Morbid Obesity in Adolescents Kurt Widhalm, Gerhard Prager, 2014-11-01 As the worldwide prevalence of morbid obesity among adolescents continues to rise, recent years have seen a large increase in the performance of adolescent bariatric surgery. While surgical intervention often becomes necessary when conservative weight-loss therapies have failed, no standards regarding the post-operative regimen and long-term management of adolescent patients have been established. Thus, the treatment of obesity and its co-morbidities requires a multidisciplinary approach, taking into account epidemiological, clinical, nutritional and genetic aspects of morbid obesity in the pediatric age group. This volume discusses both conventional therapy and surgical options for morbid obesity in the pediatric age group. In the first part, obesity-related diseases, genetics and psychological factors are analyzed. The second part focuses on current bariatric surgery procedures, including dietary restrictions and guidelines to prevent nutritional deficiencies common after surgery. Therefore, the book will prove an invaluable resource for pediatricians, surgeons, nutritionists, dieticians and all other health professionals who treat adolescent obesity.

Ecological and Evolutionary Perspectives on Infections and Morbidity Azeez, P.A., Raj, P.P. Nikhil, Mohanraj, R., 2023-09-25 The management of infectious diseases demands a deeper understanding of the ecological and socio-economic drivers and needs a holistic and systematic system-thinking approach. Issues such as the ecological and social features of the source of the disease-causing organisms, the landscape, and how such organisms invade larger distribution ranges need to be sufficiently understood. The remedial measures must be handled from the perspectives of ecology, evolution, epidemiology, socioeconomics, forestry practices, and agriculture from the viewpoint of systems thinking and complex

interactions. It is a paradigm shift from the current reductionist disease management. Ecological and Evolutionary Perspectives on Infections and Morbidity addresses human diseases from a holistic perspective by looking at morbidity from an ecological viewpoint and highlights the need for a wider perspective in healthcare that focuses on more than managing diseases and relieving the individual patients from suffering. Covering a range of topics such as antiviral research and human health, this reference work is ideal for healthcare professionals, academicians, policymakers, practitioners, scholars, researchers, instructors, and students.

Unwanted Company Barbara Seranella,2013-11-12 A female auto mechanic and recovering addict becomes entangled in murder: “There’s no more interesting protagonist in crime fiction” (Chicago Tribune). Miranda “Munch” Mancini has had a tough life—but she’s clean and sober, and back on the straight and narrow. She’s even established her own limo service, though so far her fleet includes only one car. But it’s a start. Times are tough in 1984 Los Angeles, and Munch has an adopted daughter to support, so when a shady federal agent requests her services to ferry around a sleazy diplomat in town for the Olympics, she can’t say no. Then, to help out her old friend Ellen, who’s fresh out of prison, she hands over the driving duties. Trouble is, Ellen disappears with both the car and the client, and now the police are back on Munch’s doorstep. It seems a serial killer is on the loose, and Munch’s client may have been a victim—or the perpetrator . . . This “engrossing” mystery (The Oregonian), a Los Angeles Times bestseller, is “a satisfying novel” full of colorful characters, lethal danger, and international intrigue (Publishers Weekly). “Don’t miss this series.” —Chicago Tribune
