Methodius (Olympius)

Moon 3-D Jim Bell,2009 Presents the landscape of the Moon through 3-D and color images from robotic space and human exploration missions.

Mission Moon 3-D David J. Eicher,Brian May,2018-10-23 The story of the lunar landing and the events that led up to it, told in text and visually stunning 3-D images. July 2019 marks the fiftieth anniversary of Apollo 11's epochal lunar landing, when Neil Armstrong and Buzz Aldrin walked on the surface of the moon. This visually rich book offers a new perspective on that historic accomplishment, telling the story of the lunar landing and the events that led up to it with text and 3-D images. A 3D viewer, designed by astrophysicist (and lead guitarist with the rock group Queen) Brian May is included with the book. Mission Moon 3-D offers unique access to the Apollo astronauts and what they saw. It tells the story of the US-Soviet space race, from Sputnik and the space dog Laika to Mercury, Gemini, and Apollo. In 1961, President John F. Kennedy declared that America would put a man on the moon by the end of the decade. On July 20, 1969, Neil Armstrong guided the Eagle to a safe landing on the edge of the moon's Sea of Tranquility. President Richard Nixon told the astronauts, and the nation, that it was "the greatest week in the history of the world since the Creation." Mission Moon 3-D recounts all this and more in memorable and visually stunning fashion.

Apollo on the Moon in Perspective Ronald Allen Wells,2015

Moon! Earth's Best Friend Stacy McAnulty,2019-06-11 From writer Stacy McAnulty and illustrator Stevie Lewis, *Moon! Earth's Best Friend* is a light-hearted nonfiction picture book about the formation and history of the moon—told from the perspective of the moon itself. Meet Moon! She's more than just a rock—she's Earth's rock, her best friend she can always count on. Moon never turns her back on her friend (literally: she's always facing Earth with the same side!). These two will stick together forever. With characteristic humor and charm, Stacy McAnulty channels the voice of Moon in this next celestial autobiography in the *Our Universe* series. Rich with kid-friendly facts and beautifully brought to life by Stevie Lewis, this is an equally charming and irresistible companion to *Earth! My First 4.54 Billion Years* and *Sun! One in a Billion*.

High Definition 3D Space John Starke,2009-04 Introduces space exploration, including the American and Soviet competition to reach space, the exploration of the Moon, and unmanned satellites exploring deep space.

Vinyl Moon Mahogany L. Browne,2022-01-11 A teen girl hiding the scars of a past relationship finds home and healing in the words of strong Black writers. A beautiful sophomore novel from a critically acclaimed author and poet that explores how words have the power to shape and uplift our world even in the midst of pain. A true embodiment of the term *Black Girl Magic*.
—Booklist When Darius told Angel he loved her, she believed him. But five weeks after the incident, Angel finds herself in Brooklyn, far from her family, from him, and from the California life she has known. Angel feels out of sync with her new neighborhood. At school, she can't shake the feeling everyone knows what happened—and that it was her fault. The only place that makes sense is Ms. G's class. There, Angel's classmates share their own stories of pain, joy, and fortitude. And as Angel becomes immersed in her revolutionary literature course, the words from Black writers like Toni Morrison, James Baldwin, and Zora NEale Hurston speak to her and begin to heal the wounds of her past. This stunning novel weaves together prose,

poems, and vignettes to tell the story of Angel, a young woman whose past was shaped by domestic violence but whose love of language and music and the gift of community grant her the chance to find herself again.

Apollo Over the Moon in Perspective Ronald Allen Wells, Harrison H. Schmitt, 2021-07-30 This multi-faceted volume provides exquisite detail and unique looks of the Moon as seen through the Apollo J missions the Apollo 15, 16, and 17 Moon landing sojourns designed for longer stays on Earth's celestial neighbour, including the first-time humans drove a rover across the lunar surface. As a sequel to his book Apollo on the Moon in Perspective, author Ron Wells uses cutting-edge photogrammetry techniques, providing the reader astounding views of some of the most distinctive features of the Moon seen from angles never before possible. This book includes a multitude of 3D anaglyphs created painstakingly by the author including features from the lunar far side. 3D anaglyph glasses are provided. This glossy book also includes a revealing DVD that includes flybys over many of the lunar features derived from 3D models. There are digital terrain model flybys of 40 lunar locations and a brand-new unique movie. It is narrated by Apollo 17's Harrison Schmitt, describing his flight over the Taurus Littrow valley, the site where he would spend three days as the only scientist to walk on the Moon. This extraordinary volume is dedicated to the unsung heroes of the Apollo lunar landing missions, the Command Module Pilots: Mike Collins, Dick Gordon, Stu Roosa, Al Worden, Ken Mattingly and Ron Evans. While their colleagues were exploring the lunar surface, they maintained their lone vigils in orbit, making scientific observations and imaging the Moon in unprecedented detail while waiting for the moonwalkers to return. As Schmitt writes in the book's foreword, underscoring the tenacity of Wells to produce this matchless work, the volume represents the latest culmination of his never-ending search for new knowledge and the means to draw you into that quest with him. Working with him on the last chapter of this book, Colors Across the Moon, was both a pleasure and a stimulation of new thoughts about volcanism on the Moon as well as about the evolution of that small planet.

The Next Big Thing Christopher Barnatt, 2015-11-09 The Next Big Thing explores future revolutions that will determine how things are made, who we share the planet with, where resources come from, and the evolution of the human species. Beyond 2030, the way we live today will no longer be sustainable. We will therefore need to develop technologies including 3D printing, synthetic biology and space travel if our civilization is to survive and thrive. Part I reveals how local digital manufacturing will allow on-demand production in any location. Part II then looks at those robots and artificial intelligences that are destined to become our future carers, servants and companions. Part III next examines how resources from space will one day deliver fresh energy and raw material supplies. Finally, Part IV predicts the transhuman evolution that will be triggered as we learn to genetically reprogram and cybernetically upgrade our own biological hardware. The Next Big Thing is written by futurist Christopher Barnatt of

ExplainingTheFuture.com. The book will open your mind to the astonishing opportunities that lie ahead, and which will drive us toward the technological singularity . . .
