MP3 and the Infinite Digital Jukebox Chris Gilbey, 2000-06-06 With MP3 technology, the era of accessing the full range of the world's music and customizing it to individual taste has arrived. Written by music industry insider and former computer programmer Chris Gilbey, MP3 and the Infinite Digital Jukebox shows how to take advantage of this revolution. The book offers clear and simple instructions on how and where to find all the necessary applications for getting instant musical gratification from the new online music devices on the market. Topics covered include information about all the music file types, how to play them, how to rip them, how to burn your own CDs, and how to send music to others. The book reviews all the latest software and hardware, but also shows how it's possible to avoid the expense and use existing resources.

Understanding Search Engines Dirk Lewandowski, 2023-03-07 This book provides a broad introduction to search engines by integrating five different perspectives on Web search and search engines that are usually dealt with separately: the technical perspective, the user perspective, the internet-based research perspective, the economic perspective, and the societal perspective. After a general introduction to the topic, two foundational chapters present how search tools can cover the Web's content and how search engines achieve this by crawling and processing the found documents. The next chapter on user behavior covers how people phrase their search queries and interact with search engines. This knowledge builds the foundation for describing how results are ranked and presented. The following three chapters then deal with the economic side of search engines, i.e., Google and the search engine market, search engine optimization (SEO), and the intermingling of organic and sponsored search results. Next, the chapter on search skills presents techniques for improving searches through advanced search interfaces and commands. Following that, the Deep Web and how its content can be accessed is explained. The two subsequent chapters cover ways to improve the quality of search results, while the next chapter describes how to access

the Deep Web. Last but not least, the following chapter deals with the societal role of search engines before the final chapter concludes the book with an outlook on the future of Web search. With this book, students and professionals in disciplines like computer science, online marketing, or library and information science will learn how search engines work, what their main shortcomings are at present, and what prospects there are for their further development. The different views presented will help them to understand not only the basic technologies but also the implications the current implementations have concerning economic exploitation and societal impact.

Baidu ShinJoung Yeo, 2022-11-09 An in-depth exploration of the political economy of the Chinese technology company Baidu which, along with China's other tech giants Alibaba and Tencent, has emerged as a leading global Internet company. Baidu - not Google - is the dominant search company in China, the largest Internet market in the world, whose impact on the political economy is no longer limited to China, but the broader global market, and in particular the US economy. This book outlines the intense competition within the search engine market and illustrates the inter-capitalist dynamic in the contemporary Chinese Internet sector, and highlights Baidu's uniqueness on the global stage as it pivots to Artificial Intelligence (AI) and expands into other industrial sectors. ShinJoung Yeo offers a window into the intensifying geopolitical shaping of the global Internet industry, and the contention and collaboration among multinational firms and states to control the most dynamic capitalist economic sector - the Internet. An important and timely analysis for anyone interested in the political economy of the global media, communication, and information industries, and particularly those requiring a better understanding of the Internet industry in China.
