**ALIEN Thinking** Cyril Bouquet, Jean-Louis Barsoux, Michael Wade, 2021-03-16 How do people come up with truly original ideas? The answer is to think outside the box—way outside. For the past decade, Cyril Bouquet, Jean-Louis Barsoux, and Michael Wade, professors of innovation and strategy at IMD Business School, have studied inventors, scientists, doctors, entrepreneurs, and artists. These people, or “aliens,” as the authors call them, are able to make leaps of creativity, and use five patterns of thinking that distinguish them from the rest of us. These five patterns—Attention, Levitation, Imagination, Experimentation, and Navigation—lead to a fresh and flexible approach to problem-solving. Alien thinkers know how to free the imagination so it can detect hard-to-observe patterns. They practice deliberate ways to retreat from the world in order to see the big picture underlying a problem. And they approach ideas in systematic ways that reflect the constraints of reality. Through surprising and compelling stories, the authors show how readers can use this method to develop out-of-this-world ideas. **ALIEN Thinking** can help any of us find innovative solutions to the most difficult problems.

*Fintech Nation, The: Excellence Unlocked In Singapore* Varun Mittal,Lillian Koh,2023-10-23 Singapore's FinTech journey has been a story of relentless pursuit of excellence to build a global financial service hub with limited means and lots of aspirations. The slogan of 'Dream big. Start small. Move fast' has rallied regulators, startups, investors, corporates and everyone else to achieve a common goal. One of the critical superpowers of Singapore is a national character built on survival instinct and a distinctive obsession with being successful. Singaporeans by nature are kiasu (a Hokkien word which can be loosely translated to fear of missing out), and they wear it as a badge of honour. Being kiasu drives Singaporeans to be constantly paranoid, doing everything they can to achieve success. It creates a certain fanaticism about meritocracy and instils a belief that one can never be complacent. In a regulated industry, our fear is our biggest strength, pushing us to comply with a wide range of ever-evolving regulations. The durable social fabric supports an

adherence to order and authority. It proves to be a significant asset when it comes to developing and supporting a heavily regulated industry like financial services. Singapore attracts people across the region to build their ventures in the domains of finance and technology. This book traces Singapore's journey from 2015 till today starting with establishment of regional hubs and globalisation of FinTech innovation. The key principles which established Singapore as a FinTech Nation have been an obsession with excellence referred to as RFFL (Right First, Fast Later), a unique model of economic and legal policies known as Singanomics and lastly, an organised and controlled model of a new idea development termed Garden Innovation.

*The Psychology of Money* Morgan Housel,2020-09-08 Doing well with money isn't necessarily about what you know. It's about how you behave. And behavior is hard to teach, even to really smart people. Money—investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don't make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In *The Psychology of Money*, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life's most important topics.

**Wood Plays: 2** David Wood,2014-01-03 If there is anyone who should be the children's playwright

laureate it is David Wood' (Evening Standard) The Owl and the Pussycat Went to See - '... the funniest, prettiest and most melodious children's show I have ever seen' (Guardian); The BFG - 'Any child not delighted by the BFG must have a head filled with squashed flies, and deserves to be fed for a year on disgustatious snozzcumpers' (Guardian); The Plotters of Cabbage Patch Corner - 'A milestone in children's entertainment' (Theatre Review); Save the Human - 'A first-rate show, it's colourful, entertaining and thought-provoking' (Sunderland Echo)

**Young Guns** Austin Moorhead, 2020-03-31 THE FASCINATING INSIDE STORY OF THE QUEST TO BUILD THE WORLD'S MOST AMBITIOUS PROFESSIONAL GAMING LEAGUE--AND THE RACE TO WIN ITS \$1,000,000 PRIZE. Welcome to the high-stakes world of esports where shit-talking teenage gamers, billionaire sports franchise owners, and celebrity entrepreneurs are all competing to understand and conquer the fast-emerging future of entertainment. The burgeoning frontier of professional gaming has moved beyond the niche corners of the internet to become a global phenomenon, upending youth viewership for the major sports leagues and opening a generational rift over the nature of athletics. Soon, professional video game competitions may well be as ingrained in our culture as Monday Night Football. **YOUNG GUNS: Obsession, Overwatch, and the Future of Gaming** takes readers behind the scenes of the esports boom and into the lives of the gamers and game changers leading the charge, unfurling a wry, unexpected, and often hilarious narrative about the rise of professional gaming and the business of electronic sports. An avid gamer himself, author Austin Moorhead became fascinated by pro gaming, in particular the Overwatch League (OWL) after sports titans Robert Kraft, Stan Kroenke, and Jeff Wilpon

each paid \$20 million for a team. At the same time that he began investigating the inner-workings of the league, OWL launched esports into the American mainstream, inking TV deals with ABC and ESPN, selling out NBA stadiums for live competitions, and minting a new version of young pro athletes. Embedding with two top teams in the Overwatch League, the San Francisco Shock and the London Spitfire, as they embark on the inaugural season, Moorhead pulls back the curtain on the grueling practice schedules and spartan lifestyles of the league's most popular players. In addition to the gamer houses and competitions in which the pros hone their skills, Moorhead takes readers into the board room of Overwatch-developer Blizzard Entertainment, where entrepreneurs eager to capitalize on youth culture take bets on new esports franchises for tens of millions. The result is a rollicking story about the superstars of the future and the absurd collision of adolescent prodigies and high-stakes industry, an uproarious look at the future of sports and entertainment that is part *Bringing Down the House*, part *Moneyball*.

**Synergies Between Knowledge Engineering and Software Engineering** Grzegorz J. Nalepa, Joachim Baumeister, 2017-09-15 This book compiles a number of contributions originating from the KESE (Knowledge Engineering and Software Engineering) workshop series from 2005 to 2015. The idea behind the series was the realignment of the knowledge engineering discipline and its strong relation to software engineering, as well as to the classical aspects of artificial intelligence research. The book introduces symbiotic work combining these disciplines, such as aspect-oriented and agile engineering, using anti-patterns, and system refinement. Furthermore, it presents successful applications from different areas that were created by combining techniques from both areas.
