Natural History Dioramas – Traditional Exhibits for Current Educational Themes Annette Scheersoi, Sue Dale Tunnicliffe, 2018-11-14 This book presents the history of natural history dioramas in museums, their building and science learning aspects, as well as current developments and their place in the visitor experience. From the early 1900s, with the passage of time and changes in cultural norms in societies, this genre of exhibits evolved in response to the changes in entertainment, expectations and expressed needs of museum visitors. The challenge has always been to provide meaningful, relevant experiences to visitors, and this is still the aim today. Dioramas are also increasingly valued as learning tools. Contributions in this book specifically focus on their educational potential. In practice, dioramas are used by a wide range of educational practitioners to assist learners in developing and understanding specific concepts, such as climate change, evolution or conservation issues. In this learning process, dioramas not only contribute to scientific understanding and cultural awareness, but also reconnect wide audiences to the natural world and thereby contribute to the well-being of societies. In the simultaneously published book: “*Natural History Dioramas – Traditional Exhibits for Current Educational Themes, Socio-cultural Aspects*” the editors focus on socio-cultural issues and the potential of using dioramas to engage various audiences with – and in – contemporary debates and big issues, which society and the natural environment are facing.

Nature Sparks Aerial Cross, 2011-10-11 Nature has monumental power on children's growth and development. Recent studies show that as children spend less time in nature, they miss out on the profound benefits that outdoor play and learning experiences provide. Nature Sparks is filled with inspiration and instruction to help educators and caregivers of children ages three to eight reclaim and strengthen connections to the outdoors. This resource supplies ideas to create a nature-oriented classroom and curriculum, incorporates Howard Gardner's theory of multiple intelligences to encourage children's individual talents as they experience the natural world, and includes more than fifty sensory-integrated activities, crafts, and instructional strategies.

The Love Song of Monkey Michael S. A. Graziano, 2010-10 In a surreal exile on the floor of the Atlantic, a young man faces his own death and his wife's infidelity. With a deepening understanding of himself and his place in the world, Monkey travels a path through the most important landscape of all the inner landscape of the soul. Monkey is a meditation on the simple, inexplicable, and lasting power of love, cast in the metaphor of a journey to the depths of the ocean floor. Precise and beautifully crafted, this modern fable is rich with humor and deep thought.

The Monkey as Mirror Emiko Ohnuki-Tierney, 2020-12-08 This tripartite study of the monkey metaphor, the monkey performance, and the 'special status' people traces changes in Japanese culture from the eighth century to the present. During early periods of Japanese history the monkey's nearness to the human-animal boundary made it a revered mediator or an animal deity closest to humans. Later it became a scapegoat mocked for its vain efforts to behave in a human fashion. Modern Japanese have begun to see a new meaning in the monkey--a clown who turns itself into an object of laughter while challenging the basic assumptions of Japanese culture and society.

History of the Graeco-Latin Fable Francisco Rodríguez Adrados, 1999-09-22 Spanning from Sumer to the present day few literary genres show greater continuity throughout their history than the fable. Historical evidence reaching as far back as Antiquity, supports the study of more than 500 works considered to be fables. This translation of the original Spanish, standard work on the fable, traces the history of the Graeco-Latin fable, investigates its origins, reconstructs lost collections from the Hellenistic Age, and establishes relationships between the fablist of the Imperial Age and the study of Medieval, Greek and Latin fables. Supplements at the end of each chapter have been added, giving information on a new bibliography and some new data, together with references to subsequent studies.

The Mad Monkey Jenna Laffin, 2016-08 Presents an illustrated book with words to a children's song about feeling mad and learning to cope with anger.

Cheating Monkeys and Citizen Bees Lee Alan Dugatkin, 2000 Here biologist Lee Dugatkin outlines four paths to cooperation shared by humans and other animals: family dynamics, reciprocal transactions (or tit for tat), so-called selfish teamwork, and group altruism. He draws on a wealth of examples—from babysitting among mongooses and food sharing among vampire bats to cooperation in Hutterite communities and on kibbutzim—o show not only that cooperation exists throughout the animal kingdom, but how an understanding of the natural history of altruism might foster our own best instincts toward our fellow humans.

The Look of Lyric: Greek Song and the Visual ,2016-04-26 The Look of Lyric: Greek Song and the Visual addresses the various modes of interaction between ancient Greek lyric poetry and the visual arts as well as more general notions of visuality. It covers diverse poetic genres in a range of contexts radiating outwards from the original performance(s) to encompass their broader cultural settings, the later reception of the poems, and finally also their understanding in modern scholarship. By focusing on the relationship between the visual and the verbal as well as the sensory and the mental, this volume raises a wide range of questions concerning human perception and cultural practices. As this collection of essays shows, Greek lyric poetry played a decisive role in the shaping of both.

Language in Writing Instruction María Estela Brisk,2020-09-22 Accessible and engaging, this book offers a comfortable entry point to integrating language instruction in writing units in grades 3–8. A full understanding of language development is necessary for teaching writing in a successful and meaningful way. Applying a Systemic Functional Linguistics (SFL) approach, María Brisk embraces an educator's perspective, breaks down the challenges of teaching language for non-linguists, and demonstrates how teachers can help students express their ideas and create cohesive texts. With a focus on the needs of all students, including bilingual and English language learners, Brisk addresses topics necessary for successful language instruction, and moves beyond vocabulary and grammar to address meaning-making and genre. This book provides a wealth of tools and examples for practice and includes helpful instructional resources that teachers can return to time after time. Moving from theory to practice, this teacher-friendly text is a vital resource for courses in language education programs, in-service teacher-training seminars, and for pre-

service and practicing English Language Arts (ELA) teachers who want to expand their teaching abilities and knowledge bases. This book features a sample unit and a reference list of instructional resources.

