Mongolia's Economic Prospects Matthias Helble, Hal Hill, Declan Magee, 2020-06-01

This publication examines Mongolia's recent economic development and outlines reforms that would help the country take advantage of its many opportunities. Mongolia is rich in natural resources and, although landlocked, is well-placed to boost trade with its two giant neighbors. The country needs to diversify its economy beyond mining, enhance economic stability, and increase employment. To maximize Mongolia's potential the government can improve macroeconomic management, enhance the skill base, and provide hard and soft infrastructure to promote trade and efficient logistics. Governance and institutional reforms are also crucial. The government will need to continue to drive reforms so that they are well implemented and deliver the intended change.

Mongolia and Northeast Asian Security Alicia J. Campi, Jagannath

Panda, 2021-08-26 This book assesses Mongolia's position in the security calculus of Northeast Asia and presents the policy outlooks of major powers vis-a-vis the region, including the United States, Japan, China, Russia, and India. Ground-breaking and modernistic in its approach, the book treats the often marginalised and landlocked small power state of Mongolia as a critical regional actor, particularly with regards to managing ties with encircling major powers Russia and China and assist in engaging the nuclear state of North Korea through dialogue mechanisms. This compilation of chapters by distinguished scholars explores Mongolia in the Northeast Asian geographical space within the context of three major themes: nuclear proliferation, environmental security, and socio-economic and civilisational conflicts. The book provides a multidisciplinary and multinational approach to Mongolia's role in the region's strategic landscape. It moves the regional security discussion beyond major power politics, North Korea's denuclearisation, and the impasse on the Korean Peninsula to discuss and analyse other underappreciated challenges facing the region. Considering Mongolia's role in achieving peace and stability in the neighbourhood, the book will be a valuable resource for researchers and readers in International Relations, Political Science, and Asian Studies.

The Report: Mongolia 2013 ,

The Report: Mongolia 2014 Oxford Business Group,2014-05-23 Since the country's transition from communism two decades ago, the Mongolian economy has experienced rapid liberalisation. Sectors including ICT and insurance are expanding quickly and, while the mining sector has been responsible for making Mongolia a rising star in the global economy, there is great potential for further growth in all economic sectors. Politically stable and rich with natural resources, Mongolia has emerged as a bellwether for investor confidence in recent years. The 2013 commercialisation of the Oyu Tolgoi gold and copper mine is helping to diversify Mongolia's mineral exports away from coal, while the government is working to improve the investment environment by adopting the new Investment Law, among other measures. Challenges do exist, however, from the long harsh winters that slow construction to the difficulty of connecting the sparsely populated nation through ICT and transport systems. In response, the government has partnered with the private sector on a number of fronts in order to promote economic diversification and competitiveness.

Subjective Lives and Economic Transformations in Mongolia Rebecca M.

Empson,2020-06-01 Almost 10 years ago the mineral-rich country of Mongolia experienced very rapid economic growth, fuelled by China's need for coal and copper. New subjects, buildings, and businesses flourished, and future dreams were imagined and hoped for. This period of growth is, however, now over. Mongolia is instead facing high levels of public and private debt, conflicts over land and sovereignty, and a changed political climate that threatens its fragile democratic institutions. *Subjective Lives and Economic Transformations in Mongolia* details this complex story through the intimate lives of five women. Building on long-term friendships, which span over 20 years, Rebecca documents their personal journeys in an ever-shifting landscape. She reveals how these women use experiences of living a 'life in the gap' to survive the hard reality between desired outcomes and their actual daily lives. In doing so, she offers a completely different picture from that presented by economists and statisticians of what it is like to live in this fluctuating extractive economy.

Comparative Capitalism and the Transitional Periphery Mehmet Demirbag,Geoffrey

Wood,2018-10-26 An original and insightful book, this work focuses on domestic and overseas firms operating in those Central Asian and Eastern European countries considered to be the transitional economic periphery. Chapters shed light on their distinct forms of capitalism, and how it influences and adapts the firms located there. The eminent authors show how, in a post-state socialist world, there are several implications for both domestic and overseas firms functioning successfully in the transitional periphery. With the complex mix of political and market mediation and informal personal ties, chapters explore the delicate balance of liberalisation in transitional economies. Detailed examples from specific countries in Eurasia and Central Asia such as Belarus, Turkey, Azerbaijan, Mongolia, Uzbekistan, Armenia and Georgia are discussed alongside broader thematic issues of economic and social change, labour relations and human resource management. Most importantly, it is shown that liberalisation has little connection to short-term business growth. To succeed in such contexts, international firms need to be both pragmatic and creative, in coping with malleable yet durable forms of institutional mediation. Providing a unique perspective on the transitional economic periphery and much-needed insights from international business, this book is essential reading for researchers and graduate students

studying transitional economies, non-traditional business models, institutional persistence and change, political and economic development and management in economically transitioning countries.

