*The Senses of Touch* Mark Paterson,2007-10-01 Touch is the first sense to develop in the womb, yet often it is overlooked. The Senses of Touch examines the role of touching and feeling as part of the fabric of everyday, embodied experience. How can we think about touch? Problems of touch and tactility run as a continuous thread in philosophy, psychology, medical writing and representations in art, from Ancient Greece to the present day. Picking through some of these threads, the book 'feels' its way towards writing and thinking about touch as both sensory and affective experience. Taking a broadly phenomenological framework that traces tactility from Aristotle through the Enlightenment to the present day, the book examines the role of touch across a range of experiences including aesthetics, digital design, visual impairment and touch therapies. The Senses of Touch thereby demonstrates the varieties of sensory experience, and explores the diverse range of our 'senses' of touch.

Human-Centered Information Fusion David Lee Hall, John M. Jordan, 2010 Information fusion refers to the merging of information from disparate sources with differing conceptual, contextual and typographical representations. Rather than focusing on traditional data fusion applications which have been mainly concerned with physical military targets, this unique resource explores new human-centered trends, such as locations, identity, and interactions of individuals and groups (social networks). Moreover, the book discusses two new major sources of information: human observations and web-based information. This cutting-edge volume presents a new view of multi-sensor data fusion that seeks to address these new developments, explicitly considering the active role of a human user/analyst. Professionals become knowledgeable about the key inputs into this innovative information fusion process, including traditional sensing resources (S-space), dynamic communities of human observers (H-space), and resources such as archived sensor data, blogs, and dynamic news reports from citizen reporters via the Internet (I-space).

Out of Hiding Barbara Kathleen Welch, 2012-06-19 Have you ever had a blanket of darkness come over you so that you feared surviving? Have you ever felt so helpless and hopeless that tomorrow was a burden to bear not a day to anticipate? Human suffering is a complex and devastating experience. In *Out of Hiding: Grace is Still Enough*, Barbara Welch examines the Nazi Holocaust and Childhood Abuse as the benchmarks of ultimate human suffering—suffering imposed on a person through the hideous atrocities of others. *Out of Hiding* takes the reader into the inner workings of the human condition. It also encourages us with the good news that there is hope, and it is found in the power of God's Grace as He works through healers. You will be inspired as you see God taking care of the most wounded of those who have been reduced and depersonalized at the hands of others.

The Human Face of Ambient Intelligence Simon Elias Bibri, 2015-06-26 As a socially disruptive technology, Ambient Intelligence is ultimately directed towards humans and targeted at the mundane life made of an infinite richness of circumstances that cannot fully be considered and easily be anticipated. Most books, however, focus their analysis on, or deal largely with, the advancement of the technology and its potential only. This book offers a fresh, up-to-date, and holistic approach to Ambient Intelligence. As such, it addresses the interdisciplinary and transdisciplinary aspects of the rapidly evolving field of Ambient Intelligence by seamlessly integrating and fusing it with artificial intelligence, cognitive science and psychology, social sciences, and humanities. It is divided into two main parts: Part 1 is about different permutations of enabling technologies as well as core

computational capabilities, namely context awareness, implicit and natural interaction, and intelligent behavior. It details the existing and upcoming prerequisite technologies, and elucidates the application and convergence of major current and future computing trends. Part 2 is an accessible review and synthesis of the latest research in the human-directed sciences and computing and how these are intricately interrelated in the realm of Ambient Intelligence. It deals with the state-of-the-art human-inspired applications which show human-like understanding and exhibit intelligent behavior in relation to a variety of aspects of human functioning – states and processes. It describes and elaborates on the rich potential of Ambient Intelligence from a variety of interrelated perspectives and the plethora of challenges and bottlenecks involved in making Ambient Intelligence a reality, and also discusses the established knowledge and recent discoveries in the human-directed sciences and their application and convergence in the ambit of Ambient Intelligence computing. This seminal reference work is the most comprehensive of its kind, and will prove invaluable to students, researchers, and professionals across both computing and the human-directed sciences.

