LIFEL1K3 (Lifelike) Jay Kristoff,2018-05-29 From the coauthor of the New York Times bestselling Illuminae Files comes the first book in a new series that's part Romeo and Juliet, part Terminator, and all adrenaline. On an island junkyard beneath a sky that glows with radiation, a deadly secret lies buried in the scrap. Seventeen-year-old Eve isn't looking for trouble--she's too busy looking over her shoulder. The robot gladiator she spent months building has been reduced to a smoking wreck, she's on the local gangster's wanted list, and the only thing keeping her grandpa alive is the money she just lost to the bookies. Worst of all, she's discovered she can somehow destroy machines with the power of her mind, and a bunch of puritanical fanatics are building a coffin her size because of it. If she's ever had a worse day, Eve can't remember it. The problem is, Eve has had a worse day--one that lingers in her nightmares and the cybernetic implant where her memories used to be. Her discovery of a handsome android named Ezekiel--called a Lifelike because they resemble humans--will bring her world crashing down and make her question whether her entire life is a lie. With her best friend Lemon Fresh and her robotic sidekick Cricket in tow, Eve will trek across deserts of glass, battle unkillable bots, and infiltrate towering megacities to save the ones she loves...and learn the truth about the bloody secrets of her past.

Homeland Cory Doctorow,2013-02-05 In Cory Doctorow's wildly successful Little Brother, young Marcus Yallow was arbitrarily detained and brutalized by the government in the wake of a terrorist attack on San Francisco--an experience that led him to become a leader of the whole movement of technologically clued-in teenagers, fighting back against the tyrannical security state. A few years later, California's economy collapses, but Marcus's hacktivist past lands him a job as webmaster for a crusading politician who promises reform. Soon his former nemesis Masha emerges from the political underground to gift him with a thumbdrive containing a Wikileaks-style cable-dump of hard evidence of corporate and governmental perfidy. It's incendiary stuff--and if Masha goes missing, Marcus is supposed to release it to the world. Then Marcus sees Masha being kidnapped by the same government agents who detained and tortured Marcus years earlier. Marcus can leak the archive Masha gave him--but he can't admit to being the leaker, because that will cost his employer the election. He's surrounded by friends who remember what he did a few years ago and regard him as a hacker hero. He can't even attend a demonstration without being dragged onstage and handed a mike. He's not at all sure that just dumping the archive onto the Internet, before he's gone through its millions of words, is the right thing to do. Meanwhile, people are beginning to shadow him, people who look like they're used to inflicting pain until they get the answers they want. Fast-moving, passionate, and as current as next week, *Homeland* is every bit the equal of *Little Brother*--a paean to activism, to courage, to the drive to make the world a better place. The Globalization Paradox Dani Rodrik,2011-03-24 For a century, economists have driven forward the cause of globalization in financial institutions, labour markets, and trade. Yet there have been consistent warning signs that a global economy and free trade might not always be advantageous. Where are the pressure points? What could be done about them?Dani Rodrik examines the back-story from its seventeenth-century origins through the milestones of the gold standard, the Bretton Woods Agreement, and the Washington Consensus, to the present day. Although economic globalization has enabled unprecedented levels of prosperity in advanced countries and has been a boon to hundreds of millions of poor workers in China and elsewhere in Asia, it is a concept that rests on shaky pillars, he contends. Its long-term sustainability is not a given.The heart of Rodrik's argument is a fundamental 'trilemma': that we cannot simultaneously pursue democracy, national self-determination, and economic globalization. Give too much power to governments, and you have protectionism. Give markets too much freedom, and you have an unstable world economy with little social and political support from those it is supposed to help. Rodrik argues for smart globalization, not maximum globalization.
