sciences, with perspectives from sociology, history, political science, and law. Based on in-depth empirical investigations conducted within different territories (France, the European Union, and the United States) the contributions analyze the development of conflict of interest as a social issue and how it impacts the production of medical knowledge and expertise, physicians' work and their prescriptions, and also the framing of health crises and controversies. In doing so, they bring a new understanding of the transformations in the political economy of pharmaceutical knowledge, the politicization of public health risks, and the promotion of transparency in science and public life. Complementing the more normative and quantitative understandings of conflict of interest issues that dominate today, this book will be of interest to researchers in a broad range of areas including social studies of sciences and technology, sociology of health and illness, and political sociology and ethics. It will be also a valuable resource for health professionals, medical scientists, or regulators facing the question of corporate influence.

*Command Of The Air* General Giulio Douhet,2014-08-15 In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than

perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates-and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh “Boom” Trenchard of Great Britain and William “Billy” Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet’s central vision-that command of the air is all important in modern warfare-has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.
