Managing Organizational Ecologies Keith

Alexander, Ilfryn Price, 2013-05-02 The term Facilities Management has become global but fraught with confusion as to what the term signifies. For some, notably in the USA, Facilities Management remains a discipline of human ecology. Elsewhere the term has become conflated with an alternative meaning: providing or outsourcing the provision of various services essential to the operation of particular buildings. This volume redresses that imbalance to remind Facilities Management of its roots, presenting evidence of Facilities Management success stories that engage the wider objectives of the organizations they serve, and engaging students, scholars and critical practitioners of general management with an appreciation of the power and influence of physical space and its place in the theory and practice of organizations. This book includes management perspectives from outside the field to ensure that the issues raised are seen in an organizational and management context, informing debate within the Facilities Management fraternity. It draws on human ecology and the perspective of the firm as, itself, an intra-organizational ecology of social constructs. The ecology of a firm is not restricted to the firm's boundaries. It extends to wider relationships between the firm and its stakeholders including, in an age of outsourced building services, the Facilities Management supply chain. This volume offers arguments and evidence that managing such constructs is a key role for Facilities Management and an important participant in the provision of truly usable spaces.

Novel Methods for Monitoring and Managing Land and Water Resources in Siberia Lothar

Mueller, Askhad K. Sheudshen, Frank

Eulenstein, 2015-11-15 This book presents an analysis of land and water resources in Siberia, initially characterizing the landscapes, their ecosystems, crucial processes, human impacts on soil and water quality, and the status quo of available research. Further chapters deal with modern monitoring and management methods that can lead to a significant knowledge shift and initiate sustainable soil and water resources use. These include soil hydrological laboratory measurement methods; process-based field evaluation methods for land and water quality; remote sensing and GIS technology-based landscape monitoring methods; process and ecosystem modeling approaches; methods of resource and process evaluation and functional soil mapping; and tools for controlling agricultural land use systems. More than 15 of these concrete monitoring and management tools can immediately be incorporated into research and practice. Maintaining the functions of great landscapes for future generations will be the reward for these efforts.

Managing World Heritage Sites Anna Leask, Alan

Fyall, 2006-08-14 World Heritage Sites are some of the most recognised locations around the world. They include natural sites such as the Grand Canyon and the Great Barrier and cultural ones such as the Pyramids at Giza, the Walled City of Baku in Azerbaijan and the Historic Centre of Riga in Latvia. The responsibility to manage them successfully and ensure that the resources are not damaged by visitors, war or environment is

therefore vital. Managing World Heritage Sites covers the management issues encountered at cultural and natural UNESCO World Heritage Sites). WHS sites are high profile and as their designation states they are unique. They are often government owned and subject to political debate, they have iconic status and are therefore crucial to national tourism industries, and often involve a large number of stakeholders within their management structures. This text considers all of these aspects in arriving at solutions for site management principles. In 12 chapters and 5 case studies it covers issues such as WHS designation, marketing, visitor management, revenue generation and management. Each chapter will examine the management issues associated with managing heritage within the WH Sites, making clear use of management practices to apply the theory. Managing World Heritage Sites: • Includes international case studies such as World Heritage Sites in the Americas, Machupicchu, Stonehenge, Central Eastern Rainforest Reserves of Australia, Megalithic Temples of Malta. • Is authored by an international contributor team of well known and respected experts in this field • Has a user friendly and logical structure including aims, introduction, case study, conclusion, references and websites and examples best practice. • 5 specific case study chapters including a location map, an explanation of key issues, conclusion, and questions for self-study

Managing Diabetes Jeffrey A. Bennett, 2019-06-25

A critical study of diabetes in the popular imagination Over twenty-nine million people in the United States, more than nine percent of the population, have some form of diabetes. In *Managing Diabetes*, Jeffrey A. Bennett focuses on how the disease is imagined in public culture. Bennett argues that popular anecdotes, media representation, and communal myths are as meaningful as medical and scientific understandings of the disease. In focusing on the public character of the disease, Bennett looks at health campaigns and promotions as well as the debate over public figures like Sonia Sotomayor and her management of type 1 diabetes. Bennett examines the confusing and contradictory public depictions of diabetes to demonstrate how management of the disease is not only clinical but also cultural. Bennett also has type 1 diabetes and speaks from personal experience about the many misunderstandings and myths that are alive in the

popular imagination. Ultimately, Managing Diabetes offers a fresh take on how disease is understood in contemporary society and the ways that stigma, fatalism, and health can intersect to shape diabetes's public character. This disease has dire health implications, and rates keep rising. Bennett argues that until it is better understood it cannot be better treated.

New Workspace, New Culture Gavin Turner, Jeremy Myerson, 2017-03-02 The physical structure and appearance of the workplace determine how we function, how we communicate and collaborate, our motivation levels and company performance, but we often fail to recognize the vital connection between organizational culture and the work environment. Based on the authors' first-hand experience of major change programmes, on studies of offices around the world, and on design management research at De Montfort University, Leicester, this book explains the underlying principles of office design and its effects on cultural change and performance. Part 1 analyses the context and environment of working life, the drivers of change and the barriers - organizational, psychological and structural - to better working practices. Part 2 explores how traditional structures can be rethought and adapted through the reorganization of the workplace and the removal of physical barriers to

change. It identifies four typical and disturbingly familiar work environments - Monolith, Makeshift, Modernizer and Mould-Breaker - to help companies understand their current problems and how to solve them. Part 3 introduces six proven workplace layouts: Town Square, Village Neighbourhood, City in Miniature, Space-time Machine, The Campaign Room and the Club; and explains their relative benefits for companies' different needs. These are brought to life with international case studies from the public and private sector which describe how leading organizations have benefited from improved working environments. New Workspace, New Culture is illustrated by the Financial Times cartoonist, Roger Beale. It also includes line drawings of office layouts, and photographs of some of the most productive working environments in the world. This book will help senior management and human resource specialists develop the way people work by changing the working environment. Also, designers, architects, and facility and property managers will find it a perceptive and logical guide to wha
