Moving Star R. S. Scott,2020-07-27 When Officer Steve Keller finds himself adrift amidst the fallout of horrific events that change not only his cultural outlook but also his fragile grasp on reality, he also finds himself sinking deeper and deeper into the darkest Navajo mythology and mysticism rarely discussed among Navajos.Chasing a powerful Navajo witchman referred to as a Rainmaker, with Agent Thomas Ellington posted by his side, Officer Keller's emotional and mental stability begins to erode with each encounter of the supernatural.While Officer Keller and his FBI partner struggle to unravel a conspiracy steeped against a contrasting set of Navajo beliefs and cultural standards, Officer Keller finds his university education has taught him nothing about spiritual conduct and dark mysticism.Meanwhile, Officer Keller discovers that Tracy Monroe, a childhood friend, is also the bearer of his unborn son. Tracy, who is also endowed with magic abilities, forces the anxiety-ridden Officer Keller to be at odds with someone he mistrusts but is also obligated to protect.As Officer Keller's inner stability and tenacity falters, he fights on, hoisting his broken heart and swinging it like a melee weapon. As the battle between reality and supernatural abilities persists, Officer Keller finds he's actually able to believe in hope, choosing to heal and love again.The second installment in the trilogy chronicles Officer Keller's quest for truth and justice while leading him down an ominous path that walks a fine line between traditional Native life and the expectations of a modern society imposed on an ancient culture.

Kendadh and the Moving Star David Wyllie,2002-11 Kendadh and the Moving Star takes place in the distant future. It is set in the Kingdom of Alban, which once had a high civilization but has degenerated into a land of terror and disorder with only a few places where calm prevails. One of these is the Abbey of Truila in the largely lawless province of Galividia. There lives a boy named Kendadh. Kendadh is twelve years old. He was left as an infant in the care of the monks of the Abbey, a place where unquestioning obedience is the most prized virtue. The fact that he is a fatherless foundling means that he is not well treated. To make matters worse, he has four noticeable qualities: a loud, infectious laugh that makes all adults within hearing distance very nervous; an independent mind that always makes him ask, Why? in a place where unquestioning obedience is the most prized virtue; a love of daydreaming, especially when he should not be doing it; love of a good fight. It should come as no surprise that he is in constant trouble at the Abbey, and on one bright May morning he decides to run away. He does not get far. About three miles from the Abbey, he encounters a divergent, as the Albanach call grotesquely mutated variations on normal life forms, this one an outsized cat with huge claws and fangs. His life is saved by the sudden appearance of three strangely clad, black-skinned strangers. One of them kills the divergent. When he and the strangers have established that they have no language in common, Kendadh, for want of anything better to do, leads them to the Abbey. There, on instructions by the Lord Abbot, Kendadh, who has a gift for learning languages, learns theirs, teaches them the High Tongue of Alban, the one used by the upper classes, and becomes their interpreter and companion. He learns that the strangers have come from an orbiting space craft that the local people have been calling, the moving star. Their lander has been damaged, and they seek a tensile metal needed to repair it. Unable to give them advice, the Abbot suggests that they travel to the capital, and only, city of Alban where they might find what they need. To Kendadh's delight, the three strangers take him with them as their interpreter of the commonspeak, the language used by the ordinary folk of Alban. From Truila, Kendadh and his three new friends set out on a perilous journey. It takes them to the Court of the High King of the Albanach, then through a beautiful but danger filled land of mountains, forests, lakes, and brawling rivers. After many adventures, they reach the Wingèd Isle. On that island, Kendadh has to make a hard choice, one that reveals the kind of person he truly is.

Rules for Moving Nancy Star,2020 From bestselling author Nancy Star comes a deeply moving novel about the truths we hide from others and the lies we tell ourselves. To the outside world, beloved advice columnist Lane Meckler has all the answers. What no one knows is that she also has a secret: her life is a disaster, and it's just gotten worse. Her husband, whom she was planning to leave, has died in a freak accident. Her six-year-old son, Henry, has stopped speaking to everyone but her. Lane's solution? Move. Growing up, that was what her family did best. But when she and Henry pack up and leave, Lane realizes that their next home is no better, and she finally begins to ask herself some hard questions. What made her family move so often? Why has she always felt like an outsider? How can she get Henry to speak? On a journey to help her son find his voice, Lane discovers that somewhere along the way she lost her own. If she wants to help him, she'll need to find the courage to face the past and to speak the truth she's been hiding from for years.

Pioneer of Galactic Astronomy: A Biography of Jacobus C. Kapteyn Pieter C. van der Kruit,2020-12-28 This non-technical biography of Jacobus Cornelius Kapteyn (1851-1922) presents to the general reader the scientific life of the astronomer who pioneered the studies of the structure of the Milky Way Galaxy. In telling Kapteyn's story the author weaves in astronomy basics and uses modern astronomical images to show the developments of astronomical research from Kapteyn's times to the present. In particular the study of the distribution of stars in space has now culminated with spectacular new insights coming from the astrometric satellite GAIA, which is receiving much public attention today. The biography shows how Kapteyn's ideas influenced prominent astronomers worldwide. He is prominent as designer of the Kapteyn Universe, the alternative to the large system found by Harlow Shapley. He is the discoverer of Kapteyn's Star, still the second fastest moving star in the sky, which is now one of the nearest stars with a planet in the habitable zone. This fascinating hybrid of astronomy history and popular astronomy tells the story of the astronomy professor without an observatory who founded the first astronomical laboratory specializing in measuring photographic plates exposed elsewhere. Kapteyn took astronomy out of cataloguing stars to measuring distances and velocities in order to study their spatial distribution, systematic motions (Kapteyn's Star Streams) and the equilibrium between their gravity and motions. His legacy includes, in addition to the first application of Galactic structure and dynamics, Jan Hendrik Oort, the famous astronomer from Leiden, who as a student was so impressed by Kapteyn's lectures that he decided to become an astronomer.

