Money and Value Jean-Michel Grandmont,1985-09-13 This book addresses the controversial issue of whether a competitive monetary economy has built-in price adjustment mechanisms strong enough to remove excess demands and supplies on all markets.

*DERIVATIVES IN A DAY* Stewart Cowley,2019-09-30 The derivatives market is enormous - standing at over \$500 trillion globally. Warren Buffett called them financial weapons of mass destruction. They nearly brought about the collapse of the Western financial system in 2008. They are opaque and often misunderstood. They are also immensely powerful and useful tools in the hands of responsible investors - and key to defending money from volatility and the unexpected. In this accessible and entertaining book, veteran fund manager Stewart Cowley explains with his trademark wit and clarity: - what derivatives are - how you can alter the characteristics of a portfolio using derivatives - how you can protect a portfolio using derivatives - how you can increase the returns to a portfolio using derivatives. Supported by simple spreadsheet examples and illustrations, *Derivatives in a Day* is perfect for anyone who wants to quickly get a practical grasp of this important financial market.

Richer, Wiser, Happier William Green,2021-04-20 From William Green, a financial journalist who has written for *The New Yorker*, *Time*, and *Fortune*, comes a fresh and unexpectedly profound book that draws on interviews with more than 40 of the worlds super-investors to demonstrate that the keys for building wealth hold other life lessons as well.

**The Psychology of Money** Morgan Housel,2020-09-08 Doing well with money isn't necessarily about what you know. It's about how you behave. And behavior is hard to teach, even to really smart people. Money-investing, personal finance, and business decisions-is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don't make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In *The Psychology of Money*, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life's most important topics.

**Behavioral Finance: The Second Generation** Meir Statman,2019-12-02 Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants-restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational"-succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits-utilitarian, expressive, and emotional-distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.

Capitalizing China Joseph P. H. Fan, Randall Morck, 2013 La 4e de couverture indique : Despite a vast accumulation

of private capital, China is not embracing capitalism. Deceptively familiar capitalist features disguise the profoundly unfamiliar foundations of market socialism with Chinese characteristics. The Chinese Communist Party (CCP), by controlling the career advancement of all senior personnel in all regulatory agencies, all state-owned enterprises (SOEs), and virtually all major financial institutions state-owned enterprises (SOEs), and senior Party positions in all but the smallest non-SOE enterprises, retains sole possession of Lenin's Commanding Heights. The chapters in this volume examine China's high savings rate, banking system, financial markets, financial regulations, corporate governance, and public finances; and consider policy alternatives the CCP might consider if its goal is China's elevation into the ranks of high income countries.
