Voices from the Classroom: A Celebration of Learning Vana Chiou, Lotte Geunis, Oliver Holz, Nesrin Oruc Ertürk, Fiona Shelton, 2021 Voices from the Classroom illustrates that teachers have a leading voice in the policies that impact their students and the profession of teaching. The aim is to provide a rich and broad view of the impact of inquiry in the classrooms, from primary to higher education, and to provide a window into the perspective of teachers. Voices from the Classroom allows us to advance this mission by identifying and then turning educators' ideas into action. The publication includes chapters on issues ranging from dyslexic students' geospatial abilities to teachers' differential behaviours related, student characteristics and the experiences of refugees with bullying in the educational space. All the contributions published in this book emerged from real classrooms; our teachers and researchers conducted their research by drawing on their experience as educators. We believe that these insights into everyday classrooms, and the issues affecting them, are crucial to making teaching and learning better. We hope they can help drive real, positive change for students and teachers.

Exprovement R.A. Mashelkar, Harsh Haladker, 2023-04-24 Can an outdated or failed solution in one industry bring disruption to another? Can a racing team improve industrial manufacturing productivity? Can science fiction offer entrepreneurs valuable lessons in innovative thinking? Such examples lie at the core of exprovement, which is an exponential improvement borne out of drawing parallels between the seemingly unrelated. Henry Ford revolutionized the automotive industry by comparing and correlating his business with the meat-packing industry. Through the various examples highlighted in this book, Hersh Haladker and Raghunath Mashelkar emphasize that searching for growth opportunities within an offering's existing industry usually results in incremental improvement, whereas exponential improvement can be achieved by drawing parallels from outside of the current context. This book will inspire leaders to look outward for parallels, keeping in mind that 'obvious' comparisons can at best lead to improvement, whereas 'unexpected' ones can lead to exponential improvement and perpetuate a legacy of innovation.

China by Bike Roger Grigsby, 1994 The only guide of its kind, China by Bike allows you to get close enough to everyday Chinese life to taste what natives call ren ching wei - the flavour of humanness.

Knit Together: Many Colors, One Life Jacqueline Smallbones, 2014-07-02 Life is a mosaic of many colors woven together by the Master Weaver. If we're fortunate, we'll see the whole one day. I was fortunate. Knit Together is personal, a random collection of stories from my infancy to adulthood. The stories, whether humorous or serious, playful or honest, document my journey towards healing and wholeness as I learned to walk in the Way of Jesus.

Deja Vu Ian Hocking, 2014-08-11 In the year 2023 Saskia Brandt, detective with the European FIB, comes back from holiday newly single, tired and full of sadness. Heading straight back to the office she finds no peace, only her receptionist dead and no suspects. Given only 12 hours to clear her name she sets to work on unravelling the mystery, one that proves greater than the sum of its parts. David Proctor is just an academic eating his breakfast until he gets a phone-call telling him the prototype computer - Ego - he has been loaned is now the only one left. Meanwhile someone has broken into his house, someone who wants him to go back to the lab where his wife died in a bomb attack 20 years before. As the mysteries and intrigue envelop Saskia and David they are forced to unpick their own pasts. Because in Deja Vu you find that things aren't as they seem, truth is a matter of perspective and that the past can change just as guickly as the future. Deja Vu is a taut

science fiction thriller that will keep you quessing, a gripping read and a sharp reflection on identity in a digital world.

Advanced Introduction to Urban Transport Planning Kevin J. Krizek, David A. King, 2021-05-28 Insightful and original in its approach, this Advanced Introduction to Urban Transport Planning provides a fresh look at cost-efficiency and casts the craft of transport planning in new light, allowing engineers and urban planners to understand the benefits of breaking mobility-centric systems that favour cars and prioritising multi-modal transport systems that promote access. It features in-depth analysis of traditional methods and how these are changing due to new technologies, financial constraints and evolving environmental trends.