Moving Planets Around Javier Roa,Adrian S. Hamers,MAXWELL X. CAI,Nathan W. C. Leigh,2020-09-01 An introduction to the laws of celestial mechanics and a step-by-step guide to developing software for direct use in astrophysics research. This book offers both an introduction to the laws of celestial mechanics and a step-by-step guide to developing software for direct use in astrophysics research. It bridges the gap between conventional textbooks, which present a rigorous and exhaustive exposition of theoretical concepts, and applying the theory to tackle real experiments. The text is written engagingly in dialogue form, presenting the research journey of the fictional Alice, Bob, and Professor Starmover. Moving Planets Around not only educates students on the laws of Newtonian gravity, it also provides all that they need to start writing their own software, from scratch, for simulating the dynamical evolution of planets and exoplanets, stars, or other heavenly bodies.

Five-Star Families Carol Kuykendall,2007-03 Before children entered your life, did you dream about the kind of family you wanted? And have those lofty dreams come crashing down somewhere between managing chaotic schedules and refereeing sibling squabbles? As a mom, you have lots of dreams for your family--and the influence to make them come true! But it's hard to balance the widening gap between dreams and reality, so Five-star Families will help you focus on the five qualities that matter most: love, fun, loyalty, growth, and faith. With real-life examples, Scripture references, and practical yet fun advice, Carol Kuykendall will show you how to express and experience each of these qualities to the fullest. Her powerful insight and thought-provoking questions will inspire you to become a family who wants to be together, grow together, and stay together--a family who will shine from one generation to the next!

From a Changeling Star Jeffrey A. Carver,2014-11-11 Into a dying star . . . Beneath the roiling surface of Betelgeuse, scientists anxiously await the one man essential to the success of Starmuse, the greatest engineering project in human history. But on Kantano's World, Willard Ruskin battles invisible agents for control of his life, his physical form, and even his memories. Drawn into a conflict from which not even death will free him, Ruskin must find a way to reach Betelgeuse before his enemies sabotage Starmuse—and humanity's future among the stars. A harrowing journey from inside the human cell... to the mind of a dying star. A stunning blend of hard science fiction with moving characterization, both human and otherwise. Introduces the robot Jeaves, familiar to readers of The Chaos Chronicles. From the Nebula-nominated author of Eternity's End. Original print publication by Bantam Spectra. A Locus bestseller. REVIEW QUOTES: "Starts with a bang and keeps getting better. Carver handles not one, but two hot topics, and presents both vividly." —David Brin, author of Existence and Startide Rising "Running from the micro to the macro and back again, redefining sentience, space-time, and perhaps humanity along the way, From a Changeling Star is a fast-paced puzzler, rich in invention, and Jeffrey A. Carver's most ambitious book to date." —Roger Zelazny "As audacious and imaginative as the best of John Varley, with characters as memorable as those of Sturgeon or Zelazny, and with one of the most powerful endings in science fiction, this book will both hold and reward your attention." —Spider Robinson, author of The Stardance Trilogy and Variable Star "Carver does an excellent job of tickling your sense of wonder, and in the end he leaves you both satisfied and craving another serving of his considerable talent." —Tom Easton, Analog

Draw Me a Star Eric Carle,1998-02-02 Draw me a star. And the artist drew a star. It was a good star. Draw me a sun, said the star. And the artist drew a sun. And on the artist draws, bringing the world to life picture by beautiful picture until he is spirited across the night sky by a star that shines on all he has made. In Draw Me a Star, Eric Carle celebrates the imagination in all of us with a beguiling story about a young artist who creates a world of light and possibility. A remarkable, quintessentially simple book encompassing Creation, creativity, and the cycle of life within the eternal. —Kirkus Reviews, pointer review This book will appeal to readers of all ages. An inspired book in every sense of the word. —School Library Journal A fable about the passage through life and its fullness of possibilities, children will like the cumulative effects of the tale, the creation of the world through paints, and Carle's collages flaring with rainbow hues. —The Bulletin of the Center for Children's Books

To Remember Charlie By Roger Dee,2014-04-11 The history of this materialistic world is highlighted with strange events that scientists and historians, unable to explain logically, have dismissed with such labels as supernatural, miracle, etc. But there are those among us whose simple faith can--and often does--alter the scheme of the universe. Even a little child can do it....

Move the Stars: 3 Jessica Hawkins,2017-10-10 The highly anticipated conclusion to the Something in the Way series, a forbidden love saga.LakeIt was a hot summer day when I met him on the construction site next to my parents' house. If I'd known then what I do now, would I have kept on walking? Manning was older, darker, experienced--and I'd trusted him when he said the story would only ever be about us. I'd held those words close and challenged fate, but I had lost.A part of me is still that sixteen-year-old girl squinting up at Manning, but no matter how far I fall or high I soar, I'll always be a bird without her bear and nothing without him.ManningWhen I close my eyes, I can no longer see her. The decisions I made were to push Lake in the right direction--away from me. But now that she's gone, would I have made those same choices?I'd walked away like I was supposed to. I'd kept my distance. I'd bent over backward to keep Lake pure, but she's no longer that girl, and I don't know if I can stay away anymore. I only know I don't want to. She's still everything I want and nothing I should ever have, but if anyone can move the stars, it's her great bear in the sky.

Moving from Project Management to Project Leadership R. Camper Bull,2010-04-29 Imagine if we were using the same medical techniques today that were used during the Industrial Revolution, including the practice of bloodletting using leeches. Medicine has come a long way since then. So why do organizations and corporations cling to management techniques that are just as obsolete as the bleed-and-leech model? In a global workpla
