**Money Smart Children Learn the "Economic Law of Money Saving** Duke Coleman,2015-10-13 Motivation to be smart with money can come from a variety of sources. One source is from being convinced early in life that saving and investing is highly likely to leave you doing very well in later life. At the same time, another source comes from being convinced that not saving is highly likely to leave you very bad off in years to come. This book is intended to increase your motivation to be money-smart by showing some simple logical diagrams (models) and simple math examples that illustrate why saving and not saving lead to these outcomes. The principle supporting these conclusions is called the "economic law of money saving". The law explains

why, over time, saving is the cause for a small group of society to end up with a disproportionately large amount of money and a large group of society ends up with a small portion. The book is short and to the point. I hope you and your children embrace the message and live long prosperous lives. Enjoy.

How to Save Money Nathaniel C. Fowler, Jr., 2015-06-12 Excerpt from How to Save Money: The Care of Money Plain Facts About Every Kind of Investment an Exposé of the Prevalent Fraudulent and Get-Rich-Quick Schemes Valuable and Authentic Information for All Moderate Money-Savers and Small Investors The writer of this book feels that it is advisable, although it may not be necessary, to announce positively that he is not connected, either directly or indirectly, with any form of investment, or with any bank or brokerage establishment, or with any institution having anything to do with the sale of stocks, bonds, or securities of any kind. He has no axe to grind at the

reader's expense, no scheme to further, and no investment to recommend. He is telling the truth, the whole truth, within the field of his light. He attempts to get at rock-bottom and to reach the sub-cellar of financial fact. He is aware that on all questions, and especially those of investment, opinions differ, and that most honest men cross swords when they attempt to appraise, value, and recommend. What one reliable man considers a good form of investment, may not appeal to the judgment of another equally honest and cautious.
