Crimes of the Art World Thomas D. Bazley Ph.D.,2010-02-26 This book offers a revealing look at the full scope of criminal activity in the art world—a category of crime that is far more pervasive than is generally realized. Forgeries, fakes, fencing, and felony theft—all are pervasive problems in the world of art, where the stakes are high, the networks wide, and the consequences profound. In recent years, suspicious acquisitions, unreliable provenances, and shady dealers have found their way into the headlines as museums and private collections have been confronted with everything from fake pieces to stolen antiquities to plain old theft and vandalism. Crimes of the Art World captures the full scope of this staggeringly lucrative field of criminal conduct, showing how its impact reaches well beyond the walls of the museum. Filled with fascinating stories of crime and greed, this revealing volume looks at case after case of thefts, forgeries, fakes, and illicit trafficking, as well as the political/religious victimization of art, white-collar art crime, and vandalism. The book examines each type of crime in terms of frequency, losses, and characteristics of victims and criminals. Concluding chapters focus on preventive measures, art crime investigation, and security issues.

World War 3.0 Ken Auletta,2001-02-15 The Internet Revolution, like all great industrial changes, has made the world's elephantine media companies tremble that their competitors-whether small and nimble mice or fellow elephants-will get to new terrain first and seize its commanding heights. In a climate in which fear and insecurity are considered healthy emotions, corporate violence becomes commonplace. In the blink of an eye-or the time it has taken slogans such as The Internet changes everything to go from hyperbole to banality-creative destruction has wracked the global economy on an epic scale. No one has been more powerful or felt more fear or reacted more violently than Bill Gates and Microsoft. Afraid that any number of competitors might outflank them-whether Netscape or Sony or AOL Time Warner or Sun or AT&T or Linux-based companies that champion the open-source movement or some college student hacking in his dorm room-Microsoft has waged holy war on all foes, leveraging its imposing strengths. In World War 3.0, Ken Auletta chronicles this fierce conflict from the vantage of its most important theater of operations: the devastating second front opened up against Bill Gates's empire by the United States government. The book's narrative spine is United States v. Microsoft, the government's massive civil suit against Microsoft for allegedly stifling competition and innovation on a broad scale. With his superb writerly gifts and extraordinary access to all the principal parties, Ken Auletta crafts this landmark confrontation into a tight, character- and incident-filled courtroom drama featuring the best legal minds of our time, including David Boies and Judge Richard Posner. And with the wisdom gleaned from covering the converging media, software, and communications industries for The New Yorker for the better part of a decade, Auletta uses this pivotal battle to shape a magisterial reckoning with the larger war and the agendas, personalities, and prospects of its many combatants.

Who Owns the World's Media? Eli M. Noam,The International Media Concentration Collaboration,2015-12-07 Media ownership and concentration has major implications for politics, business, culture, regulation, and innovation. It is also a highly contentious subject of public debate in many countries around the world. In Italy, Silvio Berlusconi's companies have dominated Italian politics. Televisa has been accused of taking cash for positive coverage of politicians in Mexico. Even in tiny Iceland, the regulation of media concentration led to that country's first and only public referendum. Who Owns the World's Media? moves beyond the rhetoric of free media and free markets to provide a dispassionate and data-driven analysis of global media ownership trends and their drivers. Based on an extensive data collection effort from scholars around the world, the book covers thirteen media industries, including television, newspapers, book publishing, film, search engines, ISPs, wireless telecommunication and others, across a ten to twenty-five year period in thirty countries. In many countries--like Egypt, China, or Russia--little to no data exists and the publication of these chapters will become authoritative resources on the subject in those regions.

After examining each country, Noam and his collaborators offer comparisons and analysis across industries, regions, and development levels. They also calculate overall national concentration trends beyond specific media industries, the market share of individual companies in the overall national media sector, and the size and trends of transnational companies in overall global media. This definitive global study of the extent and impact of media concentration will be an invaluable resource for communications, public policy, law, and business scholars in doing research and also for media, telecom, and IT companies and financial institutions in the private sector.

Big World Mary Miller,2009 Fiction. Mary Miller's BIG WORLD is the second book and first work of fiction to come out of Short Flight/Long Drive Books, a publishing arm of the independent literary journal Hobart. The characters in Mary Miller's debut short story collection BIG WORLD are at once autonomous and lonesome, possessing both a longing to connect with those around them and a cynicism regarding their ability to do so, whether they're holed up in a motel room in Pigeon Forge with an air gun shooting boyfriend as in Fast Trains or navigating the rooms of their house with their dad after their mother's death as in Leak. Mary Miller's writing is unapologetically honest and efficient and the gut-wrenching directness of her prose is reminiscent of Mary Gaitskill and Courtney Eldridge, if Gaitskill's and Eldridge's stories were set in the south and reeked of spilt beer and cigarette smoke.
