Money Smart Children Learn the "Economic Law of Money Saving Duke Coleman,2015-10-13 Motivation to be smart with money can come from a variety of sources. One source is from being convinced early in life that saving and investing is highly likely

to leave you doing very well in later life. At the same time, another source comes from being convinced that not saving is highly likely to leave you very bad off in years to come. This book is intended to increase your motivation to be money-smart by showing some simple logical diagrams (models) and simple math examples that illustrate why saving and not saving lead to these outcomes. The principle supporting these conclusions is called the “economic law of money saving”. The law explains why, over time, saving is the cause for a small group of society to end up with a disproportionately large amount of money and a large group of society ends up with a small portion. The book is short and to the point. I hope you and your children embrace the message and live long prosperous lives. Enjoy.

How to Save Money Bob Lotich, 2013-07-29 After getting laid off I had to wade through all the frugal tips like reuse twist ties and turn off the lights when you leave a room to find the ones that really delivered. Sure you can save a few pennies by turning off the lights around the house, but I needed to make bigger money-saving moves. I didn't need to save a few pennies, I needed to save many hundreds of dollars each month. That is what this challenge is all about: taking 21 days to make some drastic, but realistic, changes in order to save at least \$500 each month. If you are anything like I was, you probably have more bills and payments due each month than you have money coming in. You have undoubtedly read other money-saving tips in the past, but just felt like none of them would yield much result. You also probably don't have the time to read through a bunch of fluff, but just want to get to the point! If this sounds like you, then you are who this book was written for! And while this challenge is not intended to solve all your financial problems, it will definitely help you save money! The book is broken out into 21 short chapters, each with a realistic money-saving suggestion that will help you reach your \$500/m goal. To succeed with the challenge you will need to take the chapters day-by-day and not just fly through the whole book in one sitting. Those who read a chapter a day and take action each day will be rewarded with much better success.