Seven More Languages in Seven Weeks Bruce Tate, Ian Dees, Frederic Daoud, Jack Moffitt, 2014-11-19 Great programmers aren't born--they're made. The industry is moving from object-oriented languages to functional languages, and you need to commit to radical improvement. New programming languages arm you with the tools and idioms you need to refine your craft. While other language primers take you through basic installation and Hello, World, we aim higher. Each language in Seven More Languages in Seven Weeks will take you on a step-by-step journey through the most important paradigms of our time. You'll learn seven exciting languages: Lua, Factor, Elixir, Elm, Julia, MiniKanren, and Idris. Learn from the award-winning programming series that inspired the Elixir language. Hear how other programmers across broadly different communities solve problems important enough to compel language development. Expand your perspective, and learn to solve multicore and distribution problems. In each language, you'll solve a non-trivial problem, using the techniques that make that language special. Write a fully functional game in Elm, without a single callback, that compiles to JavaScript so you can deploy it in any browser. Write a logic program in Clojure using a programming model, MiniKanren, that is as powerful as Prolog but much better at interacting with the outside world. Build a distributed program in Elixir with Lisp-style macros, rich Ruby-like syntax, and the richness of the Erlang virtual machine. Build your own object layer in Lua, a statistical program in Julia, a proof in code with Idris, and a quiz game in Factor. When you're done, you'll have written programs in five different programming paradigms that were written on three different continents. You'll have explored four languages on the leading edge, invented in the past five years, and three more radically different languages, each with something significant to teach you.

Bikepacking & Off-Road Cycle Touring Guide Mark Watson,2022-11-30 The Bikepacking & Off-Road Cycle Touring Guide provides a tool kit of skills and knowledge for cyclists who want to get off the beaten track and undertake extended bikepacking tours, with a focus on travelling light. While this book is aimed at cyclists planning long distance off-road oriented tours, the information within contains many gems that are applicable in any bikepacking scenario, long or short. The evolution of bikepacking bikes, luggage, technology and know-how have made off road cycle touring adventures more possible than ever. There are a huge variety of published bikepacking routes all over the world, and the information to plan our own lies just an Internet search away, or within detailed maps and imagery that we can access on our phones. In the Bikepacking & Off-Road Cycle Touring Guide adventure bikepackers Mark Watson and Hana Black draw on their wealth of outdoor experience to provide their view of travelling by bike: how to travel long and light on adventurous routes while having fun along the way.

Intelligent Systems and Applications Kohei Arai,2021-08-02 This book presents Proceedings of the 2021 Intelligent Systems Conference which is a remarkable collection of chapters covering a wider range of topics in areas of intelligent systems and artificial intelligence and their applications to the real world. The conference attracted a total of 496 submissions from many academic pioneering researchers, scientists, industrial engineers, and students from all around the world. These submissions underwent a double-blind peer-review process. Of the total submissions, 180 submissions have been selected to be included in these proceedings. As we witness exponential growth of computational intelligence in several directions and use of intelligent systems in everyday applications, this book is an ideal resource for reporting latest innovations and future of AI. The chapters include theory and application on all aspects of artificial intelligence, from classical to intelligent scope. We hope that readers find the book interesting and valuable; it provides the state-of-the-art intelligent methods and techniques for solving real-world problems along with a vision of the future research.

The Twilight Soi William John Stapleton, 2013-05-22 The Twilight Soi dwells on the dangers of one of the world's most beautiful and intoxicating cities, Bangkok. It is named after one of Bangkok's more infamous small streets, or sois as they are known. Soi Twilight runs off the main thoroughfare of Surawong in the centre of Bangkok's oldest entertainment district Patpong and is known to travelers around the world. It is here where touts from go-go boy bars such as Ocean boys, Bangkok Boys and Classic Boys hustle for the attention of local and international tourists. The Twilight Soi began in an angry place - over theft and deception. But applying Western, or in the author's case Australian, notions of loyalty, honesty, fairness, decency and an abhorrence of deceit do not apply in a country as profoundly different as Thailand. For historical reasons Australians intensely dislike personal treachery or the betrayal of friendship. Standing on these principles in a city like Bangkok marks you as a fool. Ultimately being angry both at your own foolhardiness and the actions of others embitters and harms yourself, no one else. This book ends with more understanding than it began. Many of the problems experienced by foreigners in Thailand come from the extreme cultural differences with the West. In Australia a man's word is his honor. A liar is the lowest form of life. In Thailand only a foreigner would be so rude as to point out that the story told in the morning bears little or no resemblance to the story told in the afternoon.