Economic Dependence of Mongolia on Minerals Yoshitaka Hosoi, Tuvshintugs Batdelger, Khashchuluun Chuluundorj, 2022-11-09 This book is a compass for resource rich-developing countries, taking Mongolia as a case study. Policy aspects of the development of the mining sector in developing countries such as Mongolia and its impact on the economy and society are reviewed. The book deals with specific industry policies and challenges identified by policy makers, its characteristics and policy recommendations moving forward with an emphasis on the importance of evidence-based policy making (EBPM). It begins with the country's development strategy and the role of the mining industry, highlighting the fact that major strategic and policy documents still suffer from ambiguity and clear guidance as well as gaps in policy directions. The book also highlights the need for policy makers to improve transparency initiatives. Authors emphasize transparency or lack thereof in mining contracts, taxation, trading, and marketing and provide specific policy recommendations and alternative policy actions. The macroeconomic and social impact of the mining sector and the role of foreign direct investment is also discussed. Particularly, utilizing in-house economic analytical tools, the role and impact of resource revenue management policy in Mongolia is evaluated. Further, the impact of mining projects on the livelihood of local households as well as the importance of obtaining a social license to operate is discussed. This monograph is recommended for readers who want an in-depth comprehensive understanding of the mining sector, EBPM, and key lessons learned in managing natural resources in Mongolia.

Transnational Law and State Transformation Jennifer Lander, 2019-11-07 This book contributes new theoretical insight and in-depth empirical analysis about the relationship between transnational legality, state change and the globalisation of markets. The role of transnational economic law in influencing and reorganising national systems of governance evidences the constitutional dimensions of global capitalism: the power to institute new rules and limits for national states. This form of new constitutionalism does not undermine the state but transforms it by eroding national capacities and implanting global alternatives. While leading scholars in the field have emphasised the much-needed value of case studies, there are no studies available which consider the cumulative impact

of multiple axes of transnational legal ordering on the national state or its constitution. This monograph addresses this empirical gap, whilst expanding the theoretical scope of the field. Mongolia's recent transformation as a mineral-exporting country provides a rare opportunity to witness economic and legal globalisation in process. Based on careful empirical analysis of national law and policy-making, the book traces the way distinctive processes of transnational legal ordering have reorganised and reframed the governance of Mongolia's mining sector, specifically by redistributing state power in relation to the market, sub-national administrations and civil society. The book investigates the role of international financial institutions, multinational corporations and non-governmental organisations in normative transmission, as well as the critical role of national actors in embedding transnational investment norms within the domestic legal and policy environment. As the book demonstrates, however, the constitutional ramifications of transnational legal ordering extend beyond the mining regime itself into more fundamental questions of the trajectory of state transformation, institutionally and ideologically. The book will be of interest to scholars of international law, global governance and the political economy of development.

Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Introduction to Mongolia Gilad James, PhD, Mongolia is a landlocked country located in East Asia, bordered by Russia to the north and China to the south, east, and west. It has a population of around three million people, with the majority residing in the capital city of Ulaanbaatar. Mongolia is renowned for its vast steppes, rural landscape, and nomadic culture. The country is also rich in natural resources, including copper, gold, coal, and oil. Mongolia is a culturally diverse country, with a rich history that dates back thousands of years. Its early nomadic tribes were ruled by various empires, including the Xiongnu, Turkic Khaganate, and Mongol Empire. The latter, led by Genghis Khan, was one of the largest empires in history, stretching from Eastern Europe to Asia. Mongolia has since undergone significant political and economic changes, with a transition to democracy in the 1990s following decades of Soviet-style socialist governance. Today, Mongolia remains a unique destination for travelers seeking to experience its rugged landscapes and traditional way of life.
