Brain and Art Idan Segev, Luis M. Martinez, Robert J. Zatorre, 2014-12-18 Could we understand, in biological terms, the unique and fantastic capabilities of the human brain to both create and enjoy art? In the past decade neuroscience has made a huge leap in developing experimental techniques as well as theoretical frameworks for studying emergent properties following the activity of large neuronal networks. These methods, including MEG, fMRI, sophisticated data analysis approaches and behavioral methods, are increasingly being used in many labs worldwide, with the goal to explore brain mechanisms corresponding to the artistic experience. The 37 articles composing this unique Frontiers Research Topic bring together experimental and theoretical research, linking state-of-the-art knowledge about the brain with the phenomena of Art. It covers a broad scope of topics, contributed by world-renowned experts in vision, audition, somato-sensation, movement, and cinema. Importantly, as we felt that a dialog among artists and scientists is essential and fruitful, we invited a few artists to contribute their insights, as well as their art. Joan Miró said that “art is the search for the alphabet of the mind.” This volume reflects the state of the art search to understand neurobiological alphabet of the Arts. We hope that the wide range of articles in this volume will be highly attractive to brain researchers, artists and the community at large.

**Hokusai's Brush** Frank Feltens,2020-09-08 Experience the breathtaking masterworks of one of the most influential artists in Japan's history. Hokusai's Brush is a companion to the Freer Gallery of Art's yearlong exhibition that celebrates the artist's fruitful career. The Freer, home to the world's largest collection of paintings by Japanese artist Katsushika Hokusai, has put on view for the first time in a decade his incredible and rarely seen sketches, drawings, and paintings. Together with essays that explore his life and career, Hokusai's Brush offers an in-depth breakdown of each painting, providing amazing commentary that highlight Hokusai's mastery and detail. While best known for his woodblock print series Thirty-six Views of Mount Fuji and particularly the widely recognizable The Great Wave off Kanagawa, Hokusai is said to have produced 30,000 pieces of art. He lived to ninety years old, and his last words were reportedly to say that if heaven were to grant him another five or ten years, then he could become a true painter. Every stunning page of Hokusai's Brush is a testament to the humility of that statement, emphasizing his artistry and skill, the likes of which shaped the Impressionist movement by inspiring artists such as Monet, Degas, and van Gogh.

**William Sidney Mount** Deborah J. Johnson, William Sidney Mount, Elizabeth Johns, 1998 Historical Society, William Sidney Mount: Painter of American Life is a major exhibition exploring the career of an artist who virtually invented American genre painting. The exhibition, organized by The Museums at Stony Brook and The American Federation of Arts, will later travel to the Frick Art Museum in Pittsburgh and the Amon Carter Museum in Fort Worth. William Sidney Mount (1807-1868) was the first American-born painter to achieve widespread fame for his depictions of everyday life. This major loan exhibition, the first focused consideration of Mount's artistic achievement, will present his works in all media. The chronologically-organized exhibition juxtaposes finished paintings with preparatory sketches and prints in order to examine both Mount's working methods and the manner in which his paintings were disseminated through the print medium. The selection will reveal how thoroughly Mount's images penetrated 19th-century American culture and how his vision of culture in the formative decades of the country helped shape the way the nation sees itself today. The exhibition includes several William Sidney Mount paintings from the permanent collection of The New-York Historical Society: *Coming to the Point*, *Dregs in the Cup* and *Bargaining for a Horse*. ...

*Mont Terri Rock Laboratory, 20 Years* Paul Bossart, Alan Geoffrey Milnes, 2017-12-20 The international Mont Terri rock laboratory in Switzerland plays a central role in the safety and construction of deep geological nuclear repositories in clay formations. The laboratory has developed and refined a range of new measurement and evaluation methods: it has e.g. advanced the determination of rock parameters using innovative borehole geophysics, improved the methodology for characterizing pore-water and microbial activity in claystones, and greatly improved our understanding of diffusion and retention processes of radionuclides in and through claystones. The methods and insights described in this compendium can also be applied to low-permeability rocks at various sites around the globe, and in other fields of application.

The Supermarket of the Visible Peter Szendy, 2019-04-02 Already in 1929, Walter Benjamin described “a one hundred per cent image-space.” Such an image space saturates our world now more than ever, constituting the visibility in which we live. The Supermarket of the Visible analyzes this space and the icons that populate it as the culmination of a history of the circulation and general commodification of images and gazes. From the first elevators and escalators (tracking shots avant la lettre) to cinema (the great conductor of gazes), all the way down to contemporary eye-tracking techniques that monitor the slightest saccades of our eyes, Peter Szendy offers an entirely novel theory of the intersection of the image and economics. The Supermarket of the Visible elaborates an economy proper to images, icons, in other words, an iconomy. Deleuze caught a glimpse of this when he wrote that “money is the back side of all the images that cinema shows and edits on the front.” Since “cinema,” for Deleuze, is synonymous with “universe,” Szendy argues that this sentence must be understood in its broadest dimension and that a reading of key works in the history of cinema allows us a unique vantage point upon the reverse of images, their monetary implications. Paying close attention to sequences in Hitchcock, Bresson, Antonioni, De Palma, and The Sopranos, Szendy shows how cinema is not a uniquely commercial art form among other, purer arts, but, more fundamentally, helps to elaborate what might be called, with Bataille, a general iconomy. Moving deftly and lightly between political economy, aesthetic theory, and popular movies and television, The Supermarket of the Visible will be a necessary book for anyone concerned with media, philosophy, politics, or visual culture.
