Experimental and Quasi-experimental Designs for Generalized Causal

Inference William R. Shadish, Thomas D. Cook, Donald Thomas Campbell, 2002
Sections include: experiments and generalised causal inference; statistical conclusion validity and internal validity; construct validity and external validity; quasi-experimental designs that either lack a control group or lack pretest observations on the outcome; quasi-experimental designs that use both control groups and pretests; quasi-experiments: interrupted time-series designs; regression discontinuity designs; randomised experiments: rationale, designs, and conditions conducive to doing them; practical problems 1: ethics, participation recruitment and random assignment; practical problems 2: treatment implementation and attrition; generalised causal inference: a grounded theory; generalised causal inference: methods for single studies; generalised causal inference: methods for multiple studies; a critical assessment of our assumptions.

Verbal Behavior Burrhus Frederic Skinner, 1957

Engineers of Independence Paul K. Walker, 2002-08 This collection of documents, including many previously unpublished, details the role of the Army engineers in the American Revolution. Lacking trained military engineers, the Americans relied heavily on foreign officers, mostly from France, for sorely needed technical assistance. Native Americans joined the foreign engineer officers to plan and carry out offensive and defensive operations, direct the erection of fortifications, map vital terrain, and lay out encampments. During the war Congress created the Corps of Engineers with

three companies of engineer troops as well as a separate geographer's department to assist the engineers with mapping. Both General George Washington and Major General Louis Lebéque Duportail, his third and longest serving Chief Engineer, recognized the disadvantages of relying on foreign powers to fill the Army's crucial need for engineers. America, they contended, must train its own engineers for the future. Accordingly, at the war's end, they suggested maintaining a peacetime engineering establishment and creating a military academy. However, Congress rejected the proposals, and the Corps of Engineers and its companies of sappers and miners mustered out of service. Eleven years passed before Congress authorized a new establishment, the Corps of Artillerists and Engineers.

The Digital Person Daniel J Solove,2004 In a revealing study of how digital dossiers are created (usually without our knowledge), the author argues that we must rethink our understanding of what privacy is and what it means in the digital age, and then reform the laws that define and regulate it. Reprint.

Emma: A Modern Retelling Alexander McCall Smith,2016-04-05 The best-selling author of the No. 1 Ladies' Detective Agency series deftly escorts Jane Austen's beloved, meddlesome heroine into the twenty-first century in this delightfully inventive retelling. The summer after university, Emma Woodhouse returns home to live with her widowed father and launch her interior design business. Apart from cultivating grand career plans and managing her father's hypochondria, Emma busies herself with the two things she does best:

matchmaking and offering advice on everything from texting etiquette to first date destinations. Happily, this summer presents abundant opportunities for both, as old and new friends are drawn into the sphere of Emma's counsel: George Knightley, her principled brother-in-law; Frank Churchill, the attractive stepson of her former governess; Harriet Smith, a naïve but enchanting young teacher's assistant at the local language school; and the perfect (and perfectly vexing) Jane Fairfax. Carriages have been replaced by Mini Coopers and cups of tea by cappuccinos, but Alexander McCall Smith's sparkling satire and cozy sensibility are the perfect match for Jane Austen's beloved tale.