**Designing Across Senses** Christine W. Park, John Alderman, 2018-03-22 Today we have the ability to connect speech, touch, haptic, and gestural interfaces into products that engage several human senses at once. This practical book explores examples from current designers and devices to describe how these products blend multiple interface modes together into a cohesive user experience. Authors Christine Park and John Alderman explain the basic principles behind multimodal interaction and introduce the tools you need to root your design in the ways our senses shape experience. This book also includes guides on process, design, and deliverables to help your team get started. The book covers several topics within multimodal design, including: New Human Factors: learn how human sensory abilities allow us to interact with technology and the physical world New Technologies: explore some of the technologies that enable multimodal interactions, products, and capabilities Multimodal Products: examine different categories of products and learn how they deliver sensory-rich experiences Multimodal Design: learn processes and methodologies for multimodal product design, development, and release

**Materializing Digital Futures** Toija Cinque, Jordan Beth Vincent, 2022-01-27 Digital, visual media are found in most aspects of everyday life, from workplaces to household devices - computer and digital television screens, appliances such as refrigerators and home assistants, and applications for social media and gaming. Each technologically enabled opportunity brings an increasingly sophisticated language with the act of pursuing the intrasensorial ways of perceiving the world around us - through touch, movement, sound and vision - that is the heart of screen media use and audience engagement with digital artifacts. Drawing on digital media's currently evolving transformation and transforming capacity this book builds a story of the multiple processes in robotics and AI, virtual reality, creative image and sound production, the representation of data and creative practice. Issues around commodification, identity, identification, and political economy are critically examined for the emerging and affecting encounters and perceptions that are brought to bear.

**Kama Muta** Alan Page Fiske, 2019-11-26 This book describes a ubiquitous and potent emotion that has only rarely and recently been studied in any systematic manner. The words that come closest to denoting it in English are being moved or touched, having a heart-warming feeling, feeling nostalgic, feeling patriotic, or pride in family or team. In religious contexts when the emotion is intense, it may be labeled ecstasy, mystical rapture, burning in the bosom, or being touched by the Spirit. All of these are instances of what scientists now call 'kama muta' (Sanskrit, 'moved by love'). Alan Page Fiske shows that what evokes this emotion is the sudden creation, intensification, renewal, repair, or recall of a communal sharing relationship – when love ignites, or people feel newly connected. He explains the social, psychological, cultural, and likely evolutionary processes involved – and how they interlock. Kama muta is described as it manifests in diverse settings at many points in history across scores of cultures, in everyday experiences as well as the peak moments of life. The chapters illuminate the occurrence of kama muta in a range of contexts, including religion, oratory, literature, sport, social media, and nature. The book will be of interest to students and scholars from a number of disciplines who are interested in emotion or social relationships. **How to Feel** Sushma Subramanian, 2021-02-02 We are out of touch. Many people fear that we are trapped inside our screens, becoming less in tune with our bodies and losing our connection to the physical world. But the sense of touch has been undervalued since long before the days of digital isolation. Because of deeply rooted beliefs that favor the cerebral over the corporeal, touch is maligned as dirty or sentimental, in contrast with supposedly more elevated modes of perceiving the world. **How to Feel** explores the scientific, physical, emotional, and cultural aspects of touch, reconnecting us to what is arguably our most important sense. Sushma Subramanian introduces readers to the scientists whose groundbreaking research is underscoring the role of touch in our lives. Through vivid individual stories—a man who lost his sense of touch in his late teens, a woman who experiences touch-emotion synesthesia, her own efforts to become less touch averse—Subramanian explains the science of the somatosensory system and our philosophical beliefs about it. She visits labs that are shaping the textures of objects we use every day, from cereal to synthetic fabrics. The book highlights the growing field of haptics, which is trying to incorporate tactile interactions into devices such as phones that touch us back and prosthetic limbs that can feel. **How to Feel** offers a new appreciation for a vital but misunderstood sense and how we can use it to live more fully.
