The Secret History of Mac Gaming Richard Moss, 2018-03-22 The Macintosh challenged games to be more than child’s play and quick reflexes. It made human–computer interaction friendly, inviting, and intuitive. Mac gaming led to much that is now taken for granted by PC gamers and spawned some of the biggest franchises in video game history. It allowed anyone to create games and playful software with ease, and gave indie developers a home for their products. It welcomed strange ideas and encouraged experimentation. It fostered passionate and creative communities who inspired and challenged developers to do better and to follow the Mac mantra ‘think different’. Drawing on archive material and interviews with key figures from the era – and featuring new material from Craig Fryar, Apple’s first Mac games evangelist and the co-creator of hit game Spectre – The Secret History of Mac Gaming is the story of those communities and the game developers who survived and thrived in an ecosystem that was serially ignored by the outside world. It’s a book about people who followed their hearts first and market trends second, showing how clever, quirky, and downright wonderful video games could be.

Advances in Computer Games H. Jaap van den Herik, Hiroyuki Iida, Ernst A. Heinz, 2013-06-05 I feel privileged that the J(jh Advances in Computer Games Conference (ACG 10) takes place in Graz, Styria, Austria. It is the frrst time that Austria acts as host country for this major event. The series of conferences started in Edinburgh, Scotland in 1975 and was then held four times in England, three times in The Netherlands, and once in Germany. The ACG-10 conference in Graz is special in that it is organised together with the 11th World Computer Chess Championship (WCCC), the Sth Computer Olympiad (C0), and the European Union Y outh Chess Championship. The 11 th WCCC and ACG 10 take place in the Dom im Berg (Dome in the Mountain), a high-tech space with multimedia equipment, located in the Schlossberg, in the centre of the

city. The help of many sponsors (large and small) is gratefully acknowledged. They will make the organisation of this conference a success. In particular, I would like to thank the European Union for designating Graz as the Cultural Capital of Europe 2003. There are 24 accepted contributions by participants from all over the world: Europe, Japan, USA, and Canada. The specific research results of the ACG 10 are expected to find their way to general applications. The results are described in the pages that follow. The international stature together with the technical importance of this conference reaffirms the mandate of the International Computer Games Association (ICGA) to represent the computer-games community.