Themes in Motor Development H.T.A Whiting,M.G. Wade,2012-12-06 This book is divided into Sections. Each Section is devoted to a particular theme in Motor Development and comprises two or more contributions. The order of presentation is largely fortuitous and does not reflect any value judgement on the part of the editors as to the importance of anyone theme in comparison to others addressed' in the book. This volume is to be seen as a companion volume to 'Motor Development in Children: Aspects of coordination and control' in which the more general issues in motor development presented during the Institute are published. Together, the two volumes provide both a general and a theme specific approach to this expanding field of knowledge. XI PREFACE Books and conferences, on what in North America is euphemistically termed motor development, have been few and far between in the past 25 years. This is not to say that the study of how children acquire and develop motor skills has not been a subject on which scientists have focused their attention. In the United States in the 1930's and 1940's, Bayley (1935) and Gesell and Amatruda (1947) described and scaled the rates at which young children acquired motor skills. In Europe, the development of childrens' motor behaviour was of theoretical interest to Piaget (1952).

The Nature of Living Being Daniel Carlos Mayer-Foulkes,2023-06-01 This book proposes a bold idea. Living beings are distinguishing distinctions. Single cells and multicellular organisms maintain themselves distinct by drawing distinctions. This is what organisms are and what they do. From this starting point, key issues examined range across ontology, epistemology, phenomenology, logic, and ethics. Topics

discussed include the origin of life, the nature and purpose of biology, the relation between life and logic, the nature and limits of formal logic, the nature of subjects, the subject-object relation, subject-subject relationships and the deep roots of ethics. The book provides a radical new foundation to think about philosophy and biology and appeals to researchers and students in these fields. It powerfully debunks mechanical thinking about living beings and shows the vast reservoir of insights into aliveness available in the arts and humanities.

Kinship with Monkeys Loretta A. Cormier,2003 How can monkeys be both eaten as food and nurtured as children? Her research reveals that monkeys play a vital role in Guaja society, ecology, economy, and religion. In Guaja animistic beliefs, all forms of plant and animal life--especially monkeys--have souls and are woven into a comprehensive kinship system.

Rewriting Cultural Psychology David Y. F. Ho,2019-10-15 This volume is addressed to scholars as well

as a popular audience, aimed to bridge the gap between academia and the general public. It deals with who we are, concerning our sense of self and identity; and how we live, concerning our ways of life in diverse cultures. It affirms that we may transcend our cultural-ethnic roots and redefine our identities, individual or collective. Transcendence opens the door not only to personal transformation but also to confront ethnic stereotypes and prejudices. Readers will gain fresh cultural knowledge from both the East and the West and be attuned to the theme of letting no ethnic group be alien to us. This book is at once about the immersion of life in culture and the remaking of culture by human action--reciprocal influence at work. [2] The idea of immersion underscores the powerful cultural forces that shape our perceptions, thinking, and emotions. Unlike other cultural psychology texts, this volume dwells on the accelerating alterations of culture by human action, and hence the remaking of our own being, in the age of the Internet. In the author's own words: I write with the passion of a person who has lived life from being marginal, neither Eastern nor Western, to being a world citizen; turned to English like a duck to the water, thus circumventing my handicap of Chinese orthographic dyslexia. I have two cultural parents, one Chinese and one Western, who transformed me into a thoroughly bilingual-bicultural person, empowered to build intercultural bridges. The East is rising, and the West can ill-afford to remain ignorant of the East.

From the Great Wall to Wall Street Wei Yen, 2016-11-09 Wei Yen explores how differences in world views between Eastern and Western thought and culture have on management and leadership behaviors. In *The Geography of Thought* Richard Nisbett showed how the thought and culture of the East is rooted in Chinese Confucian ideals while that of the West goes back to the early Greeks. In *From Great Wall to*

Wall Street, Wei Yen explores how these differences impact today's leadership and management practices. He delves deeply into the two cultures and their philosophical roots, and explains why there can exist significant misunderstandings between the two camps. Yen was born in China, raised in Hong Kong, educated both there and in the US and then spent half his working life in the US and half in Asia. From his vantage point, straddling both cultures he compares and contrasts the pragmatic, wholistic Chinese (or Asian) management style with the rational and analytical Western management style. He shows their pros and cons, the areas where they differ and situations where one may be more successful than the other. Yen argues that understanding traditional Chinese culture, and how it affects management behaviors and current events, can help decision makers make better decisions in business, finance and politics. He further combines culture with credit analysis to argue that it is unlikely that China will suffer a financial collapse despite a slowing economy and high debt levels. Equally, he shows how that same philosophical traditions also lie behind China's inability to innovate or project the "soft power" that the West's globally successful popular culture has achieved. How can the West take advantage of China's epic rise to strike win-win outcomes? How can the Chinese be more integrated into the global community and become a better global citizen in the future? How can policy makers make more realistic policies? None of these can be accomplished without first understanding where each other is coming from.
