**Making Your Money Count** Kenneth Ulmer, 2011-12-19 In the area of finances, our decision to go it alone by not following God's ways is what relegates many of us to struggle to live paycheck-to-paycheck as have-nots. Throughout Scripture, God gives us full guidance and instructions, processes and commands on how to live our life and deal with just about every conceivable situation that we might encounter. However, He never forces us to follow His ways—even though experience shows His ways are always best for our ultimate peace, happiness, productivity and success. In this groundbreaking look at the parables of the talents and the man of noble birth, pastor, teacher and author Dr. Kenneth Ulmer reveals Christ's call to us to "do business" for Him. With Dr. Ulmer's help, learn: • the difference between bringing a tithe and being a tither • the kingdom principle that money is to earn money • how to reverse the errors of taking the process out of prosperity, buying into the poverty lie and letting the world be smarter than us regarding finances • how to become a producer and not just a consumer • and much more. Whether we have a lot of money or a little, our use of the money entrusted to us will determine whether or not we (and our families) reach our kingdom potential—and our kingdom blessings. Follow Dr. Ulmer's biblical prescription to see the many blessings that await those who will faithfully take care of business and make their money count.

Humble Math,2020-09-02 100 days of practice counting money, learning fractions, and telling the time. Three core areas of math that students often need additional help to master. Start by counting groups of coins that have a value of a dollar or less. Slowly learn to count greater amounts of money that include small and large bills too. Add and subtract values, and even learn to make change. Learn fractions one step at a time. Start with simple fractions and eventually learn to add and subtract mixed numbers. Telling the time is one of the more difficult concepts for children to learn. Gradually progress from learning to tell hours, to quarter hours. Eventually tell time in five minute and minute increments. This is a great workbook to start out with. Most students will grasp the concepts within each of the three sections. If a student still needs more practice, Humble Math has workbooks that provide additional practice for these concepts too.
