Digital Addiction Lora Ziebro, 2017-01-15 Internet addiction is a very real threat. Do you find yourself struggling to break free from TV or social media? Do you wish you didn't waste so much time online? Does your family suffer because of time that you are away from them, even if you are in the same room? Do you need help to break free? Digital Addiction: Breaking Free from the Shackles of the Internet, TV and Social Media will educate you, inspire you and release you from this bondage. Millions of people are caught in the web of digital addiction, whether it is a phone, tablet, TV, gaming device or social media. It is changing everything about people's social interaction and it has largely been ignored. In this very powerful read, Lora Ziebro unpacks how digital distractions have robbed all of us of precious time. She shows how much time we have sacrificed and what we can do to regain it for ourselves and for those we love. She wrote this book after going to dinner one night and noticing that almost everyone around her was on their cell phones. She saw that no one seemed to be having real interaction with each other and she realized that this same problem was present, at times, in her own life. She understood the need for a book that didn't just inform, but also helped families get stronger. That was the birth of Digital Addiction: Breaking Free from the Shackles of the Internet, TV and Social Media. This book will change the way you think about the Internet and digital addiction...it will call you to a place of freedom where you can experience true, deep and lasting relationships with those who matter the most.

Irresistible Adam Alter, 2018-03-06 “Irresistible is a fascinating and much needed exploration of one of the most troubling phenomena of modern times.” —Malcolm Gladwell, author of New York Times bestsellers *David and Goliath* and *Outliers* “One of the most mesmerizing and important books I’ve read in quite some time. Alter brilliantly illuminates the new obsessions that are controlling our lives and offers the tools we need to rescue our businesses, our families, and our sanity.” —Adam Grant, New York Times bestselling author of *Originals* and *Give and Take* Welcome to the age of behavioral addiction—an age in which half of the American population is addicted to at least one behavior. We obsess over our emails, Instagram likes, and Facebook feeds; we binge on TV episodes and YouTube videos; we work longer hours each year; and we spend an average of three hours each day using our smartphones. Half of us would rather suffer a broken bone than a broken phone, and Millennial kids spend so much time in front of screens that they struggle to interact with real, live humans. In this revolutionary book, Adam Alter, a professor of psychology and marketing at NYU, tracks the rise of behavioral addiction, and explains why so many of today's products are irresistible. Though these miraculous products melt the miles that separate people across the globe, their extraordinary and sometimes damaging magnetism is no accident. The companies that design these

products tweak them over time until they become almost impossible to resist. By reverse engineering behavioral addiction, Alter explains how we can harness addictive products for the good—to improve how we communicate with each other, spend and save our money, and set boundaries between work and play—and how we can mitigate their most damaging effects on our well-being, and the health and happiness of our children. Adam Alter's previous book, *Drunk Tank Pink: And Other Unexpected Forces that Shape How We Think, Feel, and Behave* is available in paperback from Penguin.

Physics Of Reality, The: Space, Time, Matter, Cosmos - Proceedings Of The 8th Symposium Honoring Mathematical Physicist Jean-pierre Vigier Richard L Amoroso, Louis H Kauffman, Peter Rowlands, 2013-09-18 A truly Galilean-class volume, this book introduces a new method in theory formation, completing the tools of epistemology. It covers a broad spectrum of theoretical and mathematical physics by researchers from over 20 nations from four continents. Like Vigier himself, the Vigier symposia are noted for addressing avant-garde, cutting-edge topics in contemporary physics. Among the six proceedings honoring J.-P. Vigier, this is perhaps the most exciting one as several important breakthroughs are introduced for the first time. The most interesting breakthrough in view of the recent NIST experimental violations of QED is a continuation of the pioneering work by Vigier on tight bound states in hydrogen. The new experimental protocol described not only promises empirical proof of large-scale extra dimensions in conjunction with avenues for testing string theory, but also implies the birth of the field of unified field mechanics, ushering in a new age of discovery. Work on quantum computing redefines the qubit in a manner that the uncertainty principle may be routinely violated. Other breakthroughs occur in the utility of quaternion algebra in extending our understanding of the nature of the fermionic singularity or point particle. There are several other discoveries of equal magnitude, making this volume a must-have acquisition for the library of any serious forward-looking researchers.

Who's Raising the Kids? Susan Linn, 2022-09-13 From a world-renowned expert on creative play and the impact of commercial marketing on children, a timely investigation into how big tech is hijacking childhood—and what we can do about it “Engrossing and insightful . . . rich with details that

paint a full portrait of contemporary child-corporate relations.” —Zephyr Teachout, *The New York Times Book Review* Even before COVID-19, digital technologies had become deeply embedded in children’s lives, despite a growing body of research detailing the harms of excessive immersion in the unregulated, powerfully seductive world of the “kid-tech” industry. In the “must read” (*Library Journal*, starred review) *Who’s Raising the Kids?*, Susan Linn—one of the world’s leading experts on the impact of Big Tech and big business on children—weaves an “eye-opening and disturbing exploration of how marketing tech to children is creating a passive, dysfunctional generation” (*Kirkus Reviews*, starred review). From birth, kids have become lucrative fodder for tech, media, and toy companies, from producers of exploitative games and social media platforms to “educational” technology and branded school curricula of dubious efficacy. Written with humor and compassion, *Who’s Raising the Kids?* is a unique and highly readable social critique and guide to protecting kids from exploitation by the tech, toy, and entertainment industries. Two hopeful chapters—“Resistance Parenting” and “Making a Difference for Everybody’s Kids”—chart a path to allowing kids to be the children they need to be.

Computer Gaming World, 2002

America'S Irresistible Attraction John S. Dinga, 2011-04-13 Part travelogue and part memoir, John S. Dinga's newest book is a sequel to *Navigating the Contradictions of America* and explores disparities between America's past and present, from the perspective of an immigrant. Featuring characters both real and fictional, Dinga shares his observations about the realities of making a new life in a new country, with an occasional flashback to the former home. The desire to immigrate to America is one shared by people all over the world, people who are often unaware of what it takes to thrive in a competitive, capitalist world where nothing is the same as before. Settling down in a new environment and navigating the politics and stresses of finding a job are just two of the aspects of culture shock a new immigrant will face. Expectations and responsibilities from those back home also add to the new immigrants' challenges, and Dinga offers his suggestions on how to thrive under those stresses as well. He speaks not only to the potential immigrant but to those officials in power on either side of the process as well. Learning to make the right choices when presented with so many

options is another life lesson addressed. The American society, freedoms, choices, and government are envied in many corners of the world, and Dinga explores how that perception influences the decision to start the journey. People need to know that living in America has its challengeschallenges not often imagined when the desire to immigrate pushes them to cross deserts, oceans, and unfriendly skies.

Game Addiction Neils Clark,P. Shavaun Scott,2009-06-08 An eleven-year-old boy strangled an elderly woman for the equivalent of five dollars in 2007, then buried her body under a thin layer of sand. He told the police that he needed the money to play online videogames. Just a month later, an

eight-year-old Norwegian boy saved his younger sister's life by threatening an attacking moose and then feigning death when the moose attacked him—skills he said he learned while playing World of Warcraft. As these two instances show, videogames affect the minds, bodies, and lives of millions of gamers, negatively and positively. This book approaches videogame addiction from a cross-disciplinary perspective, bridging the divide between liberal arts academics and clinical researchers. The topic of addiction is examined neutrally, using accepted research in neuroscience, media studies, and developmental psychology.
