Market Research In A Week Judy Bartkowiak, 2012-06-08 Market Research just got easier Every day in business we make decisions. To reduce the risk associated with making these decisions, it's essential to understand your consumer and your market, and this is why we conduct market research. Decisions are not taken in a vacuum; there are competitive products and services in your marketplace, which means that consumers can choose whether or not to buy your product. Some decisions are high risk such as launching a new product, changing the packaging of an existing product, making a price change, changing the creative direction or strategy of the advertising or selling into new markets. How will your consumers react to the decisions you make and how will your competitors respond? This book takes you through the market research process from initial problem identification through research design, consideration of alternative methodologies, briefing an agency, questionnaire design and approval, to managing the project, analysis and presentation of results. Whether you use an outside research agency or your own market research or consumer insight department, spending a week to understand the process will give you unique skills which will ensure that you get the research results you need that will address the marketing questions you have. Each of the seven chapters in Market Research In A Week covers a different aspect: - Sunday: Market research and project design - Monday: The research brief and research proposal - Tuesday: Qualitative market research - Wednesday: Quantitative market research - Thursday: Questionnaire and topic guide design - Friday: Research analysis - Saturday: Report writing and presentation skills

Envisioning the Survey Interview of the Future Frederick G. Conrad,Michael F. Schober,2007-12-14 Praise for*Envisioning the Survey Interview of the Future* This book is an excellent introduction to some brave new technologies . . . and their possible impacts on the way surveys might be conducted. Anyone interested in the future of survey methodology should read this book. -Norman M. Bradburn, PhD, National Opinion Research Center, University of Chicago *Envisioning the Survey Interview of the Future* gathers some of the brightest minds in alternative methods of gathering self-report data, with an eye toward the future self-report sample survey. Conrad and Schober, by assembling a group of talented survey researchers and creative inventors of new software-based tools to gather information from human subjects, have created a volume of importance to all interested in imagining future ways of interviewing. -Robert M. Groves, PhD, Survey Research Center, University of Michigan This collaboration provides extensive insight into the impact of communication technology on survey research As previously unimaginable communication technologies rapidly become commonplace, survey researchers are presented with both opportunities and obstacles when collecting and interpreting data based on human response. *Envisioning the Survey Interview of the Future* explores the increasing influence of emerging technologies on the data collection process and, in particular, self-report data collection in interviews, providing the key principles for using these new modes of communication. With contributions written by leading researchers in the fields of survey methodology and communication technology, this compilation integrates the use of modern technological developments with established social science theory. The book familiarizes readers with these new modes of communication by discussing the challenges to accuracy, legitimacy, and confidentiality that researchers must anticipate while collecting data, and it also provides tools for adopting new technologies in order to obtain high-quality results with minimal error or bias. *Envisioning the Survey Interview of the Future* addresses questions that researchers in survey methodology and communication technology must consider, such as: How and when should new communication technology be adopted in the interview process? What are the principles that extend beyond particular technologies? Why do respondents answer questions from a computer differently than questions from a human interviewer? How can systems adapt to respondents' thinking and feeling? What new ethical concerns about privacy and confidentiality are raised from using new communication technologies? With its multidisciplinary approach, extensive discussion of existing and future technologies, and practical guidelines for adopting new technology, *Envisioning the Survey Interview of the Future* is an essential resource for survey methodologists, questionnaire designers, and communication technologists in any field that conducts survey research. It also serves as an excellent supplement for courses in research methods at the upper-undergraduate or graduate level.
