A Year in the National Parks Stefanie Payne, Jonathan Irish, 2018-05 On January 1 of 2016, Stefanie Payne, a creative professional working at NASA Headquarters, and Jonathan Irish, a photographer with National Geographic, left their lives in Washington, D.C. and hit the open road on an expedition to explore and document all 59 of America's national parks during the centennial celebration of the U.S. National Park Service - 59 parks in 52 weeks - the Greatest American Road Trip. Captured in more than 300,000 digital photographs, written stories, and videos shared by the national and international media, their project resulted in an incredible view of America's National Park System seen in its 100th year. 'A Year in the National Parks, The Greatest American Road Trip' is a gorgeous visual journey through our cherished public lands, detailing a rich tapestry of what makes each park special, as seen along an epic journey to visit them all within one special celebratory year.

**Subpar Parks** Amber Share, 2021-07-13 **\*\*A New York Times Bestseller!\*\*** Based on the wildly popular Instagram account, Subpar Parks features both the greatest hits and brand-new content, all celebrating the incredible beauty and variety of America's national parks juxtaposed with the clueless and hilarious one-star reviews posted by visitors. Subpar Parks, both on the popular Instagram page and in this humorous, informative, and collectible book, combines two things that seem like they might not work together yet somehow harmonize perfectly: beautiful illustrations and informative, amusing text celebrating each national park paired with the one-star reviews disappointed tourists have left online. Millions of visitors each year enjoy Glacier National Park, but for one visitor, it was simply Too cold for me! Another saw the mind-boggling vistas of Bryce Canyon as Too spiky! Never mind the person who visited the thermal pools at Yellowstone National Park and left thinking, "Save yourself some money, boil some water at home." Featuring more than 50 percent new material, the book will include more depth and insight into the most popular parks, such as Yosemite, Yellowstone, the Grand Canyon, and Acadia National Parks; anecdotes and tips from rangers; and much more about author Amber Share's personal love and connection to the outdoors. Equal parts humor and love for the national parks and the great outdoors, it's the perfect gift for anyone who loves to spend time outside as well as have a good read (and laugh) once they come indoors.

Dark Ecology Timothy Morton, 2016-04-12 Timothy Morton argues that ecological awareness in the present Anthropocene era takes the form of a

strange loop or Möbius strip, twisted to have only one side. Deckard travels this oedipal path in *Blade Runner* (1982) when he learns that he might be the enemy he has been ordered to pursue. Ecological awareness takes this shape because ecological phenomena have a loop form that is also fundamental to the structure of how things are. The logistics of agricultural society resulted in global warming and hardwired dangerous ideas about life-forms into the human mind. Dark ecology puts us in an uncanny position of radical self-knowledge, illuminating our place in the biosphere and our belonging to a species in a sense that is far less obvious than we like to think. Morton explores the logical foundations of the ecological crisis, which is suffused with the melancholy and negativity of coexistence yet evolving, as we explore its loop form, into something playful, anarchic, and comedic. His work is a skilled fusion of humanities and scientific scholarship, incorporating the theories and findings of philosophy, anthropology, literature, ecology, biology, and physics. Morton hopes to reestablish our ties to nonhuman beings and to help us rediscover the playfulness and joy that can brighten the dark, strange loop we traverse.

*To Best the Boys* Mary Weber, 2019-03-19 The task is simple: Don a disguise. Survive the labyrinth . . . Best the boys. Every year for the past fifty-four years, the residents of Pinsbury Port have received a mysterious letter inviting all eligible-aged boys to compete for an esteemed scholarship to the all-male Stemwick University. The poorer residents look to see if their names are on the list. The wealthier look to see how likely their sons are to survive. And Rhen Tellur opens it to see if she can derive which substances the ink and parchment are created from, using her father's microscope. In the province of Caldon, where women train in wifely duties and men pursue collegiate education, sixteen-year-old Rhen Tellur wants nothing more than to become a scientist. As the poor of her seaside town fall prey to a deadly disease, she and her father work desperately to find a cure. But when her mum succumbs to it as well? Rhen decides to take the future into her own hands—through the annual all-male scholarship competition. With her cousin, Seleni, by her side, the girls don disguises and enter Mr. Holm's labyrinth, to best the boys and claim the scholarship prize. Except not everyone is ready for a girl who doesn't know her place. And not everyone survives the deadly maze. Welcome to the labyrinth. Praise for *To Best the Boys*:

"Atmospheric, romantic, inspiring." —KRISTEN CICCARELLI, internationally bestselling author of *The Last Namsara Smart*, determined, and ready to take on the world: Rhen Tellur is an outstanding heroine with every reason to win a competition historically intended for boys. —Jodi Meadows, *New York Times* bestselling author of *The Incarnate Trilogy* and coauthor of *My Lady Jane A "Hunger Games/Handmaid's Tale mash-up."* —BN Teen Blog

*Thank Earth You* Armand Daigle, 2014-02-03 Liberation and abundance bloom in arm's reach, but a young engineer's wrists are choked red by the chains of cubical slavery. Brought to his breaking point, he quits and confesses to his disappointed and worried parents that he has no plans of returning to a discipline they hold so dear. His world butterflies open. Relief and happiness come fast, but his new course remains obscured, and it's not until five months later, when he takes up with a pack of wolves, that direction begins to emerge. His surroundings become vibrant, lines dissolve, and never feeling so alive he pushes himself to precarious limits. And late one winter night, in the den where the wolves came from, the ex-engineer is confronted by a power that brings him both rapid bliss and the crumbling of his reality. Finding himself is a dark and constant battle between sanity and revelation in which he's not sure what side to take.

**Wolves** Julie Argyle, 2022-04-12 An up-close look at the beautiful, yet fierce wolves of the greater Yellowstone area and their fight for survival. In *Wolves: Western Warriors*, the life of the powerful and majestic North American wolf, often considered to be vermin and dangerous, is presented, showing the struggle they have to simply survive in the wild and in a world where many people don't appreciate wolves and often set out to exterminate them. Argyle explores their behavior, their family dynamics, and what it means to be a wolf in the wilderness of the greater Yellowstone area through her stunning photography. She includes information about the reintroduction of wolves to Yellowstone and the ongoing struggle with keeping wolves listed as endangered species, while also offering her personal observations about the Wapiti Lake pack, among others, and several notable individual wolves. The strikingly beautiful images and the information and stories woven throughout the pages of the book showcase this frequently misunderstood, yet completely incredible species. "If you talk to the animals they will talk with you and you will know each other. If you do not talk to them you will not know then and what you do not know, you will not fear. What one fears, one destroys." – Chief Dan George, Tsleil-Waututh Nation, British Columbia, Canada.

Erieta Attali Alessio Assonitis, 2018-11-24 Erieta Attali (\*1966, Tel Aviv) has devoted two decades to exploring the relationship between architecture and the landscape at the edges of the world. Attali's photography interrogates how extreme conditions and demanding terrains provoke humankind to re-orient and center itself through architectural responses. Her unrelenting and highly physical expedition has seen her traverse four continents, working in isolated and remote terrains from Iceland to the Indian Ocean. In *Periphery - Archaeology of Light*, Attali references the essence of ancient Greek cartography in which the edges of maps represented the outer limits of the known world. Attali's poetic and metaphorical photographs, in which architecture is depicted as a natural feature, inseparable from its context, present visual maps of temporal and spatial transformations at the outposts of human existence. The photographic journey is accompanied by textual contributions from different fields: archaeology, architecture, and history of art, speaking to the idea of a geographical periphery.
