Dark Ecology Timothy Morton,2016-04-12 Timothy Morton argues that ecological awareness in the present Anthropocene era takes the form of a strange loop or Möbius strip, twisted to have only one side. Deckard travels this oedipal path in Blade Runner (1982) when he learns that he might be the enemy he has been ordered to pursue. Ecological awareness takes this shape because ecological phenomena have a loop form that is also fundamental to the structure of how things are. The logistics of agricultural society resulted in global warming and hardwired dangerous ideas about life-forms into the human mind. Dark ecology puts us in an uncanny position of radical self-knowledge, illuminating our place in the biosphere and our belonging to a species in a sense that is far less obvious than we like to think. Morton explores the logical foundations of the ecological crisis, which is suffused with the melancholy and negativity of coexistence yet evolving, as we explore its loop form, into something playful, anarchic, and comedic. His work is a skilled fusion of humanities and scientific scholarship, incorporating the theories and findings of philosophy, anthropology, literature, ecology, biology, and physics. Morton hopes to reestablish our ties to nonhuman beings and to help us rediscover the playfulness and joy that can brighten the dark, strange loop we traverse.

Between Two Trees Shane J. Wood,2019 The problem of Eden is much worse than you thought, but the solution is much better than you could have ever imagined. Life isn't lived under Eden's tree of life or beneath the healing leaves of the tree in the new Jerusalem. It is lived between them. And between these two trees, life is hard. In spite of this reality, Between Two Trees will challenge you to embrace hope, love, and the beauty of reconciliation at the true tree of life: the cross of Calvary. Book jacket.

The Holy Trinity and the Law of Three Cynthia Bourgeault,2013-07-09 Father, Son, and Holy Spirit. In this formula that Christians recite as though on autopilot lie the secrets for healing our world, rekindling our visionary imagination, and manifesting the Kingdom of Heaven on earth. It's an astonishing claim, but one that is supported by Cynthia Bourgeault's exploration of Trinitarian theology—and by her bold work in further articulating the deep truth it contains. She looks to the ancient concept in light of the ideas of G. I. Gurdjieff and Jacob Boehme to reveal the Trinity as the hidden driveshaft within Christianity: the compassionate expression of the Uncreated Reality in creation.

Mourning Eduardo Halfon,2018-05-08 International Latino Book Award Winner Edward Lewis Wallant Award Winner Kirkus Prize Finalist Neustadt International Prize Finalist Balcones Fiction Prize Finalist PEN Translation Prize Longlist "A feat of literary acrobatics." —New York Review of Books In Mourning, Eduardo Halfon's eponymous narrator travels to Poland, Italy, the U.S., and the Guatemalan countryside in search of secrets he can barely name. He follows memory's strands back to his maternal roots in Jewish Poland and to the contradictory, forbidden stories of his father's Lebanese-Jewish immigrant family, specifically surrounding the long-ago childhood death by drowning of his uncle Salomón. But what, or who, really killed Salomón? As he goes deeper, he realizes that the truth lies buried in his own past, in the brutal Guatemala of the 1970s and his subsequent exile to the American South. Mourning is a subtle and stirring reflection on the formative and destructive power of family mythology, silence, and loss. Eduardo Halfon moved from Guatemala to the United States at the age of ten and attended school in South Florida and North Carolina. The recipient of a Guggenheim Fellowship, Roger Caillois Prize, José María de Pereda Prize for the Short Novel, and Guatemalan National Prize in Literature, he is the author of two previous novels published in English: The Polish Boxer, a New York Times Editors' Choice selection and Monastery, longlisted for the Best Translated Book Award.

Solar Ultraviolet Radiation Christos S. Zerefos,Alkiviadis F. Bais,2013-06-29 Following the rapid developments in the UV-B measurement techniques and the rapidly growing research in the field in the late 80's and early 90's, we organized a large gathering of distinguished experts in a NATO Advanced Study Institute, held in Halkidiki, Greece on October, 2-11. 1995. The Institute was organized so as to include state of the art lectures on most aspects of solar ultraviolet radiation and its effects. This was achieved by extended lectures and discussions given in five sessions by 27 lecturers and a demonstration of field measurements and calibration techniques at the end of the Institute. The ASI began with the sun and fundamentals on solar radiative emissions and their variability in time and continued with the interaction of solar Ultraviolet with the atmosphere through the complex scattering processes and photochemical reactions involved. Particular emphasis was given to changes in atmospheric composition imposed by different manifestations of the solar activity cycle. as well as on the modelling of radiative transfer through the atmosphere and the ocean under variable environmental conditions. Overviews on the ozone issue. its monitoring and variability were extensively discussed with emphasis on the observed acceleration of ozone decline in the early 90's. This acceleration had as a consequence, significant increases in UV-B radiation observed at a few world-wide distributed stations.

A Grammar of the Old Testament in Greek Henry St. John Thackeray,1909

Pandæmonium 1660-1886 Humphrey Jennings,2012-10-04 Collecting texts taken from letters, diaries, literature, scientific journals and reports, Pandæmonium gathers a beguiling narrative as it traces the development of the machine age in Britain. Covering the years between 1660 and 1886, it offers a rich tapestry of human experience, from eyewitness reports of the Luddite Riots and the Peterloo Massacre to more intimate accounts of child labour, Utopian communities, the desecration of the natural world, ground-breaking scientific experiments, and the coming of the railways. Humphrey Jennings, co-founder of the Mass Observation movement of the 1930s and acclaimed documentary film-maker, assembled an enthralling narrative of this key period in Britain's national consciousness. The result is a highly original artistic achievement in its own right. Thanks to the efforts of his daughter, Marie-Louise Jennings, Pandæmonium was originally published in 1985, and in 2012 it was the inspiration behind Danny Boyle's electrifying Opening Ceremony for the London Olympic Games. Frank Cottrell Boyce, who wrote the scenario for the ceremony, contributes a revealing new foreword for this edition.

Beyond the Second Law Roderick C. Dewar,Charles H. Lineweaver,Robert K. Niven,Klaus Regenauer-Lieb,2013-12-02 The Second Law, a cornerstone of thermodynamics, governs the average direction of dissipative, non-equilibrium processes. But it says nothing about their actual rates or the probability of fluctuations about the average. This interdisciplinary book, written and peer-reviewed by international experts, presents recent advances in the search for new non-equilibrium principles beyond the Second Law, and their applications to a wide range of systems across physics, chemistry and biology. Beyond The Second Law brings together traditionally isolated areas of non-equilibrium research and highlights potentially fruitful connections between them, with entropy production playing the unifying role. Key theoretical concepts include the Maximum Entropy Production principle, the Fluctuation Theorem, and the Maximum Entropy method of statistical inference. Applications of these principles are illustrated in such diverse fields as climatology, cosmology, crystal growth morphology, Earth system science, environmental physics, evolutionary biology and technology, fluid turbulence, microbial biogeochemistry, plasma physics, and radiative transport, using a wide variety of analytical and experimental techniques. Beyond The Second Law will appeal to students and researchers wishing to gain an understanding of entropy production and its central place in the science of non-equilibrium systems – both in detail and in terms of the bigger picture.
