Textile Technology and Design Deborah Schneiderman, Alexa Griffith Winton, 2016-01-28 Textile Technology and Design addresses the critical role of the interior at the intersection of design and technology, with a range of interdisciplinary arguments by a wide range of contributors: from design practitioners to researchers and scholars to aerospace engineers. Chapters examine the way in which textiles and technology – while seemingly distinct – continually inform each other through their persistent overlapping of interests, and eventually coalesce in the practice of interior design. Covering all kinds of interiors from domestic (prefabricated kitchens and 3D wallpaper) to extreme (underwater habitats and space stations), it features a variety of critical aspects including pattern and ornament, domestic technologies, craft and the imperfect, gender issues, sound and smart textiles. This book is essential reading for students of textile technology, textile design and interior design.

Design in Motion Penny Hilton, 2020-02-13 With an abundance of information on how to create motion graphics already available, Design in Motion focuses on the why of moving image and less about the how. By unpacking the reasons behind screen designer's production choices, each chapter deconstructs examples of motion graphics by drawing on case studies of both familiar examples from contemporary cinema and unseen work from postgraduate motion graphic designers. It examines the value of image, text, motion, camera and transitions, explaining in detail why some methods work, while others fail. Whether you work in info-graphics, documentary or design, this book is structured to follow the production process and, together with its multimedia companion website, will be a by-your-side companion to guide you through your next project.

The Magic Children Roger Echo-Hawk, 2016-05-23 One day at the end of the twentieth century, Roger Echo-Hawk decided to give up being an Indian. After becoming an American Indian historian, he started to question our widespread reliance on a concept of race that the academy had long-since discredited, and embarked on a personal and professional journey to giving up race himself. This passionate book offers a powerful meditation on racialism and a manifesto for creating a world without it. Echo-Hawk examines personal identity, social movements, and policy—NAGPRA, Indian law, Red Pride, indigenous archaeology—showing how they rely on race and how they should move beyond it.

Androids Chet Haase, 2021-08-13 In 2004, Android was two people who wanted to build camera software. But they couldn't get investors interested. Today, Android is a large team at Google, shipping an operating system (including camera software) to over three billion devices worldwide. This is the inside story, told by the people who made it happen. "What are the essential ingredients that lead a small team to build software at the sheer scale and impact of Android? We may never fully know, but this first person account is probably the closest set of clues we have." —Dave Burke, VP of Android Engineering "Androids captures a strong picture of what the early development of Android, as well as the Android team, was like." —Dianne Hackborn, Android Framework Engineer "Androids is the engaging tale of a motley group of coders with a passion to make insanely great products who banged out the operating system when that idea seemed nuts. True to his geek genes, Chet Haase tells this remarkable tale of technical and business success from the trenches, an inspiring, massive collective effort of dozens of programmers who flipped their seemingly late timing to their advantage, and presaged a generation of platform builders. Read Androids to discover what it takes to create a hot tech team that shipped a product
